Josiel Henry finally found solace from a violent past when she retired to a quiet isolated cottage in the country. Her seclusion is shattered when four bank robbers choose her home as a hideout in their escape from the law. Held prisoner in her own home, Josiel’s thoughts are flooded with the past, along with the realization that escape is debate the merits of murdering their witness, Josiel schemes to break free but soon finds the risk of running away is greater than she could have imagined. Outnumbered and forced to fight for her life, she learns just how far she will go to save herself. A gripping story that provokes a primal fear, Remote Bliss explores the instinct for self-preservation. Economic studies historically have either extolled the virtues of perfect markets or decried the market’s shortcomings, proposing that governments correct market failure. This book proposes as a counterweight to these views a theory of nonmarket failure, and examines in great detail the shortcomings of government efforts to replace or improve upon the market. An unusually thorough analysis that can be used to make more systematic comparisons between markets and governments and to arrive at more intelligent choices between them.After reviewing the existing theory of market shortcomings, Wolf develops a parallel framework for analyzing the shortcomings of government, elaborating the inherent strengths and weaknesses of government operations and the problems they present. He then considers how these predictable types of nonmarket failure can be taken into account in improving the formulation of public policy. And he compares market and nonmarket alternatives, both in their theoretical and empirical aspects.Wolf concludes that, while both markets and governments have strengths and weaknesses, and the choice between them is never a pure one (real-world situations always involve some combination of the two alternatives), markets do a better job than governments. They are more efficient according to both static and dynamic criteria. With respect to equity and other non-efficiency considerations, however, both markets and governments have strengths and weaknesses. Finally, Wolf points out that government can play an important role in improving and extending the functioning of markets. And, perhaps most controversially, he argues that market forces themselves can play an important role in improving thefunctioning of government. They can reduce the incidence of nonmarket failures, and they can bring incentives into government operations.Charles Wolf, Jr. is Dean of the RAND Graduate School of Policy Studies and director of the RAND Corporation’s Research Program in International Economic Policy. He was chairman of RAND’s Economics Department for 12 years, and has written widely in the fields of economics, defense policy, and foreign policy.

Book three in the Wizard Twins series. Astra Almadere betrayed all. Those she loved. Those she swore to protect. And all for the Dark Wizards whose passion and heat she can't live without. A Sorceress can sense her Twins, the men destined to join her in her power to strengthen the planet of Santmar, and Astra has sensed for a while that she must turn her back on them, deliver them to justice, even though they'd turned from her many years ago. A pain that still rips her heart in two. Torran and Rhylan knew the road to claiming their Consortress would not be an easy one. After all, a painful lie had driven her away, causing her to believe they didn't burn for her. Weren't consumed by her? Can she save them rather than honor her duty, the Wizards have the chance to show Astra she's always been the only one they desire.

How to Deal with the Cares of Life

What if the conspiracies surrounding Edgar Allan Poe's ability to time travel were true? What everlasting evil would compel such a man to skip through time in search of a savior? And what if the stories penned by the likes of Poe, Shelley and others were not merely stories, but rather an interpretive account of the occult throughout history? Both Reynolds and Clara are about to find out as they are thrust together in an ever-growing mystery, full of thrills, suspense, and unimaginable nightmares. Poe just may hold the secret to the tragedies surrounding Reynolds' life. While Clara stumbles onto mysteries she never knew existed, stretching far back into her family tree, as she becomes sole proprietor of... The Usher Plantation. Will both Reynolds and Clara find some common ground in this quest thrust upon them by the cryptic and enigmatic Poe? Will they succeed in hunting the most cunning and timeless of history

This is the first reference on amorphous silicon and polycrystalline silicon thin film transistors that gives a systematic global review of all major topics in the field. These volumes include sections on basic materials and substrates properties, fundamental device physics, critical fabrication processes (structures, a-Si: H, dielectric, metallization, catalytic CVD), and existing and new applications. The chapters are written by leading researchers who have extensive experience with reputed track records. Thin Film Transistors provides practical information on preparing individual functional a-Si: H TFTs and poly-Si TFTs as well as large-area TFT arrays. Also covered are basic theories on the a-Si: H TFT operations and unique material characteristics. Readers are also exposed to a wide range of existing and new applications in industries.

East meets West in this award-winning book of Chinese style by superstar fashion designer Vivienne Tam--and now it's in a cute, smaller trim size trade paperback! Celebrated fashion designer Vivienne Tam shares the rare individuality of her own cross-cultural style, combining traditional eastern elements with a modern Western edge. The seductive East-meets-West style is brought alive as Tam takes us on a personal journey featuring the people, places, and things that inspire her. From the sexy cheongsam (the ultimate feminine dress) to the Mao jacket (gives power dressing a whole new meaning), from the elaborate Chinese opera houses to Zen gardens, she teaches such us how to savour the world in a bowl of noodles and the essence of Chinese design in her favourite Ming chair. China Chic is style that is hot, hip, and pervasive to today's--and tomorrow's-pop culture.

Drawing on interviews with members of Brooke Astor’s elite social circle, as well as her staff, a behind-the-scenes look at the trials and tribulations of the Astor family captures the story of three generations of a privileged American dynasty, from the storied philanthropist to her grandson, who accused his own father of mistreating and abusing her from his grandmother.

Applying the concept of historical waves originally propounded by Alvin Toffler in The Third Wave, Herman Maynard and Susan Mehrtens look toward the next century and foresee a “fourth wave,” an era of integration and responsibility far beyond Toffler’s revolutionary description of third-wave postindustrial society. Whether we attain this stage of global well-being, however, will depend on how well our business institutions adapt and change. The Fourth Wave examines the ways business has changed in the second and third waves and must continue to change in the fourth. The changes concern the basics-how an institution is organized, how it defines wealth, how it relates to its surrounding communities, how it responds to environmental needs, and how it takes part in the political process. Maynard and Mehrtens foresee a radically different future in which business principles, concern for the environment, personal integrity, and spiritual values are integrated. The authors also demonstrate the need for a new kind of leadership-managers and CEOs who embrace an attitude of global stewardship: who define their assets as ideas, information, creativity, and vision; and who strive for seamless boundaries between work and private lives for all employees.

Still the Best Delphi Resource A Fully Revised Version of the Book That Won the DelphiInformant Readers Choice Award If you're looking to capitalize on the powerful capabilities ofthe latest release of Delphi, Mastering Delphi 6 is the oneresource you can't do without. Practical, tutorial-based coveragehelps you develop key skills, solve tough problems, and build andimplement sophisticated functionality in your database,client/server, and Internet applications. The special insights ofDelphi expert Marco Cantu you an extra advantage as you completesuccessful projects and progress towards Delphi mastery. Coverage includes: Getting to know the new run-time library (RTL) Learning to use the VCL and CLX visual libraries Developing custom components Creating data-aware controls and custom datasets Mastering database programming with BDE and dbExpress Mastering client/server programming with InterBase Interfacing with Microsoft's ADO using the dbGo componentset Taking advantage of Delphi's support for COM, OLE Automation,and COM+ Programming for a multitiered application architecture Taking advantage of Delphi's support for XML and SOAPtechnologies Building practical, powerful Web applications Note: CD-ROM/DVD and other supplementary materials arenot included as part of eBook file.

Singapore's leading tech magazine gives its readers the power to decide with its informative articles and in-depth reviews.

Why do so many Christians seem to struggle from one defeat to the next, never really experiencing the abundant life God has for them? The answer is no mystery. In fact, author Michael Cameneti points us directly to the answer declared clearly by God Himself throughout His Word: The missing ingredient that most people lack is the fear of the Lord. Just how important is the fear of the Lord to our ultimate success in life? Michael gives it to us straight, "If we choose to forsake the fear of God, we are on our own in life, relegated to making decisions and going through the trials of life without His help." He goes on to conclude, "The stakes couldn't be higher ... for whether or not you walk in the fear of God is a decision that will determine the outcome of your life." So what do you choose for your life? A never-ending cycle of defeat and discouragement as you try to navigate through life's storms using your own limited resources? Or a brand-new commitment to learn how to walk in the fear of the Lord? If you choose or not the latter, you have just embarked on a new kind of journey -- one in which you are never a loser; never left without divine guidance and help; and always moving forward toward the glorious destination God has planned just for you! Discover a fun new hobby with helpful possibilities Get directions, talk to folks overseas, or find out whether the fish are biting Want to check out the morning news in London, help out in emergencies, or tune in to the big race? Two-way radios open up a world of possibilities - literally. This handy guide tells you about the equipment you need, fills you in on radio etiquette, shows you how to stay legal, and gives you lots of cool ideas for family-friendly radio activities. Discover how to
* Use the right radio lingo
* Choose and operate different types of radios
* Get a license if you need one
* Communicate in emergencies
* Program a scanner
* Tune in to sporting events

This book puts the spotlight on how a real-time kernel works using Micrium's C/OS-III as a reference. The book consists of two complete parts. The first describes real-time kernels in generic terms. Part II provide examples for the reader, using the Infineon XMC4500. Together with the IAR Systems Embedded Workbench for ARM development tools, the evaluation board provides everything necessary to enable the reader to be up and running quickly, as well as a fun and educational experience, resulting in a high-level of proficiency in a short time. This book is written for serious embedded systems programmers, consultants, hobbyists, and students interested in understanding the inner workings of a real-time kernel. C/OS-III is not just a great learning platform, but also a full commercial-grade software package, ready to be part of a wide range of products. C/OS-III is a highly portable, ROMable, scalable, preemptive real-time, multitasking kernel designed specifically to address the demanding requirements of today's embedded systems. C/OS-III is the successor to the highly popular C/OS-II real-time kernel but can use most of C/OS-II's ports with minor modifications. Some of the features of C/OS-III are: Preemptive multitasking with round-robin scheduling of tasks at the same priority Unlimited number of tasks and other kernel objects Rich set of services: semaphores, mutual exclusion semaphores with full priority inheritance, event flags, message queues, timers, fixed-size memory block management, and more. Built-in performance measurements Do you want to be a part of what God is doing today, or are you content to sit on the sidelines and watch others take their places in carrying out His plans and purposes in the earth? If you want to stand up and be counted, God is saying to you, "Prepare yourself: get ready!" God wants each of us to enter into and experience a greater move of His glory in our midst! In God's Greater Glory, Rev. Kenneth Hagin Jr. shows how God used the holy passion of generations past to spark great moves of His Spirit. In every age, God has had men and women who sensed what He wanted to do and committed themselves to pray about it so He could bring it to pass. This book will inspire members of the Body of Christ to drop personal agendas and seek the face of God for a greater move of His Spirit in our midst than we have ever seen. God wants this generation to experience a powerful display of His glory, and Rev. Hagin Jr. shows us how we can do it! Book jacket.

The Herald

In Rules for Reformers, Douglas Wilson poaches the political craft of radical progressives and applies it to Christian efforts in the current culture war. The result is a spicy blend of combat manual and cultural manifesto. Rules for Reformers is a little bit proclamation of grace, a little bit Art of War, and a little bit analysis of past embarrassments and current cowardice, all mixed together with a bunch of advanced knife-fighting techniques. As motivating as it is provocative, Rules for Reformers is just plain good to read. Thanks to Saul Alinsky's Rules for Radicals: A Practical Primer for Realistic Radicals—a book well-beloved by Barack Obama, Hillary Clinton, and many others—for much of the shrewd advice, and for none of the worldview.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Forced by her cruel father to wed his most despised enemy, the debauched Earl of Whitby, Lady Noelle Rivers is determined not to allow her spouse to win her love, much less her virtue

Brimming with down-to-earth wisdom and take-it-to-heart lessons, How to Deal With the Cares of Life is a timely message for every Christian. Dedicated to helping believers find spiritual strength to escape the pressures of everyday living, Rev. Charles Cowan drives home the urgent need for Christians to live in peace so they can be ready to do their part in the last great move of God upon the earth. From the pages of this inspiring book, you can learn how to walk down God's trail of hope to a life free of worry, anxiety, and fear. In an often-humorous manner, Rev. Cowan presents biblical keys to finding the way to life and peace. These keys can empower you to break the chokehold that cares may have on your spiritual life today and to walk in victory. Strengthen your stand of faith with Bible truths that answer these questions: How can I be free from a troubled mind? How are the cares of life most often introduced? How can I stay connected to the power of God? Book jacket.

MicroC/OS II Second Edition describes the design and implementation of the MicroC/OS-II real-time operating system (RTOS). In addition to its value as a reference to the kernel, it is an extremely detailed and highly readable design study particularly useful to the embedded systems student. God's Greater Glory

"This book includes the challenges and practical experience of the design of M-Learning environments, covering current developments in M-learning experiences in both academia and industry"--Provided by publisher.

Rapid Prototyping of Digital Systems, Second Edition provides an exciting and challenging laboratory component for an undergraduate digital logic design class. The more advanced topics and exercises are also appropriate for consideration at schools that have an upper level course in digital logic or programmable logic. Design engineers working in industry will also want to consider this book for a rapid introduction to FPLD technology and logic synthesis using commercial CAD tools, especially if they have not had previous experience with the new and rapidly evolving technology. Two tutorials on the Altera CAD tool environment, an overview of programmable logic, and a design library with several easy-to-use input and output functions were developed for this book to help the reader get started quickly. Early design examples use schematic capture and library components. VHDL is used for more complex designs after a short introduction to VHDL-based synthesis. A coupon is included with the text for purchase of the new UP 1X board. The additional logic and memory in the UP 1X's FLEX 10K70 is useful on larger design projects such as computers and video games. The second edition includes an update chapter on programmable logic, new robot sensors and projects, optional Verilog examples, and a meta assembler which can be used to develop assemble language programs for the computer designs in Chapters 8 and 13.

Neo-Hasidism applies the Hasidic masters' spiritual insights--of God's presence everywhere, of seeking the magnificent within the everyday, in doing all things with love and joy, uplifting all of life to become a vehicle of God's service--to contemporary Judaism, as practiced by men and women who do not live within the strictly bounded world of the Hasidic community. This first-ever anthology of Neo-Hasidic philosophy brings together the writings of its progenitors: five great twentieth-century European and American Jewish thinkers--Hillel Zeitlin, Martin Buber, Abraham Joshua Heschel, Shlomo Carlebach, and Zalman Schachter-Shalomi--plus a young Arthur Green. The thinkers reflect on the inner life of the individual and their dreams of creating a Neo-Hasidic spiritual community. The editors' introductions and notes analyze each thinker's contributions to Neo-Hasidic thought and influence on the movement. Zeitlin and Buber initiated a renewal of Hasidism for the modern world; Heschel's work is quietly infused with Neo-Hasidic thought; Carlebach and Schachter-Shalomi re-created Neo-Hasidism for American Jews in the 1960s; and Green is the first American-born Jewish thinker fully identified with the movement. Previously unpublished materials by Carlebach and Schachter-Shalomi include an interview with Schachter-Shalomi about his decision to leave Chabad-Lubavitch and embark on his own Neo-Hasidic path.
