*This book shows the effectiveness of multiregional demography for studying the spatial dynamics of migration and population redistribution. It examines important questions in demographic analysis and shows how the techniques of multiregional analysis can lead to answers that sometimes contradict conventional wisdom. The book reconsiders conclusions reached in the literature regarding several fundamental common sense demographic questions in migration and population redistribution, including: Is it mostly migration or "aging-in-place" that has been driving Florida's elderly population growth? Do the elderly return "home" after retirement more than the non-elderly do? Does longer life lead to longer ill-health? Do simple population projection models outperform complex ones? For each demographic question it considers, the book begins with a simple empirical numerical example and with it illustrates how a uniregional specification can bias findings to favor a particular, and possibly incorrect, conclusion. It then goes on to show how a multiregional analysis can better illuminate the dynamics that underlie the observed population totals and lead to a more informed conclusion. Offering insights into the effectiveness of multiregional demography, this book serves as a valuable resource for students and researchers searching for a better way to answer questions in demographic analysis and population dynamics.*

**Unconventional Oil and Gas Resources Handbook: Evaluation and Development is a must-have, helpful handbook that brings a wealth of information to engineers and geoscientists. Bridging between subsurface and production, the handbook provides engineers and geoscientists with effective methodology to better define resources and reservoirs. Better reservoir knowledge and innovative technologies are making unconventional resources economically possible, and multidisciplinary approaches in evaluating these resources are critical to successful development. Unconventional Oil and Gas Resources Handbook takes this approach, covering a wide range of topics for developing these resources including exploration, evaluation, drilling, completion, and production. Topics include theory, methodology, and case histories and will help to improve the understanding.integrated evaluation, and effective development of unconventional resources. Presents methods for a full development cycle of unconventional resources, from exploration through production Explores multidisciplinary integrations for evaluation and development of unconventional resources and covers a broad range of reservoir characterization methods and development scenarios Delivers balanced information with multiple contributors from both academia and industry Provides case histories involving geological analysis, geomechanical analysis, reservoir modeling, hydraulic fracturing treatment, microseismic monitoring, well performance and refracturing for development of unconventional reservoirs**

**As the information landscape evolves and takes shape using traditional and new platforms, it is the role of Academic Libraries to take the lead in communicating, developing and informing these changes in timely and relevant ways. Experienced librarians and those new to the field seek out innovative and more effective way to engage with users and stakeholders. This book provides a variety of communication strategies for different user groups, taking into account the changing information landscape and the application and implications of social media developments. A major driver in higher education is the change in the scholarly communication model where initiatives such as Open Access, Institutional Repositories and Data Management are challenging previous practice whilst offering new opportunities for leadership. These communication developments provide opportunities for academic librarians who need the insight and awareness to take these chances. Librarian as Communicator provides research-based explorations of the above topics, covering developing areas and also the communication skills that are needed for the academic library to have a continuing role in the 21st Century. It was originally published as a special issue of the journal New Review of Academic Librarianship.**
