The Great American Recession resulted in the loss of eight million jobs between 2007 and 2009. More than four million homes were lost to foreclosures. Is it a coincidence that the United States witnessed a dramatic rise in household debt in the years before the recession—that the total amount of debt for American households doubled between 2000 and 2007 to \$14 trillion? Definitely not. Armed with clear and powerful evidence, Atif Mian and Amir Sufi reveal in *House of Debt* how the Great Recession and Great Depression, as well as the current economic malaise in Europe, were caused by a large run-up in household debt followed by a significantly large drop in household spending. Though the banking crisis captured the public's attention, Mian and Sufi argue strongly with actual data that current policy is too heavily biased toward protecting banks and creditors. Increasing the flow of credit, they show, is disastrously counterproductive when the fundamental problem is too much debt. As their research shows, excessive household debt leads to foreclosures, causing individuals to spend less and save more. Less spending means less demand for goods, followed by declines in production and huge job losses. How do we end such a cycle? With a direct attack on debt, say Mian and Sufi. More aggressive debt forgiveness after the crash helps, but as they illustrate, we can be rid of painful bubble-and-bust episodes only if the financial system moves away from its reliance on inflexible debt contracts. As an example, they propose new mortgage contracts that are built on the principle of risk-sharing, a concept that would have prevented the housing bubble from emerging in the first place. Thoroughly grounded in compelling economic evidence, *House of Debt* offers convincing answers to some of the most important questions facing the modern economy today: Why do severe recessions happen? Could we have prevented the Great Recession and its consequences? And what actions are needed to prevent such crises going forward?

Ferrari Fever is a fascinating and nostalgic look back at the classic car collecting scene in the 60's and 70's, an era when some of the rarest and most interesting Italian automobiles could still be found hidden or languishing in barns, junkyards or by the side of the road...almost lost in time. Paul Schouwenburg's story begins in wartime occupied Amsterdam, a poignant backdrop to the hardships of the years to follow, when the appearance of any exotic Italian thoroughbred was a rare sight indeed. Fuelled by a fascination for all things mechanical, adventures on a Rudge bicycle and early experiences in his parents' succession of Rovers, Paul gains a burning passion for finding, restoring, and ultimately racing Italian cars. But these were not just any Italian cars -from the early 60s onwards, he begins to uncover several rare Alfas, from 1900CSS Zagato to Tipo 33/2, in addition to a host of very special Ferraris, including a 250GTO, 340 America Touring, 250 MM Vignale Berlinetta, 250GT SWB Competition/61 and 275GTB/C/LM, usually by word of mouth or tenuous rumour. Having acquired them, often many different models at a time, he would drive them home across Europe through snow storms, and restore them single-handedly in his spare time, full-time job as a world-leading head and neck cancer surgeon permitting! If that wasn't exciting enough, he would then race them, often winning, before moving on to the next irresistible project. Filled with rich anecdotes and rare insights into the colourful characters of the day, including Jacques Swaters and Rob de la Rive Box, Paul's passion and incredible drive make for exciting reading. Indeed this is a unique take, a look in the rear view mirror at a bygone era when gems could be found incredibly cheaply and enthusiasts took seat-of-the-pants decisions regarding many aspects of a hobby which was uncharted, innocent and simply not as commercial as today he couldn't even give away his 250 GTO at the time!

In *Yoga: Awakening the Inner Body*, Donald Moyer draws on over thirty years of yoga teaching and practice experience. His groundbreaking work is designed for yoga students and teachers to develop a home practice and to deepen their understanding of all aspects of yoga—the anatomical, the physiological, the mental, and the spiritual. In Part One, "Finding Inner Balance," he offers a comprehensive guide for the practice of yoga's two most important inverted poses. These two chapters help you select props according to your body type, and suggest ways to check your alignment once you are in the pose. • Salamba Sarvangasana (Shoulderstand), including variations and alternatives • Salamba Sirsasana (Headstand), including variations and alternatives Part Two, "Themes and Variations," consists of six chapters, each focusing on a different aspect of the upper body. Each chapter begins with an anatomical introduction that establishes the theme to be explored in the subsequent practice sequence. The sequences include standing poses, backbends, twists, inverted poses, forward bends, pranayama (breathing practice), and relaxation. • The Three Diaphragms: balance your three diaphragms (pelvic, respiratory, and thoracic) to facilitate movement and improve breathing • Balance Your Sternum: align your sternum—the manubrium (upper sternum), the sternal body, and the xiphoid process—to free your upper spine • Collarbones, Kidneys, and Groins: discover an effortless way to stabilize the pelvis, open the shoulders, and lengthen the spine • Align Your Shoulder Blades: work with a circular movement of your shoulder blades to create space in your shoulder joints • Stabilize Your Elbows: learn how to strengthen your arms by stabilizing your elbow joints • Strengthen the Base of Your Neck: activate the deeper muscles of your neck for a strong and healthy cervical spine
