Parentology

WALNECK'S CLASSIC CYCLE TRADER, FEBRUARY 1997

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger) like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate science blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously shares the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with weird names not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley draws on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy children. These experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easily as laughing and learning at the same time.

84 pages, 83 black & white illustrations, size 8.25 x 11 inches. Published in the USA under the same title in 1951 by Floyd Clymer. This publication was a pocket sized landscape format book and it is often criticized as difficult to read due to its small print size. This edition was re-formatted into a larger and more conventional portrait size which has increased the text size by almost 40%. This book provides the reader with an insight into the country, and the manufacturers, that were ultimately destined to succumb to the Japanese motorcycle industry. A total of 33 different British motorcycle manufacturers and their various models are included, more than a handful of those 33 manufacturers survive today. A 'must have' resource for any motorcycle enthusiast and an invaluable reference for anyone interested in British 'iron'. Many of the motorcycles featured within are highly collectible today and the predominance of these manufacturers no longer exist. This truly historical documentation of the glory years of British motorcycle manufacturing has been lost and unavailable for many years and is becoming increasingly more difficult to find on the secondary market. We are pleased to present this reproduction as a service to all motorcycle enthusiasts worldwide.

This second edition of "SOS" provides parents with guidance for handling a variety of common behavior problems based on the behavior child rearing and discipline. This approach suggests that good and bad behavior are both learned and can be changed, and proposes specific skills, procedures, and strategies for parents to use in getting improved behavior from their children. The guide is divided into four sections. Section 1 presents some fundamentals of child behavior and effective discipline. Some of the causes of children's misbehavior are examined as well as increasing good behavior and eliminating bad ones. Section 2 provides advice for implementing the "time-out" method. Section 3 gives suggestions on how to: (1) manage bad behavior away from home; (2) use points, tokens, and contracts; (3) use time-out on two children at the same time; (4) time out on a toy instead of the child; (5) handle aggressive and dangerous behavior; and (6) help children express feelings. Section 4 suggests additional resources for helping children. Each chapter includes a review of the most important ideas and instructions presented. The book also includes two appendices: one includes an index of problem behaviors, quizzes and answers for parents, more resources for professionals, and tear-out sheets for parents and teachers. Approximately 60 references are included. A videotape, not available from ERIC, demonstrates the child-rearing rules, and how to avoid, as well as other child management methods. A printed "Video Leader's Guide" for the training leaders provides objectives, suggestions for workshops, and guidelines for discussing the behavior vignettes in the video. Workshop evaluation forms and handouts are appended. A cassette on how to use "time out" effectively is also part of this multimedia package. (HTH)
