START-UP NATION addresses the trillion dollar question: How is it that Israel-- a country of 7.1 million, only 60 years old, surrounded by enemies, in a constant state of war since its founding, with no natural resources-- produces more start-up companies than large, peaceful, and stable nations like Japan, China, India, Korea, Canada and the UK? With the savvy of foreign policy insiders, Senor and Singer examine the lessons of the country's adversity-driven culture, which flattens hierarchy and elevates informality-- all backed up by government policies focused on innovation. In a world where economies as diverse as Ireland, Singapore and Dubai have tried to re-create the "Israel effect", there are entrepreneurial lessons well worth noting. As America reboots its own economy and can-do spirit, there's never been a better time to look at this remarkable and resilient nation for some impressive, surprising clues.

Between the relative economic stability of the sixties and our troubled times now, the American Dream has become more Dream than American. Our economy is based on greed instead of merit. Our political system eschews wisdom for authoritarianism. Our cultural system promotes idolatry over harmony. We, the middle class, could blame this shift on recent events, but the reality is that the corruption of our economic, political, and cultural systems is far more insidious and deeply ingrained than we are led to believe. These trusted systems have become unbalanced. We have been active -- if not conscious -- participants of this decline, and we must now wake up. If the Iraq War and the market crisis of 2008 have taught us nothing else, we must learn the importance of recognizing when we are being misinformed. We must learn to think critically, sifting through the information that bombards us daily and separating fact from misinformation. Kirk D. Sinclair, PhD, approaches these complex and initially overwhelming concepts with the clear and thoughtful mind of a scientist. He scrutinizes, untangles, and exposes the issues, banishing doublespeak designed to make us complicit and encouraging us to step up and take responsibility for the systems that so dominate our lives. With this collection of intelligent, comprehensive essays, Sinclair has broken down the problems many of us did not even know we had. "Systems Out of Balance: How Misinformation Hurts the Middle Class" will arm you with valuable knowledge and an increased understanding of our social systems, how they affect our lives, and what you can do to restore the balance. The time to truly exercise our liberty is now.

The Toyota Way Fieldbook is a companion to the international bestseller The Toyota Way. The Toyota Way Fieldbook builds on the philosophical aspects of Toyota's operating systems by detailing the concepts and providing practical examples for application that leaders need to bring Toyota's success-proven practices to life in any organization. The Toyota Way Fieldbook will help other companies learn from Toyota and develop systems that fit their unique cultures. The book begins with a review of the principles of the Toyota Way through the 4Ps model-Philosophy, Processes, People and Partners, and Problem Solving. Readers looking to learn from Toyota's lean systems will be provided with the inside knowledge they need to Define the companies purpose and develop a long-term philosophy Create value streams with connected flow, standardised work, and level production Build a culture to stop and fix problems Develop leaders who promote and support the system Find and develop exceptional people and partners Learn the meaning of true root cause problem solving Lead the change process and transform the total enterprise The depth of detail provided draws on the authors combined experience of coaching and supporting companies in lean transformation. Toyota experts at the Georgetown, Kentucky plant, formally trained David Meier in TPS. Combined with Jeff Liker's extensive study of Toyota and his insightful knowledge the authors have developed unique models and ideas to explain the true philosophies and principles of the Toyota Production System.

The sports business is a dynamic and growing industry in the U.S., Europe, Asia Pacific and elsewhere. In addition to major sporting leagues and teams, related sectors include sporting goods manufacturing, sports apparel, sporting events broadcasting and retailing. Sports and professional athletes attract companies interested in endorsements, advertising, merchandising and marketing opportunities. Plunkett's Sports Industry Almanac 2008 covers such sectors, providing competitive intelligence, market research and business analysis. Our coverage includes sports business trends analysis and sports industry statistics. We also include a sports business glossary and a listing of sports industry contacts, such as industry associations. Next, we profile over 350 leading teams, leagues and sports sector companies. Profiles include business descriptions and up to 27 executives by name and title. Price includes a CD-ROM, which enables you to search, filter, view and export selected contact data, including executive names for mail merge and contact management. You'll find industry analysis, an overview and market research report of sports, sporting goods, sports marketing, stadiums, teams, and leagues business in one value-priced package.

This is a book about a new student that refuses to participate in class because of his concern about not being able to read. The student feels that he's not as smart as the other students and his self-esteem is very low. Everything changes when he makes a friend in class and the friend encourages the new student and then the student learns how smart he really is. This changes everything for the new student and he begins to excel.

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

"The second edition of this great book brings a wealth of updates and insights into international advertising. Barbara Mueller has a knack of drawing you in so that you find yourself unable to put each chapter down. One of the great strengths of the book is that it provides context, be it historic, societal or marketing, along with considerable depth of knowledge."---Douglas West, University of Birmingham --
