**Advanced Practice and Leadership in Radiology Nursing** - Kathleen A. Gross 2019-12-16

Endorsed by the Association of Radiologic and Imaging Nursing (ARIN), this first of a kind comprehensive radiology nursing textbook fills a gap by addressing important subjects for patient care and professional issues, as well as, future possibilities affecting nursing practice. It serves as a resource to related nursing specialties, e.g. critical care, emergency or peri-anesthesia, and to radiologic technologists and physician
assistants. The book could be used as one resource for studying for radiologic nursing certification. The textbook is subdivided into five sections that address advanced practice and leadership roles, clinical patient care topics, safety topics, including legal considerations, e.g. infection prevention and equipment. It includes a section with topics impacting the patient experience and a section on professional topics, e.g. cybersecurity, social media, research/outcomes, interprofessional collaboration, workplace violence and current trends in imaging. The authors include advanced practice providers, radiology nurse managers, educators, physicians, a physicist, a dentist, attorneys, a child life specialist, administrators and a social worker. Radiology diagnostic examinations and therapeutic procedures have become a more prominent part of patient care due to advances in technology and the ability of radiology to provide services that were traditionally done in surgery or not done because of limited knowledge. Many procedures are facilitated by the radiology nurse from initial consult to transfer to a hospital unit or discharge and follow-up. Nurses assess, monitor, administer sedation/other medications and respond to emergencies. They serve as educators, researchers, and resource personnel to the radiology department and in many instances, to the entire facility. Radiology nurses are real leaders. In order to keep up-to-date on new developments, nurses need new literature to support their clinical expertise and leadership. This book is an unparalleled resource, written by experts in their areas of interest.

Collectively, they boast 1,091 years of practice, diverse certifications, and numerous degrees. Some have just begun their practice and others have worked as nurses for half a century or more. Read how we have earned the true credentials needed to provide care for strangers, family members, and each other. Learn how we have earned the academic and honorary titles required to lead each other in our profession. The stories we have collected here cover the moment each contributor knew he or she was to become a nurse, what was learned (and what was not) in nursing school, and unforgettable patients and colleagues. But this book is about more than the sum of all of the parts that
make up our nursing trajectories. It is about the process of becoming and being a nursing colleague. Filled with professionals who have earned their distinction as leaders in practice and healers in their communities, it is rumination on what it means to care. It is also a thank you to a line of work that has given us so much.
