The last few decades have seen a stretching and exchange of local, regional and national languages, identities, cultures, and economies worldwide as a consequence of globalisation and technology development. Significantly, the languages of the Middle East, Africa, Asia, the Netherlands, Scandinavia, Eastern Europe and Russia have been attracting increasing strategic, commercial and civic attention. Collectively referred to as ' Languages of the Wider World ' (LWW), these languages are important given the emergence of new centres of

capital and cultural accumulation in the 21st century, such as Brazil, Russia, India and China (BRICs). This volume focuses on LWW in use, and on their teaching and learning. It ranges from a highly localized focus (on learners and teachers of Community/Heritage Languages), to broader national and international foci (on policy makers and multilingualism; on teachers in primary, secondary and tertiary systems). It aims to inspire researchers and practitioners to work on languages other than the ones that have been the mainstay of the field to facilitate the development of a vibrant and critical community of enquiry in Languages of the Wider World. This book was originally published as a special issue of the Language Learning Journal.

This volume provides the most exhaustive and comprehensive treatment available of the Verb Second property, which has been a central topic in formal syntax for decades. While Verb Second has traditionally been considered a feature primarily of the Germanic languages, this book shows that it is much more widely attested cross-linguistically than previously thought, and explores the multiple empirical, theoretical, and experimental puzzles that remain in developing an account of the phenomenon. Uniquely, formal theoretical work appears alongside studies of psycholinguistics, language production, and language acquisition. The range of languages investigated is also broader than

in previous work: while novel issues are explored through the lens of the more familiar Germanic data, chapters also cover Verb Second effects in languages such as Armenian, Dinka, Tohono O'odham, and in the Celtic, Romance, and Slavonic families. The analyses have wide-ranging consequences for our understanding of the language faculty, and will be of interest to researchers and students from advanced undergraduate level upwards in the fields of syntax, historical linguistics, and language acquisition.

Grammaticalization research has increasingly highlighted the notion of constructions in the last decade. In the wake of this heightened interest, efforts have been made in grammaticalization research to more precisely articulate the largely pretheoretical notion of construction in the theoretical framework of construction grammar. As such, grammaticalization research increasingly interacts and converges with the emerging field of diachronic construction grammar. This volume brings together articles that are situated at the intersection of grammaticalization research and diachronic construction grammar. All articles share an interest in integrating insights from grammaticalization research and construction grammar in order to advance our understanding of empirical cases of grammaticalization. Constructions at various levels of abstractness are investigated, both in well-documented languages, such as Ancient Greek, Latin, Spanish, German, Norwegian and English, and in less-described languages, such as Manchu and Mongolian.

*audience. "Once there was a tree...and she loved a little boy." So begins a story of unforgettable perception, beautifully written and illustrated by the gifted and versatile Shel Silverstein. This moving parable for all ages offers a touching interpretation of the gift of giving and a serene acceptance of another's capacity to love in return. Every day the boy would come to the tree to eat her apples, swing from her branches, or slide down her trunk...and the tree was happy. But as the boy grew older he began to want more from the tree, and the tree gave and gave and gave. This is a tender story, touched with sadness, aglow with consolation. He is also the creator of picture books including *A Giraffe and a Half*, *Who Wants a Cheap Rhinoceros?*, *The Missing Piece*, *The Missing Piece Meets the Big O*, and the perennial favorite *The Giving Tree*, and of classic poetry collections such as *Where the Sidewalk Ends*, *A Light in the Attic*, *Falling Up*, *Every Thing On It*, *Don't Bump the Glump!*, and *Runny Babbit*. In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

This book is the third in a three-volume set that celebrates the career and achievements of Cliff Goddard, a pioneer of the Natural Semantic Metalanguage approach in linguistics. This third volume explores the potential of Minimal English, a recent offshoot of the Natural Semantic Metalanguage, with special reference to its use in Language Teaching and Intercultural Communication. Often considered the most fully developed, comprehensive and practical approach to cross-linguistic and cross-cultural semantics, Natural Semantic Metalanguage is based on evidence that there is a small core of basic, universal meanings (semantic primes) that can be expressed in all languages. It has been used for linguistic and cultural analysis in such diverse fields as semantics, cross-cultural communication, language teaching, humour studies and applied linguistics, and has reached far beyond the boundaries of linguistics into ethnopsychology, anthropology, history, political science, the medical humanities and ethics.

This volume approaches contemporary multilingualism as a new linguistic dispensation, in urgent need of research-led, reflective scrutiny. The book addresses the emergent global and local patterns of multilingual use and acquisition across the world and explores the major trends that characterize today's multilingualism. It is divided into three parts on the basis of the broad themes: education (including multilingual learning in its general, theoretical aspects), sociolinguistic dimensions and language policy. The book's fifteen chapters, written by renowned international experts, discuss a range of issues relating to the quintessential and unique properties of multilingual situations- issues relevant to the challenges faced in different ways by researcher and practitioners alike. All the contributions share a focus on currently operative patterns of interaction between contexts, events and

unique novel, which is not only a mystery, but also a complete and entertaining history of philosophy. This book is unique in bringing together theory, research, and practice about English encountered outside the classroom - extramural English - and how it affects teaching and learning. The book investigates ways in which learners successfully develop their language skills through extramural English and provides tools for teachers to make use of free time activities in primary and secondary education. The authors demonstrate that learning from involvement in extramural English activities tends to be incidental and is currently underutilized in classroom work. A distinctive strength is that this volume is grounded in theory, builds on results from empirical studies, and manages to link theory and research with practice in a reader-friendly way. Teacher-educators, teachers and researchers of English as a foreign language and teachers of English as a second language across the globe will find this book useful in developing their use of extramural English activities as tools for language learning.

He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you’ll begin to tackle words, and connect sounds and spellings to imagery rather than translations,
