In *Out of Stock*, Dara Orenstein delivers an ambitious and engrossing account of that most generic and underappreciated site in American commerce and industry: the warehouse. She traces the progression from the nineteenth century's bonded warehouses to today's foreign-trade zones, enclaves where goods can be simultaneously on US soil and off US customs territory. Orenstein contends

that these zones--nearly 800 of which are scattered across the country--are emblematic of why warehouses have begun to supplant factories in the age of Amazon and Walmart.

Circulation is so crucial to the logistics of how and where goods are made that it is increasingly inseparable from production, to the point that warehouses are now some of the most pivotal spaces of global capitalism. Drawing from cultural geography, cultural history, and political economy, *Out of Stock* nimbly demonstrates the centrality of warehouses for corporations, workers, cities, and empires.

transportation network companies (TNCs), such as Uber and Lyft, however, are disrupting conventional taxi and limousine services and are raising policy challenges related to personal security and public safety, insurance requirements, employment and labor issues, and accessibility and equity. The committee's report offers guidance to state and local officials responsible for policy setting and regulation of for-hire transportation services in each of these areas. The report also addresses the need for greater consistency in regulations across jurisdictions and calls for TNCs to share more information about the volume, the frequency, and the types of trips they are providing, to allow for informed regulation and planning of transportation services"--provided by publisher.
