NEW YORK TIMES BESTSELLER • The “exquisitely researched and deeply engrossing” (The New York Times) true survival story of an early polar expedition that went terribly awry—with the ship frozen in ice and the crew trapped inside for the entire sunless, Antarctic winter “The energy of the narrative never flags. . . . Sancton has produced a thriller.”—The Wall Street Journal In August 1897, the young Belgian commandant Adrien de Gerlache set sail for a three-year expedition aboard the good ship Belgica with dreams of glory. His destination was the uncharted end of the earth: the icy continent of Antarctica. But de Gerlache’s plans to be first to the magnetic South Pole would swiftly go awry. After a series of costly setbacks, the commandant faced two bad options: turn back in defeat and spare his men the devastating Antarctic winter, or recklessly chase fame by sailing deeper into the freezing waters. De Gerlache sailed on, and soon the Belgica was stuck fast in the icy hold of the Bellingshausen Sea. When the sun set on the magnificent polar landscape one last time, the ship’s occupants were condemned to months of endless night. In the darkness, plagued by a mysterious illness and besieged by monotony, they descended into madness. In *Madhouse at the End of the Earth*, Julian Sancton unfolds an epic story of adventure and horror for the ages. As the Belgica’s men teetered on the brink, de Gerlache relied increasingly on two young officers whose friendship had blossomed in captivity: the expedition’s lone American, Dr. Frederick Cook—half genius, half con man—whose later infamy would overshadow his brilliance on the Belgica; and the ship’s first mate, soon-to-be legendary Roald Amundsen, even in his youth the storybook picture of a sailor. Together, they would plan a last-ditch, nearly certain-to-fail escape from the ice—one that would either etch their names in history or doom them to a terrible fate at the ocean’s bottom. Drawing on the diaries and journals of the Belgica’s crew and with exclusive access to the ship’s logbook, Sancton brings novelistic flair to a story of human extremes, one so remarkable that even today NASA studies it for research on isolation for future missions to Mars. Equal parts maritime thriller and gothic horror, *Madhouse at the End of the Earth* is an unforgettable journey into the deep.

“And I tell you, if you have the desire for knowledge and the power to give it physical expression, go out and explore,” wrote Apsley Cherry-Garrard in the opening chapters of his now classic exploration narrative, *The Worst Journey in the World*. The incredible tale that he tells is of the fated last voyage of Captain Robert Scott and his crew to the outermost reaches of the South Pole on the Terra Nova. Chronicling the journey of the Terra Nova from England in 1910 to New Zealand in 1913, *The Worst Journey in the World* vividly describes the entirety of Scott’s harrowing and tragic final expedition. Driven by a lust to investigate the untold scientific knowledge contained within the South Pole, these courageous pioneers embarked on a journey into previously unexplored territory, subjecting themselves to the ultimate physical and mental limits as they traveled the massive expanses of the icy tundra. Cherry-Garrard was a key member of the Terra Nova crew that, in addition to the desire to uncover scientific data, desperately sought to be the first Europeans to reach the South Pole. But the expedition was thwarted at every turn by punishing weather, extreme bad luck, and the intense physical and mental decline of the crew on the final stages of their journey. Confronted by the shattering knowledge that rival explorer Roald Amundsen had reached the South Pole only a few weeks before them, Scott’s team then had to negotiate the last stage of their voyage, a doomed attempt which has no equal in peril, disaster, and tragedy. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history—books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home. Milo Weaver is unwillingly drawn into his bosses’ plans for revenge against the Chinese agent who orchestrated the deaths of 33 tourists. Steinhauer, the best espionage writer in a generation, delivers a searing international thriller.

“Intriguing [and] enjoyable.” —Ian McGuire, New York Times Book Review *Ice Ghosts* weaves together the epic story of the lost Franklin Expedition of 1845—whose two ships, HMS Erebus and HMS Terror, and their crew of 129 were lost to the Arctic ice—with the modern tale of the scientists, divers, and local Inuit behind the recent incredible discoveries of the wrecks. Paul Watson, a Pulitzer Prize-winning journalist who was on the icebreaker that led one of the discovery expeditions, tells a fast-paced historical adventure story and reveals how a combination of faith in Inuit knowledge and the latest science yielded a discovery for the ages.

The definitive story of the British adventurers who survived the trenches of World War I and went on to risk their lives climbing Mount Everest. On June 6, 1924, two men set out from a camp perched at 23,000 feet on an ice ledge just below the lip of Everest’s North Col. George Mallory, thirty-seven, was Britain’s finest climber. Sandy Irvine was a twenty-two-year-old Oxford scholar with little previous mountaineering experience. Neither of them returned. Drawing on more than a decade of prodigious research, bestselling author and explorer Wade Davis vividly re-creates the heroic efforts of Mallory and his fellow climbers, setting their significant achievements in sweeping historical context: from Britain’s nineteenth-century imperial ambitions to the war that shaped Mallory’s generation. Theirs was a country broken, and the Everest expeditions emerged as a powerful symbol of national redemption and hope. In Davis’s rich exploration, he creates a

timeless portrait of these remarkable men and their extraordinary times.

Winner of First Place for Adult Genre Novels, awarded by the Pacific Northwest Writers Association. Tepui is an "intelligent, cutting edge" tale of adventure, intrigue, and forbidden love. In 1559, forty-nine Spaniards exploring a tributary of the Orinoco River reached a sheer-sided, cloud-capped mountain called Tepui Zupay. When they tried to climb it, all but six of them were slaughtered by Amazons. Or so claimed Friar Sylvestre, the expedition's chronicler. But Sylvestre made many bizarre claims: rivers of blood, plants that lead to gold. Jerry Pace, a burn-scarred botanist struggling for tenure at UCLA, thinks the friar was high on mushrooms. Jerry's best friend, the historian who just acquired Sylvestre's journal, disagrees. He plans to retrace the expedition's footsteps, and wants Jerry to come with him. Jerry refuses, until he spots a stain between the journal's pages—a stain that could only have been left by a plant that died out with the dinosaurs. Now he has to find that plant. But the Venezuelan wilderness does not forgive intruders. Battered and broken, they reach a remote Catholic orphanage where the old prioress warns of death awaiting any who would venture farther. But an exotic Indian girl leads them on, through piranha-infested rivers and jungles teeming with poisonous plants, to Tepui Zupay—the forbidden mountain no outsider has set eyes on since the Spaniards met their doom. This is a story about life's surprises—the challenges, risks—and how they transform us. It is also a tale of Beauty and the Beast and the eye of the beholder. A master class in strategic thinking, distilled from the legendary program the author has co-taught at Yale for decades. For almost two decades, Yale students have competed for admission each year to the "Studies in Grand Strategy" seminar taught by John Lewis Gaddis, Paul Kennedy, and Charles Hill. Its purpose has been to prepare future leaders for responsibilities they will face, through lessons drawn from history and the classics. Now Gaddis has distilled that teaching into a succinct, sharp and potentially transformational book, surveying statecraft from the ancient Greeks to Franklin D. Roosevelt and beyond. An unforgettable guide to the art of leadership, *On Grand Strategy* is, in every way, its own master class.

*****NPR Books We Love 2021 selection***** "If you're only going to read one Everest book this decade, make it *The Third Pole*. . . . A riveting adventure."—*Outside* Shivering, exhausted, gasping for oxygen, beyond doubt . . . A hundred-year mystery lured veteran climber Mark Synnott into an unlikely expedition up Mount Everest during the spring 2019 season that came to be known as "the Year Everest Broke." What he found was a gripping human story of impassioned characters from around the globe and a mountain that will consume your soul—and your life—if you let it. The mystery? On June 8, 1924, George Mallory and Sandy Irvine set out to stand on the roof of the world, where no one had stood before. They were last seen eight hundred feet shy of Everest's summit still "going strong" for the top. Could they have succeeded decades before Sir Edmund Hillary and Tenzing Norgay? Irvine is believed to have carried a Kodak camera with him to record their attempt, but it, along with his body, had never been found. Did the frozen film in that camera have a photograph of Mallory and Irvine on the summit before they disappeared into the clouds, never to be seen again? Kodak says the film might still be viable. . . . Mark Synnott made his own ascent up the infamous North Face along with his friend Renan Ozturk, a filmmaker using drones higher than any had previously flown. Readers witness first-hand how Synnott's quest led him from oxygen-deprivation training to archives and museums in England, to Kathmandu, the Tibetan high plateau, and up the North Face into a massive storm. The infamous traffic jams of climbers at the very summit immediately resulted in tragic deaths. Sherpas revolted. Chinese officials turned on Synnott's team. An Indian woman miraculously crawled her way to frostbitten survival. Synnott himself went off the safety rope—one slip and no one would have been able to save him—committed to solving the mystery. Eleven climbers died on Everest that season, all of them mesmerized by an irresistible magic. *The Third Pole* is a rapidly accelerating ride to the limitless joy and horror of human obsession.

Marco Polo was hardly the only European merchant or trader who traveled to the Far East, but it was his written account of his travels that would generate extreme interest in Asia. Having described such a rich land full of desired resources, Marco Polo's travels became a source for European cartographers of the era, and they became the impetus for men like Christopher Columbus, who added his own annotations to Marco Polo's account and used it as a reference for his own legendary expedition in search of the Far East. Centuries later, historians have scoured over the account and what was written in an effort to validate its authenticity, leading to sharp debates today. The most seminal event of the last millennium might also be its most controversial. As schoolchildren have been taught for

over 500 years, "In 1492 Columbus sailed the ocean blue." In October of that year, the Italian Christopher Columbus immortalized himself by landing in the New World and beginning the process of European settlement in the Americas for Spain, bringing the Age of Exploration to a new hemisphere with him. Ironically, the Italian had led a Spanish expedition, in part because the Portugese rejected his offers in the belief that sailing west to Asia would take too long. Today Ferdinand Magellan is remembered as the first man to circumnavigate the globe, an ironic legacy given that he died half a world away from completing that journey. But though it ended catastrophically for Magellan and most of his crew, his expedition accomplished its objective, and in economic terms, the opening up of new trade routes with Asia was a more significant development than the conquest of the Americas for the Europeans of the early 16th century. The life of Sir Francis Drake, or, more precisely, the tale of it, is one of those prime examples that history is written by the winners. Drake was the most famous sailor of the Elizabethan Era, and he has long been considered a hero by the English. His successes against the Spanish as a captain and a privateer were legendary, and Drake was celebrated for fighting the Queen's enemies, sinking their ships, and capturing the treasure that would otherwise be used to finance attacks on England. Drake vigorously pursued every mission given to him by Elizabeth I, and brought all his skill, experience and training to bear against her enemies. He was recognized at court for his valor, praised in story and song, and remembered for the kind of personality and esprit de corps that the English have long desired and celebrated in their military heroes.

Just Keep Rowing is a self-empowerment book written by Katie and co-author, Mark Bowles, with 70 life lessons that parallel the number of days Katie spent alone at sea rowing across the Atlantic Ocean. The book is a personal conversation between you and Katie. During her journey she learned many vital life lessons from the Atlantic. As she found out, an ocean is a great teacher of the meaning of life. Katie became its student, sometimes reluctantly but often enthusiastically, and she wants to communicate these lessons because she believes they can be valuable for everyone. From students to business executives, and to people just wanting to find new ways to live life to the fullest, these lessons from the Atlantic will help you see the world from a new perspective.

The Essential W. S. Merwin

An atmospheric, transporting tale of adventure, love, and survival from the bestselling author of *The Snow Child*, finalist for the Pulitzer Prize. In the winter of 1885, decorated war hero Colonel Allen Forrester leads a small band of men on an expedition that has been deemed impossible: to venture up the Wolverine River and pierce the vast, untamed Alaska Territory. Leaving behind Sophie, his newly pregnant wife, Colonel Forrester records his extraordinary experiences in hopes that his journal will reach her if he doesn't return--once he passes beyond the edge of the known world, there's no telling what awaits him. The Wolverine River Valley is not only breathtaking and forbidding but also terrifying in ways that the colonel and his men never could have imagined. As they map the territory and gather information on the native tribes, whose understanding of the natural world is unlike anything they have ever encountered, Forrester and his men discover the blurred lines between human and wild animal, the living and the dead. And while the men knew they would face starvation and danger, they cannot escape the sense that some greater, mysterious force threatens their lives. Meanwhile, on her own at Vancouver Barracks, Sophie chafes under the social restrictions and yearns to travel alongside her husband. She does not know that the winter will require as much of her as it does her husband, that both her courage and faith will be tested to the breaking point. Can her exploration of nature through the new art of photography help her to rediscover her sense of beauty and wonder? The truths that Allen and Sophie discover over the course of that fateful year change both of their lives--and the lives of those who hear their stories long after they're gone--forever. "An epic adventure story that seems heir to the tradition of Melville's own sweeping and ambitious literary approach to the age-old struggle of humans versus nature . . . American Book Award Winner: A "moving, intimate" account of serving as a translator for undocumented children facing deportation (*The New York Times Book Review*). Nonfiction Finalist for the Kirkus Prize Finalist for National Book Critics Circle Award for Criticism Structured around the forty questions volunteer worker Valeria Luiselli translates from a court system form and asks undocumented Latin American children facing deportation, *Tell Me How It Ends* humanizes these young migrants and highlights the contradiction between the idea of America as a fiction for immigrants and the reality of racism and fear—here and back home. "Luiselli's prose is always lush and astute, but this long essay, which borrows its framework from questions on the cold, bureaucratic work sheets with which she became so familiar (for example, 'Did anything happen on your trip to the U.S. that scared or hurt you?'), is teeming with urgency...In this slim volume about the spectacular failure of the American Dream, she tells the stories of the unnamed children she's encountered and their fears and desires, as well as her own family's immigration story." —*Vulture* "Worthy of inclusion in a great American (and international) canon of writing about migration." —*Texas Observer* "A powerful indictment of American immigration policy, [*Tell Me How It Ends*] examines a system that has failed child refugees in particular." —*Financial Times* "Masterfully blends journalism, auto/biography, and political history into a compelling and cohesive narrative. . . . Luiselli uses the personal to get political but smartly sidesteps identity politics to focus on policy instead." —*The Rumpus*

*Includes pictures of important people, places, and events. *Includes passages from the journals of Lewis and Clark. *Explains Sacagawea's role in the expedition and the legends of her life and death. *Includes a Bibliography for further reading. "Your woman who accompanied you that long dangerous and fatiguing rout to the Pacific Ocean and back deserved a greater reward for her attention and services on that rout than we had in our power to give her at the Mandans." - William Clark in a letter to Sacagawea's husband "Ocean in view! O! The Joy!" - William Clark, journal entry dated November 7, 1805 It is the most fabled and storied journey in American history. From 1804-1806, the first expedition across the North American continent was commissioned by President Thomas Jefferson, who had recently bought a vast swath of territory from France. Though he knew he had bought a huge amount of land, Jefferson wasn't entirely sure of what he had bought, so he asked a team led by Meriwether Lewis and William Clark to traverse the continent until they reached the Pacific, studying everything from the ecology to geography along the way to get an understanding of the country's new region. Lewis and Clark would find far more than they bargained for. The 33 members who made the trip came into contact with about two dozen Native American tribes, many of whom helped the men survive the journey. Though they suffered deaths on their way west, the group ultimately reached the Pacific coast and got back to St. Louis in 1806, having drawn up nearly 150 maps and giving America a good idea of much of what lay west. Sacagawea is one of the most famous Native American women in American history, and few played such a central role in the settlement of the West for the young nation. As a young woman who was married to a French trapper from Quebec, Sacagawea happened to be in the right place at the right time for the legendary Lewis and Clark expedition, which set off for the Pacific coast after President Thomas Jefferson negotiated the Louisiana Purchase with France. The young Shoshone girl acted as a guide and interpreter for the expedition, helping it safely travel thousands of miles west from North Dakota to the Pacific over unfamiliar ground and amongst unfamiliar peoples. Put simply, the expedition could not have succeeded without her. Sacagawea's role in the Lewis and Clark expedition made her a national figure, and she continued to be popularized in literature and even among groups advocating for women's rights. Sacagawea is still taught to every American in school and stands alongside Pocahontas as the most famous Native American women, even though few people knew much about her life aside from her role in the trek. For that reason, few truly know about her life, her tribe, or her death, the latter of which is still controversial. At the same time, given the history and conflicts between the United States and various Native American tribes during the 19th century, Sacagawea's role in helping the nation push westward at the expense of Native Americans has taken on a more mixed and controversial character. Sacagawea and the Lewis & Clark Expedition profiles the lives, legends, and legacies of the famous explorers and their expedition, Along with excerpts from contemporary accounts, a bibliography and pictures of important people, places, and events, you will learn about the Lewis & Clark Expedition like you never have before, in no time at all.

The authoritative account of the rise of Amazon and its intensely driven founder, Jeff Bezos, praised by the Seattle Times as "the definitive account of how a tech icon came to life." Amazon.com started off delivering books through the mail. But its visionary founder, Jeff Bezos, wasn't content with being a bookseller. He wanted Amazon to become the everything store, offering limitless selection and seductive convenience at disruptively low prices. To do so, he developed a corporate culture of relentless ambition and secrecy that's never been cracked. Until now. Brad Stone enjoyed unprecedented access to current and former Amazon employees and Bezos family members, giving readers the first in-depth, fly-on-the-wall account of life at Amazon. Compared to tech's other elite innovators -- Jobs, Gates, Zuckerberg -- Bezos is a private man. But he stands out for his restless pursuit of new markets, leading Amazon into risky new ventures like the Kindle and cloud computing, and transforming retail in the same way Henry Ford revolutionized manufacturing. The Everything Store is the revealing, definitive biography of the company that placed one of the first and largest bets on the Internet and forever changed the way we shop and read.

The essential guidebook

Reviving a classic tale ahead of its time, this new edition sheds light on one of the most prescient stories in science fiction. A 19th-century novel looking beyond the present day, the narrative centers on the year 2000, when Earth's corporations are using science to improve the quality of life. In an effort to seek out other planets to house the ever-increasing human population, the crew of the anti-gravity spaceship Callisto embarks on a trip to Jupiter, Saturn, and beyond, encountering wild landscapes, dangerous beasts, and ultimately, the destiny of mankind. Conducting a fascinating tour of outer space, this is an adventure rooted in scientific explanation.

Winner of the Sierra Club's 2021 Rachel Carson Award One of Chicago Tribune's Ten Best Books of 2021 Named a Top Ten Best Science Book of 2021 by Booklist and Smithsonian Magazine "At once thoughtful and thought-provoking," Beloved Beasts tells the story of the modern conservation movement through the lives and ideas of the people who built it, making "a crucial addition to the literature of our troubled time" (Elizabeth Kolbert, author of *The Sixth Extinction*). In the late nineteenth century, humans came at long last to a devastating realization: their rapidly industrializing and globalizing societies were driving scores of animal species to extinction. In *Beloved Beasts*, acclaimed science journalist Michelle Nijhuis traces the history of the movement to protect and conserve other forms of life. From early battles to save charismatic species such as the American bison and bald eagle to today's global effort to defend life on a larger scale, Nijhuis's "spirited and engaging" account documents "the changes of heart that changed history" (Dan Cryer, *Boston Globe*). With "urgency, passion, and wit" (Michael Berry, *Christian Science Monitor*), she describes the vital role of scientists and activists such as Aldo Leopold and Rachel Carson, reveals the origins of vital organizations like the Audubon Society and the World Wildlife Fund, explores current efforts to protect species such as the whooping crane and the black rhinoceros, and confronts the darker side of modern conservation, long shadowed by racism and colonialism. As the destruction of other species continues and the effects of climate change wreak havoc on our world, *Beloved Beasts* charts the ways conservation is becoming a movement for the protection of all species including our own.

A New York Times Notable Book of the Year “Brilliantly breathes life not only into the perils of living at sea, but also into the hidden dangers of domesticity, parenthood, and marriage. What a smart, swift, and thrilling novel.” —Lauren Groff, author of *Florida* Juliet is failing to juggle motherhood and her stalled-out dissertation on confessional poetry when her husband, Michael, informs her that he wants to leave his job and buy a sailboat. With their two kids—Sybil, age seven, and George, age two—Juliet and Michael set off for Panama, where their forty-four foot sailboat awaits them. The initial result is transformative; the marriage is given a gust of energy, Juliet emerges from her depression, and the children quickly embrace the joys of being at sea. The vast horizons and isolated islands offer Juliet and Michael reprieve – until they are tested by the unforeseen. A transporting novel about marriage, family and love in a time of unprecedented turmoil, *Sea Wife* is unforgettable in its power and astonishingly perceptive in its portrayal of optimism, disillusionment, and survival.

NEW YORK TIMES BESTSELLER The complete, uncensored history of the award-winning *The Daily Show* with Jon Stewart, as told by its correspondents, writers, and host. For almost seventeen years, *The Daily Show* with Jon Stewart brilliantly redefined the borders between television comedy, political satire, and opinionated news coverage. It launched the careers of some of today's most significant comedians, highlighted the hypocrisies of the powerful, and garnered 23 Emmys. Now the show's behind-the-scenes gags, controversies, and camaraderie will be chronicled by the players themselves, from legendary host Jon Stewart to the star cast members and writers-including Samantha Bee, Stephen Colbert, John Oliver, and Steve Carell - plus some of *The Daily Show*'s most prominent guests and adversaries: John and Cindy McCain, Glenn Beck, Tucker Carlson, and many more. This oral history takes the reader behind the curtain for all the show's highlights, from its origins as Comedy Central's underdog late-night program to Trevor Noah's succession, rising from a scrappy jester in the 24-hour political news cycle to become part of the beating heart of politics-a trusted source for not only comedy but also commentary, with a reputation for calling bullshit and an ability to effect real change in the world. Through years of incisive election coverage, passionate debates with President Obama and Hillary Clinton, feuds with Bill O'Reilly and Fox, and provocative takes on Wall Street and racism, *The Daily Show* has been a cultural touchstone. Now, for the first time, the people behind the show's seminal moments come together to share their memories of the last-minute rewrites, improvisations, pranks, romances, blow-ups, and moments of Zen both on and off the set of one of America's most groundbreaking shows.

The Versailles Treaty after WWI "Mandated Islands" in the Pacific to the Japanese. President Roosevelt felt the Japanese were illegally installing military fortification on these "Mandated Islands" which was in direct violation of the WWI Treaty. Amelia Earhart, a popular female pilot who set many aviation records, wanted to increase her popularity by flying around-the-world. This would be a huge accomplishment that no pilot, man or woman, had attempted before. She left California, March 17, 1937, in a twin-engine Lockheed Electra and flew to Honolulu on the first leg of her historic flight with Fred Noonan and Harry Manning as her navigators. Unfortunately, she crashed on take-off and her Electra was so badly damaged, it had to be shipped back to the Lockheed plant in California for repairs. Amelia and her publisher husband, George Putnam didn't have the money to repair her Electra and make another attempt to fly around-the-world, so Mr. Putnam approached President Roosevelt and asked if the U.S. government could help? FDR had met Amelia previously and knew of her plans to fly around-the-world. In 1937, FDR believed the Japanese were illegally preparing for war on "Mandated" islands in the Pacific. Marine Colonel Earl Ellis tried to sneak into Truk Atoll to gather information, but was caught on the island of Palau and killed. FDR believed that maybe a civilian pilot who was going to fly around-the-world might have a better chance to obtain the information he needed, so agreed to help Amelia on her request. But, FDR only did so, if Amelia would agree to take a few pictures of Japanese island fortifications along the way. Although a staunch 'pacifist' Amelia agreed to the president's stipulations. The U.S. government helped plan her second attempt, provided her plane with larger engines, installed additional fuel tanks and reconnaissance cameras, but did so with little fanfare or publicity. Instead of flying from East to West as she planned on her first attempt, she flew West to East with only Fred Noonan as her navigator. Prior to her flight it's reported she was sworn into the Army Air Force as an officer and confided to a friend, "Imagine me being a spy!" Amelia left California on May 21st and headed for Miami, Puerto Rico, Brazil, Africa, India, Bangkok, Singapore and Dutch East Indies, where Mr. F.O. Furman, a Lockheed maintenance specialist, met Amelia and checked her Electra and cameras for 3-days. At each stop, 55-gallon drums of fuel would be waiting for her, even if she flew into a field that was not on her announced itinerary. She and Fred Noonan left Lae, New Guinea on July 1st, 1937 and headed for Howland Island, 2,556 miles away. The Coast Guard Cutter ITASCA waited just off Howland to handle all communications as she approached. Unfortunately, when Harry Manning was the designated navigator on her first attempt, he arranged for Navy ships to communicate with her in Morse Code. No one told the Navy vessels that Manning was no longer her navigator. Neither Amelia or Fred could read Morse Code! Amelia Earhart's *Final Flight* tells the story of how she crashed on Mili Atoll in the Marshall Islands, was captured by the Japanese, taken to Saipan where she was held in prison for several years before being killed. Eye-witnesses in the Marshall Islands and on Saipan provided the true accounts of what actually happened to Amelia on her historic flight, what happened when she was captured, how she was killed and reaction by U.S. and Japanese leaders. It also relates how U.S. Marines found Amelia's briefcase and also found her Electra on Saipan when they attacked in 1944. David O'Malley, a member of the Writers Guild, wrote an interesting screenplay that's based on these eye-witness reports. It gives a rational explanation why both the U.S. and Japan have kept Amelia's capture and death a secret since her *Final Flight*.

On the Edge is an engaging leadership manual that provides concrete insights garnered from various extreme environments ranging from Mt Everest to the South Pole. By reflecting on the lessons learned from her various expeditions, author Alison Levine makes the case that the leadership principles that apply in extreme adventure sport also apply in today's extreme business environments. Both settings require you to be able to make crucial decisions on the spot when the conditions around you are far from perfect. Your survival -and the survival of your team-depend on it. On the Edge provides a framework to help people scale whatever big peaks they aspire to climb-be they literal or figurative-by offering practical, humorous, and often unorthodox advice about how to grow as a leader.

An electrifying story of the sensational murder trial that divided a city and ignited the civil rights struggle In 1925, Detroit was a smoky swirl of jazz and speakeasies, assembly lines and fistfights. The advent of automobiles had brought workers from around the globe to compete for manufacturing jobs, and tensions often flared with the KKK in ascendance and violence rising. Ossian Sweet, a proud Negro doctor-grandson of a slave-had made the long climb from the ghetto to a home of his own in a previously all-white neighborhood. Yet just after his arrival, a mob gathered outside his house; suddenly, shots rang out: Sweet, or one of his defenders, had accidentally killed one of the whites threatening their lives and homes. And so it began-a chain of events that brought America's greatest attorney, Clarence Darrow, into the fray and transformed Sweet into a controversial symbol of equality. Historian Kevin Boyle weaves the police investigation and courtroom drama of Sweet's murder trial into an unforgettable tapestry of narrative history that documents the volatile America of the 1920s and movingly re-creates the Sweet family's journey from slavery through the Great Migration to the middle class. Ossian Sweet's story, so richly and poignantly captured here, is an epic tale of one man trapped by the battles of his era's changing times. Arc of Justice is the winner of the 2004 National Book Award for Nonfiction.

The inner workings of a writer's life, the interplay between experience and writing, are brilliantly recounted by a master of the art. Gay Talese now focuses on his own life—the zeal for the truth, the narrative edge, the sometimes startling precision, that won accolades for his journalism and best-sellerdom and acclaim for his revelatory books about The New York Times (The Kingdom and the Power), the Mafia (Honor Thy Father), the sex industry (Thy Neighbor's Wife), and, focusing on his own family, the American immigrant experience (Unto the Sons). How has Talese found his subjects? What has stimulated, blocked, or inspired his writing? Here are his amateur beginnings on his college newspaper; his professional climb at The New York Times; his desire to write on a larger canvas, which led him to magazine writing at Esquire and then to books. We see his involvement with issues of race from his student days in the Deep South to a recent interracial wedding in Selma, Alabama, where he once covered the fierce struggle for civil rights. Here are his reflections on the changing American sexual mores he has written about over the last fifty years, and a striking look at the lives—and their meaning—of Lorena and John Bobbitt. He takes us behind the scenes of his legendary profile of Frank Sinatra, his writings about Joe DiMaggio and heavyweight champion Floyd Patterson, and his interview with the head of a Mafia family. But he is at his most poignant in talking about the ordinary men and women whose stories led to his most memorable work. In remarkable fashion, he traces the history of a single restaurant location in New York, creating an ethnic mosaic of one restaurateur after the other whose dreams were dashed while a successor's were born. And as he delves into the life of a young female Chinese soccer player, we see his consuming interest in the world in its latest manifestation. In these and other recollections and stories, Talese gives us a fascinating picture of both the serendipity and meticulousness involved in getting a story. He makes clear that every one of us represents a good one, if a writer has the curiosity to know it, the diligence to pursue it, and the desire to get it right. Candid, humorous, deeply impassioned—a dazzling book about the nature of writing in one man's life, and of writing itself.

NASA discovered the alien ship lurking in the asteroid belt in the 1960s. They kept the Target under intense surveillance for decades, letting the public believe they were exploring the solar system, while they worked feverishly to refine the technology needed to reach it.

"This is a delightful and funny adventure ... It is also lonely, dangerous and frightening."—THE LONDON TIMES He survived a terrifying crocodile attack off Australia's Queensland coast, blood poisoning in the middle of the Pacific, malaria in Indonesia and China, and acute mountain sickness in the Himalayas. He was hit by a car and left for dead with two broken legs in Colorado, and incarcerated for espionage on the Sudan-Egypt border. The first in a thrilling adventure trilogy, *Dark Waters* charts one of the longest, most gruelling, yet uplifting and at times irreverently funny journeys in history, circling the world using just the power of the human body, hailed by the *London Sunday Times* as "The last great first for circumnavigation." But it was more than just a physical challenge. Prompted by what scientists have dubbed the "perfect storm" as the global population soars to 8.3 billion by 2030, adventurer Jason Lewis used *The Expedition* to reach out to thousands of schoolchildren, calling attention to our interconnectedness and shared responsibility of an inhabitable Earth for future generations. * * WINNER of the BENJAMIN FRANKLIN AWARD & ERIC HOFFER AWARD * * "Often funny and irreverent, always frank and authentic, Lewis's first volume of *The Expedition* series is also marked by the thrills of a first-rate adventure."—FOREWORD REVIEWS "Skating through Alabama with long hair, duct tape on the nipples, and women's culottes ... What were you thinking?"—JAY LENO, *The Tonight Show* "A riveting true-life adventure as inspiring as it is thrilling."—UTNE READER "An extraordinary expedition on an epic scale."—BEN FOGLE, television presenter and adventurer "Last great first for circumnavigation."—THE SUNDAY TIMES "Truly a tale for our time. You really smell, taste and breathe this journey in a way that is only possible by travelling more slowly."—ROYAL SCOTTISH GEOGRAPHICAL SOCIETY
