Tales from Shakespeare is an English children's book written by brother and sister Charles and Mary Lamb in 1807. The book is designed to make the stories of Shakespeare's plays familiar to the young. Mary Lamb was responsible for the comedies, while Charles wrote the tragedies; they wrote the preface between them. Marina Warner, in her introduction to the Penguin 2007 edition, says that Mary did not get her name on the title page till the seventh edition in 1838. Tales from Shakespeare has been republished many times. It was

first published by the Juvenile Library of William Godwin (under the alias Thomas Hodgkins) and his second wife, Mary Jane Clairmont, who chose the illustrations, probably by William Mulready. Later illustrators included Sir John Gilbert in 1866, Arthur Rackham in 1899 and 1909, Louis Monziès in 1908, Walter Paget in 1910, and D. C. Eyles in 1934. The following Tales are meant to be submitted to the young reader as an introduction to the study of Shakespeare, for which purpose his words are used whenever it seemed possible to bring them in; and in whatever has been added to give them the regular form of a connected story, diligent care has been taken to select such words as might least interrupt the effect of the beautiful English tongue in which he wrote: therefore, words introduced into our language since his time have been as far as possible avoided.

This title is edited by a British author from chapters written by cardiologists working in the UK. This handbook - which has been formally adopted by the Royal Brompton and Harefield NHS Trust - is a homunculus of cardiology knowledge, based on the experience of the authors with the sole aim of helping the reader make a decision when faced with the daily challenges of cardiology. Living in an age where access to the latest trial data is immediate, for many people lack of knowledge is not the problem, instead it is inadequate experience that holds them back from making a decision based on that knowledge. The Editor calls this 'evidence based paralysis' - sometimes you don't want to know what a group of experts decided in

the latest trial but simply want to know what to do next. Obviously there is no substitute for experience but to help you along the way this book will help you 'get off the fence' and indicate what the authors have done in similar situations. Written by a doctor involved in every day real life cardiology, designed for all junior doctors, primary care physicians and nursing staff involved with cardiological problems Sorts the 'wheat from the chaff' and says it how it really is Designed to cure people who suffer from 'evidence based paralysis'! Content approved and adopted by two NHS Trusts Material based on national and international guidelines Deals not only with the prevailing evidence regarding 'best practice', but highlights common misconceptions and well known 'short-cuts' to try to resist! Covers ACS and first line treatment for MI in the emergency room Includes diagnostic angiography and angioplasty Addresses the primary and secondary management of MI Includes practical discussion of lipid disorders, hypertension and risk stratification Addresses heart failure, chronic valve disease and cardiomyopathies Discusses the use of pacemakers and implantable cardioverter defibrillators, heart transplant and VAD Includes common drug interactions Addresses the management of adults with congenital heart disease One film out of every five made anywhere on earth comes from India. From its beginnings under colonial rule through to the heights of Bollywood , Indian Cinema has challenged social injustices such as caste, the oppression of Indian women, religious intolerance, rural poverty, and the pressures of life in the

burgeoning cities. And yet, the Indian movie industry makes only about five percent of Hollywood's annual revenue. In this Very Short Introduction Ashish Rajadhyaksha delves into the political, social, and economic factors which, over time, have shaped Indian Cinema into a fascinating counterculture. Covering everything from silent cinema through to the digital era, Rajadhyaksha examines how the industry reflects the complexity and variety of Indian society through the dramatic changes of the 20th century, and into the beginnings of the 21st. Focusing on politics and society in India, this book explores new areas enmeshed in the complex social, economic and political processes in the country. Linking the structural characteristics with the broader sociological context, the book emphasizes the strong influence of sociological issues on politics, such as social milieu shaping and the articulation of the political in day-to-day events. Political events are connected with the ever-changing social, economic and political processes in order to provide an analytical framework to explain 'peculiarities' of Indian politics. Bidyut Chakrabarty argues that three major ideological influences of colonialism, nationalism and democracy have provided the foundational values of Indian politics. Structured thematically and

chronologically, this work is a useful resource for students of political science, sociology and South Asian studies.

The target audience for the book includes policy-makers, practitioners, administrators, education planners, researchers, teachers and teacher educators with a concern about the relationship between secondary education and education for the world of work (with particular reference to technical and vocational education and training - TVET.) A delightful read. Oscar Wilde (1854-1900) was an Irish playwright, novelist, essayist, and poet, famous for 'The Picture of Dorian Gray' and 'The Importance of Being Earnest' to name a couple. He was believed to be a homosexual and met a lot of resistance in his life on that account. He died in Paris at the age of 46.

Debates about the future of urban development in many countries have been increasingly influenced by discussions of smart cities. Despite numerous examples of this "urban labelling" phenomenon, we know surprisingly little about so-called smart cities. This book provides a preliminary critical discussion of some of the

more important aspects of smart cities. Its primary focus is on the experience of some designated smart cities, with a view to problematizing a range of elements that supposedly characterize this new urban form. It also questions some of the underlying assumptions and contradictions hidden within the concept.

With *Miranda in Milan*, debut author Katharine Duckett reimagines the consequences of Shakespeare's *The Tempest*, casting Miranda into a Milanese pit of vipers and building a queer love story that lifts off the page in whirlwinds of feeling. After the tempest, after the reunion, after her father drowned his books, Miranda was meant to enter a brave new world. Naples awaited her, and Ferdinand, and a throne. Instead she finds herself in Milan, in her father's castle, surrounded by hostile servants who treat her like a ghost. Whispers cling to her like spiderwebs, whispers that carry her dead mother's name. And though he promised to give away his power, Milan is once again contorting around Prospero's dark arts. With only Dorothea, her sole companion and confidant to aid her, Miranda must cut through the mystery and find the truth about her father, her mother, and herself. "Love and lust, mothers and monsters, magicians and masked balls, all delivered with Shakespearean panache."

—Nicola Griffith, author of *Hild* "Miranda in Milan is somehow both utterly charming and perfectly sinister, and altogether delightful. A pleasure for any lover of romance, myth, and magic—whether or not

they're fans of the Bard.” –Cherie Priest, author of *Boneshaker* and *I Am Princess X* At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.
