# Editura Risoprint

Trăim în aceste zile o senzaţie crescândă de neputinţă în faţa istoriei care se scrie cu vieţile noastre. Vedem imperii destrămându-se, războaie civile, regrupări politice, formări de uniuni economice şi monetare. Ce şansă are individul, omul de rând, să influenţeze în vreun fel mersul evenimentelor? Nici măcar votul său, într-o ţară democratică, nu mai pare să însemne aşa de mult ca altădată. Nu este oare omul victima celor puternici, care se folosesc de el, dar iau decizii mult peste capul lui? Cartea Daniel vine să risipească astfel de temeri, proclamând un extraordinar adevăr: „Cel Prea Înalt stăpânește peste împărăția oamenilor, [...] o dă cui îi place, și înalță pe ea pe cel mai de jos dintre oameni!". Ea ne arată cum niște indivizi aduși ca robi în Babilon pot – fără să recurgă la jocuri politice, la grupuri de lobby sau la aritmetica voturilor – influența istoria și reușesc să proclame stăpânirea Dumnezeului lor într-o lume ce se complace într-o auto-proslăvire idolatră. Mai mult, prin profețiile din partea a doua, Daniel ne avertizează că, deși istoria va cunoaște un curs descendent, chemarea oamenilor lui Dumnezeu rămâne aceeași: de a-L face cunoscut pe Domnul lor prin ascultare, credincioșie și renunțarea la orice compromis. În fața mărturiei vieții lui Daniel, cine ar mai îndrăzni să spună că tu, cel care ai ales să te alipești de Domnul, ca Daniel, oricine ai fi, ești prea neînsemnat pentru a influența spre viață realitatea în care trăiești?

Created as intercultural and interdisciplinary, conferences of the series "Cognitive Modeling in Linguistics" have been successfully held since 1998. Over the years, CML has visited a number of countries, attracting more and more scientists from all over the world and thus broadening the scope of its topics. The conference has worked out its scientific character and now it has a constant core of participants; and the term "cognitive modeling" has become a popular topic of high profile conferences in linguistics and artificial intelligence, which affirms the CML's direction of movement. The present volume gathers the most outstanding and interesting articles from participants of the XIIIth International Conference "Cognitive Modeling in Linguistics", whose studies will no doubt be of interest to both scientists who have tied their lives with linguistics, as well as to those people who treat it as a hobby. For information about CML conferences, please visit www.cml.msisa.ru

The contributors provide fresh insight into the context surrounding the composition and reception of the Psalms, the relationships between the Psalms, and of early audiences who engaged with the material. Close attention is also paid to specific interpretative problems which emerge in the Psalms, both linguistic and theological. Consequently, there is the creation of a more sophisticated historical reconstruction of how the Psalms were used originally and in subsequent periods, opening up challenges and possibilities for scholars through emphasizing the need in critical Psalms scholarship for vitality and imagination.

A unique introduction to the developing field of Theology and Qualitative Research In recent years, a growing number of scholars within the field of theological research have adopted qualitative empirical methods. The use of qualitative research is shaping the nature of theology and redefining what it means to be a theologian. Hence, contemporary scholars who are undertaking empirical fieldwork across a range of theological subdisciplines require authoritative guidance and well-developed frameworks of practice and theory. The Wiley Blackwell Companion to Theology and Qualitative Research outlines the challenges and possibilities for theological research that engages with qualitative methods. It reflects more than 15 years of academic research within the Ecclesiology and Ethnography Network, and features an international group of scholars committed to the empirical and theological study of the Christian church. Edited by world-renowned experts, this unprecedented volume addresses the theological debates, methodological complexities, and future directions of this emerging field. Contributions from both established and emerging scholars describe key theoretical approaches, discuss how different empirical methods are used within theology, explore the links between qualitative researchand adjacent scholarly traditions, and more. The companion: Discusses how qualitative empirical work changes the practice of theology, enabling a disciplined attention to the lived social realities of Christian religion and what theologians do Introduces theoretical and methodological debates in the field, as well as central epistemological and ontological questions Presents different approaches to Theology and Qualitative research, highlighting important issues and developments in the last decades Explores how empirical insights are shaping areas such as liturgics, homiletics, youth ministry, and Christian education Includes perspectives from scholars working in disciplines other than theology The Wiley Blackwell Companion to Theology and Qualitative Research is essential reading for graduate students, postgraduates, PhD students, researchers, and scholars in Christian Ethics, Systematic Theology, Contemporary Worship, and related disciplines such as Ecclesiology, Mission Studies, World Christianity, Pastoral Theology, Political Theology, Worship Studies, and all forms of contextual theology.

ANALYSE VOLUMÉTRIQUE ET GRAVIMÉTRIQUE - Guide de travaux pratiques

**Zaharia, alături de Hagai şi Maleahi – toţi trei profeţi post-exilici –, încheie filonul revelaţiei profetice vechi-testamentare. În comentariul său pe Zaharia, Leupold (Exposition of Zecharia, p. 3) afirmă că finalul vorbirii profetice nu pare a fi un rău care seacă sub arşiţa soarelui, ci mai degrabă o glorioasă şi bogată revărsare a revelaţiei divine. Bentley ne spune că, în Noul Testament, „din Zaharia sunt citate treizeci şi trei de porţiuni de text în cincizeci de locuri diferite. Multe dintre acestea au legătură directă cu Domnul Isus Hristos" (Michael Bentley, Building for the Glory of God, p. 92), iar Baldwin afirmă că „natura aproape enigmatică a unor texte din Zaharia invită la meditaţie. Mai ales pasajele care trateazâ tema păstorului, care au influenţat gândirea lui Isus mai mult decât orice alt pasaj din Vechiul Testament" (Baldwin, Zecharia, p. 198). Prin aceste profeţii mesianice, Duhul lui Dumnezeu pregătea inima poporului Său să traverseze pustiul perioadei Inter-testamentare şi să păstreze vie aşteptarea mesianică. Zaharia alunecă însă mai departe în istorie, spre vremurile în care cei din Iuda şi locuitorii Ierusalimului Îl vor plânge pe Cel pe care L-au străpuns şi vor pregăti astfel A Doua Venire a lui Hristos, când va domni din Ierusalim peste întreg pământul.**

**This book provides the methods, problems and tools necessary for process control engineering. This comprises process knowledge, sensor system technology, actuators, communication technology and logistics, as well as the design, construction, and operation of control systems. Beyond the traditional field of process engineering, the authors apply the same principles to biomedical processes, energy production and management of environmental issues.**

**Să ascultăm, deci, încheierea tuturor învăţăturilor: Teme-te de Dumnezeu şi păzeşte poruncile Lui. Aceasta este datoria oricărui om. Căci Dumnezeu va aduce orice faptă la judecată, şi judecata aceasta se va face cu privire la tot ce este ascuns, fie bine, fie rău." Înţelegem anevoie că din ciclul vicios al deşertăciunii nu se poate evada nici prin educaţie, nici prin plăceri, nici prin puterea politică sau economică şi nici prin poziţii sociale. Atunci când existenţa noastră se reduce doar la sfera lucrurilor de "sub soare", totul este deşertăciune şi goană după vânt. Lumina înţelepciunii poate fi însă întrezărită dintr-o casă de jale. Acolo ne aducem aminte de sfârşitul oricărui om şi că scopul existenţei se reduce nu la ceea ce adunăm noi din deşertăciune, ci la ceea ce se adună în noi în timpul umblării în ea. Atunci când se rupe funia de argint, când se sfarmă vasul de aur, când se sparge găleata la izvor şi când se strică roata la fântână, ţărâna se întoarce în pământ, cum a fost, iar duhul se-întoarce la Dumnezeu, care l-a dat, ducând la judecată chipul ce s-a modelat în noi prin tocmai umblarea noastră în deşertăciunea lucrurilor de sub soare.**

**Cine dintre noi nu ar dori să aibă dovezi incontestabile cu privire la prezenţa şi lucrarea Duhului Sfânt în viaţa sa? Întrebarea este unde şi în ce anume să căutăm aceste dovezi? Pe de o parte, ele ar trebui să se arate în asemănarea noastră cu Hristos dovedită în prezenţa roadei Duhului în relaţiile noastre. Pe de altă parte însă, atunci când, în primul capitol din Faptele Apostolilor, Domnul Isus vorbeşte despre Botezul cu Duhul Sfânt – „Nu după multe zile, veţi fi botezaţi cu Duhul Sfânt" (5) –, El leagă lucrul acesta de puterea şi imperativul mărturiei creştine: „Voi veţi primi o putere, când Se va pogorî Duhul Sfânt peste voi, şi-Mi veţi fi martori în Ierusalim, în toată Iudeea, în Samaria, şi până la marginile pământului" (1:8). Prin aceasta, Hristos subliniază faptul că puterea lui Dumnezeu ni se dă pentru împlinirea lucrării pe care ne-a încredinţat-o Dumnezeu.**

Die International Bibliography of Historical Sciences verzeichnet jährlich die bedeutendsten Neuerscheinungen geschichtswissenschaftlicher Monographien und Zeitschriftenartikel weltweit, die inhaltlich von der Vor- und Frühgeschichte bis zur jüngsten Vergangenheit reichen. Sie ist damit die derzeit einzige laufende Bibliographie dieser Art, die thematisch, zeitlich und geographisch ein derart breites Spektrum abdeckt. Innerhalb der systematischen Gliederung nach Zeitalter, Region oder historischer Disziplin sind die Werke nach Autorennamen oder charakteristischem Titelhauptwort aufgelistet.

The 2014 Asia-Pacific Electronics and Electrical Engineering Conference (EEEC 2014) was held on December 27-28, 2014 in Shanghai, China. EEEC has provided a platform for researchers, engineers, academicians as well as industrial professionals from all over the world to present their research results and development activities in Electroni

Given the rapid growth of engineering fields, namely the food industry with novel food process technologies, novel ingredients, advanced enzyme production and applications, and other complementary technologies, this book will disclose the latest trends in food engineering. This text is a compilation of selected research articles and reviews covering current efforts in research in and application of emerging technologies in the food industry. The chapters in this book are divided into three broad sections. Section 1 deals with introductory information about enzyme application, preserving treatments (such as thermal treatment, active packaging concepts) in a sustainable, cost-effective manner, inclusion in food processing of wild edible plants as a part of cultural and generic heritage, and the upscaling of extraction techniques to increase the bioavailability of bioactive compounds. Section 2 provides data concerning the food industry's emerging technologies. Section 3 reveals the latest trends in food fortification. Overall, this book serves as an inspiring source for both scientific and industrial actors or anyone involved in any aspect related to the food industry.

The volume configures a multidisciplinary perspective on the concept of intellectual elites and describes their action in Eastern European cultures, bringing together studies signed by a number of eminent Romanian scholars from various fields of the Humanities.

Collinearity Solution. Counterpoint

În predica de pe munte, Isus Hristos vorbește despre doi oameni care au zidit fiecare o casă. Deși casele arătau la fel, ceea ce le deosebea era faptul că una a fost zidită pe stâncă, iar cealaltă pe nisip. În mod cert, prin această analogie, Domnul Isus vorbește despre viața spirituală a unui om. Fără o temelie sănătoasă, casa sufletului nostru nu va rămâne în picioare aunci când vor năvăli peste ea suvoiaele încercărilor. Rândurile așternute în volumul de fată își propun să ne ajute să examinăm temelia vieții de credință, înainte de a porni să zidim mai departe pe ea. Iar dacă toate aceste lucruri au fost deja înțelese, atunci demersul parcurgerii acestor pagini va sluji la sistematizarea cunoștințelor acumulate, pentru a deveni dascăli mai buni pentru cei care ne calcă pe urme.

This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com. The Romanian Orthodox Church expanded significantly after the First World War, yet Protestant Repenter and schismatic Orthodox movements such as Old Calendarism also grew exponentially during this period, terrifying church leaders who responded by sending missionary priests into the villages to combat sectarianism. Several lay renewal movements such as the Lord's Army and the Stork's Nest also appeared within the Orthodox Church, implicating large numbers of peasants and workers in tight-knit religious communities operating at the margins of Eastern Orthodoxy. Bringing the history of the Orthodox Church into dialogue with sectarianism, heresy, grassroots religious organization and nation-building, Roland Clark explores how competing religious groups in interwar Romania responded to and emerged out of similar catalysts, including rising literacy rates, new religious practices and a newly empowered laity inspired by universal male suffrage and a growing civil society who took control of community organizing. He also analyses how Orthodox leaders used nationalism to attack sectarians as 'un-Romanian', whilst these groups remained indifferent to the claims the nation made on their souls. Situated at the intersection of transnational history, religious history and the history of reading, Sectarianism and Renewal in 1920s Romania challenges us to rethink the one-sided narratives about modernity and religious conflict in interwar Eastern Europe.

Trăim într-o lume de întuneric; o lume dezorientată. Pluralismul și procesul de secularizare au condus la negarea noțiunii de Dumnezeu și la relativizarea adevărului. Cu toate acestea, foamea spirituală a rămas în adâncul multor suflete. Secularizării și pluralismului li se adaugă procesul de privatizare, care face dificilă, dacă nu imposibilă, aducerea în spațiul public a convingerilor religioase. Într-o astfel de lume, invitația la întrupare pe care ne-o face Pavel în paragraful din Coloseni 3:12-17 este mai actuală și mai stringentă ca oricând. "Cum ajuți o generație care ascultă cu ochii și gândește cu simțurile?" - întreabă Ravi Zacharias și tot el răspunde: "Trebuie să-i ajuți nu doar să audă Evanghelia, ci s-o și vadă." "Fot așa să lumineze și lumina voastră înaintea oamenilor, ca ei să vadă faptele voastre bune și să slăvească pe Tatăl vostru, care este în ceruri" (Mat. 5:16, s.n.). Cei din jur așteaptă să vadă adevărul, nu doar să-l audă. Întruparea adevărului deschide ușa pentru articularea lui și-l face persuasiv. Dar, afirmă Ravi, mesajul nu trebuie doar argumentat, ci și simțit, rostit cu o profundă convingere lăuntrică, pe care o câștigăm pe măsură ce, urcând scara devenirii hristice, Hristos ia chip în noi.

Obiectivul acestei lucrari este readucerea cartii Estera in atentia mediului teologic romanesc, precum si in atentia celui bisericesc, in incercarea de a repara nedreptatea facuta acestei carti care a ajuns sa ocupe un nemeritat loc marginal atat in cercetare, cat si in viata ecleziala. Pentru a atinge acest deziderat, autorul da la o parte prejudecatile cu care este privita de obicei cartea, cautand in schimb sa identifice si sa articuleze mesajul ei teologic, insa fara a neglija contextul istoric din care a izvorat si specificul ei literar. Lucrarea are la baza premisa ca intelesul teologic al cartii Estera iese la iveala in urma analizei simultane a contextului istoric al cartii si a celui literar si ca, din acest motiv, o interpretare care omite oricare dintre aceste doua dimensiuni este asimetrica si poate conduce la concluzii greșite. Prin comparatie cu celelalte carti canonice ale Vechiului Testament, cartea Estera, in versiunea sa ebraica, are un profil teologic aparte, care tine de omitirea numelui lui Dumnezeu si de absenta celor mai importante elemente cu caracter religios mentionate in alte scrieri ale Vechiului Testament, cu exceptia postului. Mai mult, cartii Estera i se atribuie uneori un aparent caracter nationalist, chiar sovin, si promovarea unei ostilitati fatise fata de neamuri. Un alt element specific cartii este sarbatoarea Purimului, care nu doar ca lipseste din sarbatorile pporuncite in Lege, ci pare sa fie celebrarea unei victorii a evreilor impotriva dusmanilor lor, victorie obtinuta cu pretul sacrificarii multor vieti omenesti. Luand in considerare aceste aspecte, sulul Esterei, cum este cunoscuta cartea in mediul ebraic, ar putea aparea ca avand caracter eminamente secular. Scopul autorului cartii Estera a fost acela de a transmite evreilor din diaspora atat o chemare, cat si un avertisment, indemnandu-i sa redescopere (sau sa-si redefineasca) propria identitate in lumina Legamantului lui Dumnezeu  astfel poporul evreu devine cu adevarat poporul lui Dumnezeu, un neam diferit si separat de celelalte popoare. Asadar, in mod practic, evreii din diaspora persana sunt indemnati sa-si asume statutul de evrei, imlinindusi vocatia conform Legamantului lui Dumnezeu, fara sa se ascunda, fiindca in diaspora Legamantul a ramas unica lor sursa de identitate. Cu toate ca o asemenea situatie ar provoca, bineinteles, ostilitatea celor din jur, tainuirea propriei identitati si adoptarea unui mod de viata  secular  prin asimilare culturala si conformare la obiceiurile zonei le ar aduce mai multe necazuri, care ar putea culmina, la un moment dat, cu anihilarea lor ca natiune. Ca atare, asumarea in mod deschis a propriei lor identitati etnice, in lumina Legamantului lui Dumnezeu, si dovedirea acestui fapt prin intermediul unor actiuni concrete le va asigura evreilor supravietuirea, atat la nivel individual, cat si din punct de vedere national. Acestor considerente ar trebui sa le adaugam si faptul ca, in planul tainic al lui Dumnezeu, ostilitatea diasporei este pur si simplu un mijloc prin care evreii din afara granitelor Israelului sunt constransi sa se redescopere pe ei insisi ca popor al lui Dumnezeu si sa traiasca conform Legamantului Sau. Despre autor Romulus Ganea isi propune sa puna in discutie falsele etichete aplicate cartii Estera, pentru a aduce o lumina noua asupra mesajului ei teologic, pornind indeosebi de la contextul istoric si de la specificul literar al cartii. Past, Present and Prospects : Proceedings of the International Symposium Held at the New Europe College, Bucharest, April 6-7, 2001

Soluţia coliniarităţii. Contrapunct

*This proceedings volume provides a multifaceted perspective on current challenges and opportunities that organizations face in their efforts to develop and grow in an ever more complex environment. Featuring selected contributions from the 2019 Griffiths School of Management Annual Conference (GSMAC) on Business, Entrepreneurship and Ethics, this book focuses on the role of creativity, technology and ethics in facilitating the transformation organizations need in order to be ready for the future and succeed. Growth and development have always been imperative for people, organizations, and societies and a relevant topic in the management sciences. Globalization, along with dramatic changes in social, cultural, and technological progress, are the main factors that determine the current conditions for development, putting forth a new set of challenges and opportunities that are putting pressure on organisations to adapt. Although technology and creativity seem to be the mantra for success in this new context, issues around the ethics of these two factors also seem to be crucial to the sustainability of growth in organizations. Featuring contributions on topics such as academic marketing, technology in healthcare organizations, ethical issues in hospitality, artificial intelligence and data mining, this book provides research and tools for students, professors, practitioners and policy makers in the fields of business, management, public administration and sociology.*

*Annually published since 1930, the International bibliography of Historical Sciences (IBOHS) is an international bibliography of the most important historical monographs and periodical articles published throughout the world, which deal with history from the earliest to the most recent times. The works are arranged systematically according to period, region or historical discipline, and within this classification alphabetically. The bibliography contains a geographical index and indexes of persons and authors.*

*As various areas of discipline continue to progress into the digital age, diverse modes of technology are being experimented with and ultimately implemented into common practices. Mobile products and interactive devices, specifically, are being tested within educational environments as well as corporate business in support of online learning and e-commerce initiatives. There is a boundless stock of factors that play a role in successfully implementing web technologies and user-driven learning strategies, which require substantial research for executives and administrators in these fields. The Handbook of Research on User Experience in Web 2.0 Technologies and Its Impact on Universities and Businesses is an essential reference source that presents research on the strategic role of user experience in e-learning and e-commerce at the level of the global economy, networks and organizations, teams and work groups, and information systems. The book assesses the impact of e-learning and e-commerce technologies on different organizations, including higher education institutions, multinational corporations, health providers, and business companies. Featuring research on topics such as ubiquitous interfaces, computer graphics, and image processing, this book is ideally designed for program developers and designers, researchers, practitioners, IT professionals, executives, academicians, and students.*

*Cunoscu?i sub diverse denumiri generalizante, evanghelici – o prezen?? relativ recent? în spa?iul românesc – ?i au de fapt r?d?cinile în protestantism, mai precis în Reforma radical?. Din diverse motive, cel mai adesea exterioare acestei minorit??i religioase, studierea în scop ?tiin?ific a comunit??ilor constituite de ei a început destul de târziu, luând amploare abia în postcomunism. Omul evanghelic. O explorare a comunit??ilor protestante române?ti este un volum colectiv în care cititorul interesat va descoperi informa?ii inedite despre istoria ?i identitatea evanghelicilor, despre locul pe care Biblia îl ocup? în via?a lor (fiind abordate ?i elemente de teologie ?i hermeneutic? biblic?), dar ?i despre operele arhitecturale sau literare realizate ori adoptate de aceste comunit??i eclesiale.*

**Existi? Sau doar trăieşti? Cauţi întrebările potrivite sau alergi după răspunsul corect, considerat universal? Te pierzi în regretele trecutului şi fantasmele viitorului, căutând neîncetat punctul central care eşti. ,,Soluţia coliniarităţii. Contrapunct" reliefează sumarul proceselor senzoriale şi cognitive prin detalii extrapolate din trăiri interioare, contexte factuale, înfăţişând concordanţa dintre sistemul uman şi univers. Căutarea şi fuga neîncetată a fiinţei umane poate fi direcţionată înspre sine cu scopul recreării şi al autocreării, prin fundamentul iubirii, al valorilor şi al adevărului. Eşti damnat să trăieşti, dar liber să exişti.**

**Do you exist or do you just live? Are you looking for the right questions or are you running for the correct answer, considered universal? 'Collinearity solution. Counterpoint' emphasizes the summary of cognitive and sensory processes extrapolated from inner feelings, emotions and experiences, highlighting the connection between universe and human being. The constant search and flight of human being can be directed towards himself with the aim of reunification and self-creation, through the foundation of love, values and truth. Chaotic questions, but maybe with meaning, appear incessantly second by second. Did you stop to listen to them? To feel their point of origin? You sought to know how you feel to realize who you are or you think it is superfluous because you already know too much or the nothing is being replaced by sufficiency? You are doomed to live, but free to exist.**

**Fixed Point Theory and Graph Theory provides an intersection between the theories of fixed point theorems that give the conditions under which maps (single or multivalued) have solutions and graph theory which uses mathematical structures to illustrate the relationship between ordered pairs of objects in terms of their vertices and directed edges. This edited reference work is perhaps the first to provide a link between the two theories, describing not only their foundational aspects, but also the most recent advances and the fascinating intersection of the domains. The authors provide solution methods for fixed points in different settings, with two chapters devoted to the solutions method for critically important non-linear problems in engineering, namely, variational inequalities, fixed point, split feasibility, and hierarchical variational inequality problems. The last two chapters are devoted to integrating fixed point theory in spaces with the graph and the use of retractions in the fixed point theory for ordered sets. Introduces both metric fixed point and graph theory in terms of their disparate foundations and common application environments Provides a unique integration of otherwise disparate domains that aids both students seeking to understand either area and researchers interested in establishing an integrated research approach Emphasizes solution methods for fixed points in non-linear problems such as variational inequalities, split feasibility, and hierarchical variational inequality problems that is particularly appropriate for engineering and core science applications**

**After two succesful conferences held in Innsbruck (Prof. Manfred Husty) in 2006 and Cassino in 2008 (Prof Marco Ceccarelli) with the participation of the most important well-known scientists from the European Mechanism Science Community, a further conference was held in Cluj Napoca, Romania, in 2010 (Prof. Doina Pisla) to discuss new developments in the field. This book presents the most recent research advances in Mechanism Science with different applications. Amongst the topics treated are papers on Theoretical kinematics, Computational kinematics, Mechanism design, Mechanical transmissions, Linkages and manipulators, Mechanisms for biomechanics, Micro-mechanisms, Experimental mechanics, Mechanics of robots, Dynamics of multi-body systems, Dynamics of machinery, Control issues of mechanical systems, Novel designs, History of mechanism science etc.**

Food sustainability is essential to the advancement and development of economies and societies worldwide. However, there is an ongoing lack of progress in this field due to the challenge of bridging the gaps between applied science, policy, and society. Agrifood Economics and Sustainable Development in Contemporary Society provides emerging research exploring the theoretical and practical aspects of sustainable rural livelihood and applications within agricultural production. Featuring coverage on a broad range of topics such as green economics, organic farming, and sustainable development from a nature vs. nurture perspective, this book is ideally designed for agricultural researchers, professionals, academicians, policymakers, and farmers seeking current research on sustainability in farming.

This tutorial textbook is an essential companion to using CATIA v5 to assist with computer-aided design. Using clear CAD examples, it demonstrates the various ways through which the potential of this versatile software can be used to aid engineers in 3D modelling. Based on 20 years of teaching experience, the authors present methods of using CATIA v5 to model solid and surface parts, to perform parametric modelling and design of families of parts, reconstruction of surfaces, to create macros and to apply various tools and their op Importantly, this book will also help readers to discover multiple modelling solutions and approaches to solve common issues within design engineering. With a comprehensive approach, this book is suitable for both beginners and those with a good grasp of CATIA v5. Featuring an end chapter with questions and solutions for self-assessment, this book also includes 3D modelling practice problems, presented in the form of 2D engineering drawings of many 3D parts in both orthogonal and isometric views. Using the knowledge gained t chapters, users will learn how to approach surfaces and solids as 3D models using CATIA v5. This book provides detailed explanations, using clear figures, annotations and links to video tutorials. It is an ideal companion for any student or engineer using CATIA v5, in industries including automotive, naval, aerospace and design engineering. Readers of this book should note that the length and distance dimensions are in millimeters and the angular dimensions are in degrees. All other parameters, such as radii, areas and volumes, also This book constitutes revised selected papers from the 15th International Conference on Informatics in Economy, IE 2016, held in Cluj-Napoca, Romania, in June 2016. The 10 full papers and 4 short papers presented in this volume were carefully reviewed and selected from 31 extended paper submissions for this book. They are organized in sections on Distributed Systems, Information Systems Adoption, Knowledge Representation and Processing, Domain-specific Data Analysis, and Computational Models. The volume also contain full-paper length.

Within the framework of tourism companies and tourist destinations, the question of sustainability is gaining importance. Tourists are increasingly aware of the importance of sustainability criteria, awarding greater value to sustainable destinations. Sustainability refers to a wide range of aspects related to climate change, the economic organization of tourism, social values or questions, job creation, and the necessary protection of the culture of destinations and the environment. Therefore, there is a need for studies that consider these a sustainable development of tourist destinations. Fundamental to this is discovering to what degree tourism companies and destinations approach these questions in the strategies they use to deal with problems stemming from their attempts to be more sustainable. Conceptual papers and empirical research on the economic, social, cultural, and environmental aspects related to tourism companies and destinations are welcome. Studies that analyze how these questions and the concept of sustainability are included in tourism companie these modern times. This book was established for these reasons, dedicated to examining sustainability in tourism. The papers included in this Special Issue can help us to determine the new directions being addressed in the research on sustainability tourism.

These two volumes constitute the Proceedings of the 7th International Workshop on Soft Computing Applications (SOFA 2016), held on 24–26 August 2016 in Arad, Romania. This edition was organized by Aurel Vlaicu University of Arad, Romania, University of Belgrade, Serbia, in conjunction with the Institute of Computer Science, Iasi Branch of the Romanian Academy, IEEE Romanian Section, Romanian Society of Control Engineering and Technical Informatics (SRAIT) - Arad Section, General Association of Engineers in Romania BTM Resources Arad. The soft computing concept was introduced by Lotfi Zadeh in 1991 and serves to highli ght the emergence of computing methodologies in which the accent is on exploiting the tolerance for imprecision and uncertainty to achieve tractability, robustness and lower costs. Soft computing facilitates the combined use of fuzzy logic, neurocomputing, evolutionary computing and probabilistic computing, leading to the concept of hybrid intelligent systems. The rapid emergence of new tools and applications calls for a syne technological disciplines in order to reveal the great potential of soft computing in all domains. The conference papers included in these proceedings, published post-conference, were grouped into the following areas of research: • Methods and Applications in Electrical Engineering • Knowledge-Based Technologies for Web Applications, Cloud Computing, Security Algorithms and Computer Networks • Biomedical Applications • Image, Text and Signal Processing • Machine Learning and Applications • Business Process Management • Theory and Fuzzy Control • Computational Intelligence in Education • Soft Computing & Fuzzy Logic in Biometrics (SCFLB) • Soft Computing Algorithms Applied in Economy, Industry and Communication Technology • Modelling and Applications in Textiles The book helps to disseminate advances in selected active research directions in the field of soft computing, along with current issues and applications of related topics. As such, it provides valuable information for professors, researchers and graduate students in the area of soft cor applications.

***In today's rapidly evolving world, it has never been more critical to consider key environmental issues such as climate change, pollution, and endangered species. Society faces an unknown future where the fate of the environment is continuously in flux based on current preservation initiatives that governments develop. In order to ensure the world is protected moving forward, further study on the importance of securing environments, ecosystems, and species is necessary to successfully implement change. The Research Anthology on Ecosystem Conservation and Preserving Biodiversity considers the best practices and strategies for protecting our current ecosystems as well as the potential ramifications of failing to implement policies. Society is at a crossroads where if we continue to ignore the danger and warning signs brought about by environmental issues, we will be unable to maintain a healthy environment. Covering essential topics such as extinction, climate change, and pollution, this major reference work is ideal for scientists, industry professionals, researchers, academicians, policymakers, scholars, practitioners, instructors, and students.***
