In Play=Learning, top experts in child development and learning contend that in over-emphasizing academic achievement, our culture has forgotten about the importance of play for children's development. REDD+ must be transformational. REDD+ requires broad institutional and governance reforms, such as tenure, decentralisation, and corruption control. These reforms will enable departures from business as usual, and involve communities and forest users in making and implementing policies that affect them. Policies must go beyond forestry. REDD+ strategies must include policies outside the forestry sector narrowly defined, such as agriculture and energy, and better coordinate across sectors to deal with non-forest drivers of deforestation and degradation. Performance-based payments are key, yet limited. Payments based on performance directly incentivise and compensate forest owners and users. But schemes such as payments for environmental services (PES) depend on conditions, such as secure tenure, solid carbon data and transparent governance, that are often lacking and take time to change. This constraint reinforces the need for broad institutional and policy reforms. We must learn from the past. Many approaches to REDD+ now being considered are similar to previous efforts to conserve and better manage forests, often with limited success. Taking on board lessons learned from past experience

will improve the prospects of REDD+ effectiveness. National circumstances and uncertainty must be factored in. Different country contexts will create a variety of REDD+ models with different institutional and policy mixes. Uncertainties about the shape of the future global REDD+ system, national readiness and political consensus require flexibility and a phased approach to REDD+ implementation.

La producción intelectual de la CEPAL en sus 70 años de existencia ha sido vasta en distintos ámbitos del desarrollo. En este libro se analizan y contextualizan los principales hitos e ideas del pensamiento económico de la CEPAL sobre recursos naturales, medio ambiente y sostenibilidad, organizados en las dos grandes etapas que han caracterizado la vida institucional: la estructuralista (1948-1990) y la neoestructuralista (de 1990 en adelante). A partir de una revisión sistemática de la literatura, se destacan ideas como el vínculo entre la especialización productiva en recursos naturales y los términos de intercambio desfavorables, formulada en los años cincuenta; la soberanía sobre los recursos naturales, en los sesenta; la enunciación temprana del principio de responsabilidades comunes pero diferenciadas, en los setenta; los estilos de desarrollo y medio ambiente, en los ochenta; la competitividad espuria, en los noventa, y la gobernanza de los recursos naturales, el estilo de desarrollo sostenible con igualdad y el gran impulso ambiental, en las dos primeras décadas del siglo XXI. El pensamiento neoestructuralista de la CEPAL es dinámico, abierto y se renueva permanentemente sin perder su tradición estructuralista. El libro aporta también elementos conceptuales para formular un neoestructuralismo ecológico.

System 1 is fast, intuitive, and emotional; System 2 is slower, more deliberative, and more logical. The impact of overconfidence on corporate strategies, the difficulties of predicting what will make us happy in the future, the profound effect of cognitive biases on everything from playing the stock market to planning our next vacation—each of these can be understood only by knowing how the two systems shape our judgments and decisions. Engaging the reader in a lively conversation about how we think, Kahneman reveals where we can and cannot trust our intuitions and how we can tap into the benefits of slow thinking. Most companies are only too aware that their creative performance falls far short of potential. The problem is that they don't know what to do about it. Evidence shows that most creative acts are not planned for, and come from where they are least expected. It is impossible to predict what they will be, who will be involved, and when and how they will happen. This is the true nature of corporate creativity, and it is where a company's creative potential really.

Se suele identificar a una dictadura con el ejercicio de la violencia sobre la población y la censura total de la información y la opinión, pero ese es sólo el final de un proceso, el momento en el que el sistema, por su lógica interna, empieza a debilitarse. La verdadera dictadura consiste en las ideas falsas que la población y las elites dirigentes han incorporado, tal vez mucho antes de que el déspota las aproveche. En este libro José Benegas puntualiza 10 ideas falsas que favorecen al despotismo: La identificación de dictadura con violencia. La democracia absoluta. La lucha de clases. La socialdemocracia. La igualdad. El gobierno sabio. El estado es la ley. El problema es la corrupción. La prensa nos hará libres. El impuesto a las ganancias. Se podrán agregar otras, se podrán discutir estas. Lo importante de este trabajo es poner el foco en las dictaduras que hay en las cabezas de las propias víctimas.

Laudato Si 'is Pope Francis' second encyclical which focuses on the theme of the environment. In fact, the Holy Father in his encyclical urges all men and women of good will, the rulers and all the powerful on earth to reflect deeply on the theme of the environment and the care of our planet. This is our common home, we must take care of it and love it - the Holy Father tells us - because its end is also ours.

The study of propaganda's uses in modern democracy highlights important theoretical questions about normative rhetorical practices. Is rhetoric ethically neutral? Is propaganda? How can facticity, accuracy, and truth be determined? Do any circumstances justify misrepresentation? Edited by Gae Lyn Henderson and M. J. Braun, *Propaganda and Rhetoric in Democracy: History, Theory, Analysis* advances our understanding of propaganda and rhetoric. Essays focus on historical figures—Edward Bernays, Jane Addams, Kenneth Burke, and Elizabeth Bowen—examining the development of the theory of propaganda during the rise of industrialism and the later changes of a mass-mediated society. Modeling a variety of approaches, case studies in the book consider contemporary propaganda and analyze the means and methods of propaganda production and distribution, including broadcast news, rumor production and globalized multimedia, political party manifestos, and university public relations. *Propaganda and Rhetoric in Democracy* offers new perspectives on the history of propaganda, explores how it has evolved during the twentieth and twenty-first centuries, and advances a much more nuanced understanding of what it means to call discourse propaganda.

One of the 20th century's enduring works, One Hundred Years of Solitude is a widely beloved and acclaimed novel known throughout the world, and the ultimate achievement in a Nobel Prize-winning career. The novel tells the story of the rise and fall of the mythical town of Macondo through the history of the Buendía family. It is a rich and brilliant chronicle of life and death, and the tragicomedy of humankind. In the noble, ridiculous, beautiful, and tawdry story of the Buendía family, one sees all of humanity, just as in the history, myths, growth, and decay of Macondo, one sees all of Latin America. Love and lust, war and revolution, riches and poverty, youth and senility -- the variety of life, the endlessness of death, the search

for peace and truth -- these universal themes dominate the novel. Whether he is describing an affair of passion or the voracity of capitalism and the corruption of government, Gabriel García Márquez always writes with the simplicity, ease, and purity that are the mark of a master. Alternately reverential and comical, One Hundred Years of Solitude weaves the political, personal, and spiritual to bring a new consciousness to storytelling. Translated into dozens of languages, this stunning work is no less than an accounting of the history of the human race.

For the first time in its history, Latin America is ruled by elected governments; the dictators have gone, although their legacy remains. Here, among others, Garcia Marquez, Borges, Amado and Fuentes provide observations on politics and literature.
