Few cars in modern times have caused as much of a stir as the turbocharged Subaru Impreza. It came from nowhere at the start of the 1990s to claim three successive World Rally Championships for its makers in the middle of that decade, and went on to become an enthusiasts' car thanks to its affordability, high performance - and, of course, the glorious exhaust note of its unusual flat-four 'boxer' engine. This book examines the three generations of Subaru Impreza WRX and WRX STI from 1992 - 2012, including how the roadgoing cars were developed from the successful rally models, production history and specification details. Topics covered include: History of the Impreza, and early days in competition with the Leone and the Legacy models. Construction and derivatives of the distinctive flat-four engine. Innovations in the Impreza's four-wheel-drive system. Design and specifications for special editions. Includes material from Prodrive on their limited edition models. Examines both rally and roadgoing cars. Series 78, 79, 100 & 105 6 & 8-cylinder engines with 4.5L & 4.7L petrol and 4.2L diesel.

Machining is an essential part of high-performance engine building and stock rebuilding, as well as certain servicing procedures. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced. Classic and older engines typically require extensive machining and almost every major component of engine, including block, heads, intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian, editor of Engine Building Professional, walks you through each important machining procedure. A stock 300-hp engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. The author also shows you how to inspect, measure, and evaluate components so you can provide astute guidance and make the best machine work choices. Machining procedures included are cylinder boring, align boring/honing, decking, valveseat cutting, cam tunnel boring, and a multitude of other services. In addition, multi-angle valve jobs, setting the valveseats, altering rocker arm ratio, re-conditioning connecting rods, and machining and matching valvetrain components are also covered. Whether you're an enthusiast engine builder or prospective machining student who wants to pursue a career as an automotive machinist, this book will provide insight and in-depth instruction for performing the most common and important machining procedures.

Touring Car Racing, a feast of nostalgia, celebrates the 60-year heritage of the British Touring Car Championship. From the era of Mini Coopers and Lotus Cortinas to the Vauxhall Astras and Honda Civics of recent years, all the highlights of Britain's ever-spectacular touring car scene are captured in a year-by-year visual extravaganza with over 600 photos and expert commentary. Compiled by long-time touring car journalist Matt James, the book has a chapter for each year featuring a summary of the season, 10 photos showing all the top cars and drivers in action, key statistics and a profile of the champion driver. Anyone who has ever enjoyed touring car racing as a participant, spectator or television viewer will treasure this book.

The 1950s. The British Saloon Car Championship was inaugurated in 1958 and from the start it was super-competitive, ending in a tie that was resolved by a shoot-out in favour of Jack Sears. The 1960s. There were three Mini champions but mainly this was a Ford era, epitomised by Lotus Cortinas (with Jim Clark ever spectacular) and big Falcons, Galaxies and Mustangs from America. The 1970s. Smaller classes came to the fore in this decade, with three drivers sharing seven titles — Bill McGovern took three in Sunbeam Imps while two apiece went to Bernard Unett (Chrysler Avenger GT) and Richard Longman (Mini 1275GT). The 1980s. Three drivers also bestrode this decade but in a wider range of cars, including Mazda RX-7, Alfa Romeo GTV, Rover Vitesse and Ford Sierra XR4i; Win Percy and Andy Rouse each took three titles, Chris Hodgetts two. The 1990s. Overseas drivers arrived in force to mix it with home-grown stars during the highly competitive Super Touring years, the decade's champions including Joachim Winkelhock (BMW 318is), Frank Biela (Audi A4 quattro), Alain Menu (Renault Laguna), Rickard Rydell (Volvo S40) and Laurent Aiello (Nissan Primera). The 2000s. Vauxhalls were the star cars, taking six titles, while the decade brought three double champions in the form of James Thompson (Vauxhall Astra), Matt Neal

(Honda Integra) and Fabrizio Giovanardi (Vauxhall Vectra VXR). The 2010s. Yet more variety and brilliant racing has characterised the current decade, with Gordon Shedden becoming the winningest driver with three titles in Honda Civics.
