

## 12th Science Exam Paper Answer Key 2013

*In a series of 100 mini workshops on proposal development during one month training of senior professionals on research methodology, orientation and refresher training of faculty from universities and colleges, and analysis of data of more than 5000 Ph.D scholars and national level projects by the authors of this book, several pitfalls emerged in the selection of research area and topic/title of a study, objectives, hypothesis formulation, research design, development of research tools, and analysis of data. The errors committed at planning stage of research continue throughout the research work and get its serious reflection in the quality of research. During the training, the presentation of Research Proposals developed as part of individual and group assignments reinforced the faith of authors that the skills required for quality research are missing in the system. And it cannot be fully overcome through the tutorial methodology. The knowledge about the research process is crucial but not sufficient to enrich the research skills for quality research. It was realized that most of the books do not explain how to decide the research area and title of a study? How to set the objectives and how to establish relationship between two? These two features not independent constructs and should be mirror of each other. How to ensure the quality in the review of literature? How should it be carried out? How to find research gaps and how to set research questions to be answered in the research studies? How to formulate correct hypothesis, decide the research design, and develop research tools? How and from where to pick up variables for developing the research tools? How much crystallization of each objective helps researchers to get items for developing the tools such as questionnaire, interview schedule, check list for observation, and measurement scale for attitude, perception, belief, etc. about the phenomenon under exploration. What type of statistical tools are used for data analysis? In-depth understanding of these sub-steps under each stage of research looks to be bigger area of confusion for researchers. The book on Research Skill Development in Social Sciences, Communication and Management has been written in the self-guide form to answer the issues listed above. The CBSE has made certain changes in the assessment structure from the session 2019-20 onwards. In the new scheme of examination, CCE and term system has been replaced with the Internal Assessment & Single Annual Exam by CBSE itself. Single exam conducted by CBSE will carry 80 marks whereas 20 marks are left to the schools for internal assessment. CBSE has issued detailed guidelines on how the internal marks will be divided among different activities. From 2019 onwards, there will be internal choices in board examinations with increased internal options in the question paper. Considering this change, now a student has to prepare accordingly for board examinations. The new assessment format brought with it excitement as well as anxiety. And to help them prepare and excel in their CBSE board examination, Career Point Kota has developed a series of 10 Most Likely Question Papers with Solutions. The Key Features of Most Likely Question Papers with Solutions Series : New OBJECTIVE TYPE question in each paper. Syllabus of CBSE 2019-20. Based on the latest CBSE Syllabus & Pattern. Mind map of each chapter is given to visualize and help acquire a better understanding. Important terms, facts, formulae and quick revision tips are given. Covers questions asked in previous year board exams. Toppers Answer Sheet as released by CBSE to understand the scoring technique. We hope this book will gratify students' need for the new CBSE pattern board exam and smoothen their path to success. We wish to utilize the opportunity to place on record our special thanks to all the members of the Content Development team for their efforts*

*to create this wonderful book.*
