series provides the challenge that able pupils seek. Selective UK secondary schools are increasingly developing entrance exams that test potential rather than coached learning. As such we do not offer any particular exam format (e.g. CEM Durham, GL Assessment). Instead children's learning will be brought to life by our questions that demand insight and grasp of the fundamental concepts underlying each problem. Our fully worked answers demonstrate different strategies for solving 11+ mathematical challenges. Attractively designed and with ample space inside for pupils to express their working,

This book covers everything you need to know in preparing children for both pre-tests and 11+ entrance exams for admission into independent and grammar schools. It sets out ways in which children can become successful and confident learners over the years and months building up to these tests taken

in Year 6. The author passionately believes that intelligence is not fixed but can be nurtured and grown with the right support. The key to putting this into action is to understand how you learn and to master the strategies for learning, retaining and recalling information effectively. This book will help parents and teachers support children approach one of their first academic hurdles with confidence. The book begins by looking at why revision is important and how the brain works. It introduces the concept of growth mindset and how with the right support, confidence, resilience and independence can be nurtured. It provides guidance on physical and mental wellbeing (including a section on coping with
