The purpose of the  
research reported in this

publication was to evaluate the current definition of the grade factor for broken corn and foreign material (BC FM) and to examine alternative definitions based on

various sizes of screens.  
The data were obtained  
through analysis of 1,080  
samples of corn from  
Illinois elevators. The  
data show that the  
12/64-inch round-hole
