Automakers are as prone to turn out clunkers as politicians are to lie. Their cars may be ugly, misconceived, badly built, diabolical to drive, ridiculously thirsty, or just plain unreliable. So which were the worst of the past 20 years?

This is the story of the middle two generations of the 3-series: the E36 and E46 generations. By the start of the 1990s, the sports sedan was an established car type, just like the muscle car, minivan or SUV. This is thanks to BMW which created the class with its first two generations of the 3-series. Every other car company had to have one, especially makers of upscale automobiles. Therefore, BMW had its hands full when it came time to create the third rendition of this class-creating car. So the company went out and boldly designed and built a completely new car, the E36, as the third generation of 3-series is called. The car reached a note of perfection in looks, handling and choices. This was despite the huge corporate problems BMW was having at the time. The fourth generation of the 3-series, the E46 was much more of a subtle change from the E36. This bit with BMW's philosophy of only making radical changes to its cars every other generation. Although not much different looking on the outside, the newer generation 3-series now had even more features and options for the sports sedan buyer.

An exclusive look at one of the world's most successful and controversial companies, and the mysterious family behind it. BMW is arguably the most admired carmaker in the world. It's financial performance is the envy of its competitors, and BMW products inspire near-fanatical loyalty. While many carmakers struggle with falling sales, profits and market share, demand for BMWs continues to grow, frequently outpacing production. Now, David Kiley-Detroit Bureau Chief at USA Today and author of Getting the Bugs Out, which covered Volkswagen's demise and rebirth, goes inside the fabled German automaker to see how it does what it does so well. With unprecedented access to BMW executives, Kiley goes behind the walls of BMW's famed "Four Cylinders" headquarters in Munich at a time when the company is in its most aggressive, and some say riskiest, expansion in its history and when some of the company's new products, like the 7 Series sedan and Z4 roadster, are for the first time drawing as many barbs from critics as bouquets. Kiley covers intimate details of the boardroom drama surrounding the company's nearly disastrous acquisition and subsequent sale of the British Rover Group and its expansion into selling MINI and Rolls Royce cars. Besides being a world-class carmaker, BMW is also considered one of the smartest consumer marketing companies and Kiley explores the extraordinary value and management of the BMW brand mystique. He also takes a revealing look at the mysterious and ultra-private Quandt family of Bad Homburg Germany, which owns a controlling stake in BMW: Johanna and Susanne Quandt, two of the wealthiest women in Europe and Stefan Quandt, one of the wealthiest bachelors on the continent. David Kiley (Ann Arbor, MI) is the Detroit Bureau Chief at USA Today who has covered the auto industry for 17 years. He has been featured on Nightline, CNBC, CNN, MSNBC, NPR and the Today show. He is also the author of Getting the Bugs Out: The Rise, Fall, and Comeback of Volkswagen in America (0-471-26304-4), also available from Wiley.

Die Analyse eines Verkehrsunfalls erfordert zusätzliches Wissen, das im Normalfall nicht während des Studiums vermittelt wird. Daher wird die Analyse von Verkehrsunfällen in der Regel von spezialisierten Sachverständigen vorgenommen. Das dazu nötige Wissen wurde Anfang der 80er Jahre bereits in einer früheren Auflage dieses Handbuchs veröffentlicht. Jetzt hat ein Autorenteam die lange fällige Neubearbeitung erstellt. Die Autoren sind Experten auf ihrem jeweiligen Gebiet und stellen die Arbeitsmittel in zeitgemäßer Darstellung bereit. Dabei werden computergestützte Arbeitsmethoden berücksichtigt. Es werden auch die Wünsche und Forderungen von Verkehrssicherheits- und Unfallforschern berücksichtigt, die nach einer thematisch vollständigen Arbeitsunterlage suchen. Damit steht ein zeitgemäßes, methodisch zuverlässiges und einheitliches Werk für die Analyse von Verkehrsunfallabläufen zur Verfügung.

The paper investigates the divergence between inflation and monetary expansion in Zimbabwe since late 2003. The substantial decline in velocity and increasing levels of real money balances during 2004 are at odds with a record of inflation closely tracking the growth rates of monetary aggregates in the past. Possible explanations for the divergence include an unstable demand for money, a sudden shift in the underlying demand for real balances due to a sharp change in an explanatory variable, and a structural break or aberration in a normally stable money demand relation reflecting some unexplained factor such as repressed inflation (given administered prices) or measurement errors in the consumer price index. The results of the study point to the last possibility as the most likely explanation.

This book describes the discusses advanced fuels and combustion, emission control techniques, after-treatment systems, simulations and fault diagnostics, including discussions on different engine diagnostic techniques such as particle image velocimetry (PIV), phase Doppler interferometry (PDI), laser ignition. This volume bridges the gap between basic concepts and advanced research in interna reference for both students and researchers whose work focuses on achieving higher fuel efficiency and lowering emissions.

A new collection that captures the austere serenity of the Southwest American desert. Award-winning, Paris-based poet Alice Notley's adventurous new book is inspired by the life of Marie, a woman who resided in the dump outside Notley's hometown in the Southwestern desert of America. In this poetical fantasy, Marie becomes the ultimate artist/poet, composing a codex-calligraphy, writing She is a "culture of one." The story is told in long-lined, clear-edged poems deliberately stacked so the reader can keep plunging headlong into the events of the book. Culture of One offers further proof of how Notley "has freed herself from any single notion of what poetry should be so that she can go ahead and write what poetry can be" (The Boston Review).

Few cars in recent years have inspired such devotion among enthusiasts as the BMW M3. Now entering its fifth generation, BMW's compact performance car is recognized worldwide as the benchmark of its type. BMW M3 - The Complete Story looks in detail at the first four generations of the M3, which arrived in the mid-1980s as an E30 'homologation special', intended to keep BMW ahead of rivals Mercedes-Benz on the racetracks. But the M3 soon became very much more than that. Before long, buyers latched onto its exclusivity and turned it into a status symbol - and BMW was only too happy to exploit that. For all fans of the BMW M3, this book provides the essential background. It is packed with facts and details that make the M3 legend come alive. With over 250 photographs, the book covers: the original E30 M3 of 1986 - from a 'homologation special' to a status symbol; design and development of the E36 M3, including a new 6-cylinder engine and more body choices; the E46 M3 of 2000, with the developed 6-cylinder S54 engine and gearshift advances; racing success for the E90-series M3s, introduced in 2007 with V8 engines; driving, buying and special editions of all the models.

?Obwohl Auktionen und Revenue Management in verschiedenen Branchen bereits weitreichende Anwendung zur Ertragsoptimierung finden, sind diese Instrumente in der Automobiindustrie bis dato nahezu unberücksichtigt. Auf Basis einer fundierten theoretischen Aufarbeitung des Themenfelds wird in der vorliegenden Arbeit ein hybrides Distributionsmodell aus Auktion und Revenue Management entwickelt, das unter Berücksichtigung automobilspezifischer Marketingaspekte auf Ertragsmaximierung für den Automobilhersteller abzielt. Die Reifegrade erfolgskritischer Prozesse werden ergänzend ebenso betrachtet wie spieltheoretische Aspekte der Auktion im Distributionsmodell.

This book examines the challenges faced by seven multinational companies - Intel, Lenovo, Samsung Electronics, ZTE, BMW Hyundai Motor Company, Mahindra and Mahindra - in their endeavour to contribute to the economic, environmental and social development of Asia. The lessons learned from the examination of these business practices may directly contribute to an increase in the practice of sustainable management and may as such contribute to positive economic, environmental and social impact of companies in this region. The cases are highly relevant for management theoreticians seeking to deepen our understanding of corporate sustainability in an area where scholars, practitioners and policy-makers can expect new questions, problems and challenges in the years ahead. The book is also of high interest to policy review agencies, policy makers and welfare economists seeking to support the development of a comprehensive sustainability framework for managing social and environmental issues in the context of Asia.
