Andrew McCarthy grows concerned for his family after he catches a young man, Zachary Denton, photographing his daughter, Grace McCarthy, and other children at a park. To his dismay, Zachary talks his way out of trouble when he's confronted by the police. He hopes that's the end of it. Then he finds Zachary at a diner and then at a grocery store. He knows their encounters aren't coincidences. And just as Andrew prepares to defend his family, Grace vanishes. As the police search stalls and the leads dry up, Andrew decides to take matters into his own hands. He starts by searching for sex offenders in the area and researching enhanced interrogation techniques... He convinces himself he'll do anything to rescue his daughter, unaware of the pure evil he'll face in his journey. He's willing to hurt-to torture-anyone to save his family. Jon Athan, the author of Into the Wolves' Den and The Abuse of Ashley Collins, delves into the underworld of internet predators in this disturbing horror novel. Are your children safe? Although it is Japans smallest motorcycle manufacturer, Kawasaki has had a huge impact on the motorcycling world. Here is the full story of this famous marque, including road and competition bikes. Ian Falloon delivers the background history of the Kawasaki company; chronicles the early racing days; Kawasakis two-stroke production bikes; the Green Meanies - the HR version of the 500cc four-stroke; the highly successful Superbike and Endurance racers of the 1970s; and the bikes of the 1990s which ushered in a new era of performance up through the ZX-12R introduced for 2000.

"If I had asked people what they wanted, they would have said faster horses." --Henry Ford As one part of your brain processes these words, another part of your brain is urging you to put the book down and focus on something more pressing. Get back to work on the budget due tomorrow. Answer e-mails growing stale in your inbox. Get off your rear and update that résumé. We're all guilty of it, especially in the business world. From Fortune 500 CEOs to assistants, we work to solve the most urgent problems first. That's because evolution has hardwired our brains to focus only on the immediate future, a survival technique that worked extremely well when predators were lurking at every turn. But that was then, this is now. In the modern world, where life expectancies are long and physical perils rare (at least for people who buy books), it's not only possible to build a strong tomorrow without sacrificing today, but to actually increase the number of here-and-now victories by pursuing distant wins. That's where Long Fuse, Big Bang comes in--to help you work with that instinct to create and foster ideas that will lead to explosive professional results. Through proven case studies and personal experience, Dr. Eric Haseltine shows you how to neutralize the quick-fix way of thinking and actually use that desire to improve your chances of an enduring success. Rather than fight our most basic thought processes, this book will teach you how to work with your brain to light the long fuse, keep it smoldering, and ignite that "Big Bang" that will make history.

In each cup of coffee we drink the major issues of the twenty-first century-globalization, immigration, women's rights, pollution, indigenous rights, and self-determination-are played out in villages and remote areas around the world. In Javatrekker: Dispatches from the World of Fair Trade Coffee, a unique hybrid of Fair Trade business, adventure travel, and cultural anthropology, author Dean Cycon brings readers face-to-face with the real people who make our morning coffee ritual possible. Second only to oil in terms of its value, the coffee trade is complex with several levels of middlemen removing the 28 million growers in fifty distant countries far from you and your morning cup. And, according to Cycon, 99 percent of the people involved in the coffee economy have never been to a coffee village. They let advertising and images from the major coffee companies create their worldview. Cycon changes that in this compelling book, taking the reader on a tour of ten countries in nine chapters through his passionate eye and unique perspective. Cycon, who is himself an amalgam-equal parts entrepreneur, activist, and mischievous explorer-has traveled extensively throughout the world's tropical coffeelands, and shows readers places and people that few if any outsiders have ever seen. Along the way, readers come to realize the promise and hope offered by sustainable business principles and the products derived from cooperation, fair pricing, and profit sharing. Cycon introduces us to the Mamos of Colombia-holy men who believe they are literally holding the world together-despite the severe effects of climate change caused by us, their "younger brothers." He takes us on a trip through an ancient forest in Ethiopia where many believe that coffee was first discovered 1,500 years ago by the goatherd Kaldi and his animals. And readers learn of Mexico's infamous Death Train, which transported countless immigrants from Central America northward to the U.S. border, but took a horrifying toll in lost lives and limbs. Rich with stories of people, landscapes, and customs, Javatrekker offers a deep appreciation and understanding of the global trade and culture of coffee. In each cup of coffee we drink the major issues of the twenty-first century-globalization, immigration, women's rights, pollution, indigenous rights, and self-determination-are played out in villages and remote areas around the world. What is Fair Trade Coffee? Coffee prices paid to the farmer are based on the international commodity price for coffee (the "C" price) and the quality premium each farmer negotiates. Fair Trade provides an internationally determined minimum floor price when the C plus premium sinks below \$1.26 per pound for conventional and \$1.41 for organics (that's us!). As important as price, Fair Trade works with small farmers to create democratic cooperatives that insure fair dealing, accountability and transparency in trade transactions. In an industry where the farmer is traditionally ripped off by a host of middlemen, this is tremendously important. Cooperatives are examined by the Fairtrade Labeling Organization (FLO), or the International Fair Trade Association (IFAT), European NGOs, for democratic process and transparency. Those that pass are listed on the FLO Registry or become IFAT members. Cooperatives provide important resources and organization to small farmers in the form of technical assistance for crop and harvest improvement, efficiencies in processing and shipping, strength in negotiation and an array of needed social services, such as health care and credit. Fair Trade also requires pre-financing of up to sixty percent of the value of the contract, if the farmers ask for it. Several groups, such as Ecologic and Green Development Fund have created funds for pre-finance lending.
