advice , hints and tips on choosing, driving, handling, maintaining and repairing a jet ski - the complete owner's manual. Many owners will prefer to service and maintain their own machine (much like they would with an outboard motor), rather than take it to a service agent, and the step by step photos in this book will enable them to do just this. This is a brand new, highly illustrated step-by-step guide for the jet ski owner (of which there are many in the UK alone) which provides helpful advice on all the aspects

Bell Harbor is a one-million copy bestselling series.

Everyone in Bell Harbor thinks career-minded plastic surgeon Evelyn Rhoades needs a husband. Everyone, that is, except for Evelyn...sort of. Even if she did want a husband (which she doesn't...most of the time), she'd never let something as intangible as fate determine who she marries. No, if she's going to find someone to spend her life with, she'll do it scientifically: with a carefully crafted list of criteria and an Internet dating site. But when

intoxicated, law-breaking Tyler Connelly crashes into her life by way of a stolen Jet Ski, unruly emotions defy common sense. Sure, he's sexy, charming, and determined to win Evelyn's affection, but all evidence points to him being the worst possible choice. He's too young for her. Too irresponsible. Too underemployed. And, oh yeah, he's her patient. But Tyler knows firsthand how the best-laid plans can crumble under the weight of destiny. Now all he needs to do is to teach Evelyn that, in matters of the heart, love often supersedes logic.

Locally Brewed celebrates the Midwest's craft brewing movement with profiles of 20 of the area's brewmasters and their breweries. These are entertaining and inspiring stories of the individuals who have been essential in the exponential growth of this movement, as told through vivid interviews, beautiful photography, and dynamic artwork. In just the past 20 years, beer has been transformed from a "low-class" drink to a pluralistic, populist drink with the same stylistic diversity and caring craftsmanship as wine. One of the strongest hotbeds of this cultural

shift is in the Midwest, where independently owned craft brewers focus on the creative, artisanal elements of the beer-making process. Locally Brewed explores these trends and the fun, fascinating, and unique details of each brewery, including label art, hand-pull designs, and of course the brews themselves. This is a book that can be enjoyed by the “beer geek” and the casual imbibers alike, as it emphasizes the people behind the beer as well as the beers they brew. Special sidebars and pullouts show what makes each brewery special, weaving together the story of the indie beer movement,

The United States faces major challenges in dealing with Iran, the threat of terrorism, and the tide of political instability in the Arabian Peninsula. The presence of some of the world's largest reserves of oil and natural gas, vital shipping lanes, and Shia populations throughout the region have made the peninsula the focal point of US and Iranian strategic competition.

Numerical procedures based on the 2-D and 3-D full potential equations and the 2-D Navier-Stokes equations were developed to study the effects of leading and trailing edge flap motions on the aerodynamics of parallel airfoil-vortex interactions and on the aerodynamics and acoustics of the more general self-generated rotor blade vortex interactions (BVI). For subcritical interactions, the

2-D results indicate that the trailing edge flap can be used to alleviate the impulsive loads experienced by the airfoil. For supercritical interactions, the results show the necessity of using a leading edge flap, rather than a trailing edge flap, to alleviate the interaction. Results for various time dependent flap motions and their effect on the predicted temporal sectional loads, differential pressures, and the free vortex trajectories are presented. For the OLS model rotor, contours of a BVI noise metric were used to quantify the effects of the trailing edge flap on the size and directivity of the high/low intensity noise region(s). Average reductions in the BVI noise levels on the order of 5 dB with moderate power penalties
