Why Social Security is not only sustainable but should be substantially expanded Social Security is bankrupting us. It's outdated. It's a Ponzi scheme. It's stealing from young people. These are some of the biggest myths and lies about one of the most successful programs in our nation's history. Three-quarters of Americans depend

A well-financed campaign—supported by conservatives, special interest groups, and even leading Democrats—has lobbied for cuts and significant “entitlement reform,” falsely proclaiming that Social Security is going

Here he proposes how we can double the monthly benefit and how to pay for it by closing many of the tax loopholes and deductions that disproportionately favor the wealthy few. of the regions small businesses or SMEs. SMEs have helped drive economic development, growth and aided in increasing the size of the Continents middle class, Sanders says. With the Introduction to the book by renown civil rights leader Ambassador Andrew Young, and the Foreword by Sub Saharan Africas leading businessman, Mr. Aliko Dangote, Sanders book credits the determination of Africa SMEs and entrepreneurs (which includes African nationals, immigrants and African

Americans) for stepping into the void left by 40-years of post-independence development approaches that had little impact on reducing overall poverty and creating jobs in the region. Africas dynamic entrepreneurial spirit of Generation-Xers and Millennials are and have formed SMEs and social enterprises that today are responsible for conceiving and inventing many of the new apps, and answers to address the regions age-old poverty issues, Sanders emphasizes. Africa SMEs are

Wced

not only a key driver for jobs, but serve as an additional catalyst to grow the middle class. Sanders argues that it was the Rise of the Africa SME converging with technology and its mobility that has changed, over the last decade, the focus and direction of development in Sub Saharan Africa. The book has a few vignettes from Sanders diplomatic life and work as CEO of the FEEEDS Advocacy Initiative with Africa SMEs over the years, as well as regional examples of some of

innovative things Africa entrepreneurs are doing in sectors ranging from agriculture and food security to energy and climate change. The book also walks readers through what donors, foundations and African stock markets are doing today to help in the SME space. Sanders ends with recommendations of what more can be done by donors, African governments, and the new U.S. administration to further assist Africa SMEs, particularly the group she calls the critical mass, and

India have emerged as particularly prominent partners, most notably as suppliers of intellectual talent to the United States. In The Conflicted Superpower, Andrew Kennedy explores how the world's most powerful country approaches its growing collaboration with these two rising powers. Whereas China and India have embraced global innovation, policy in the United States is conflicted. Kennedy explains why, through in-depth case studies of U.S. policies

Wced

toward skilled immigration, foreign students, and offshoring. These make clear that U.S. policy is more erratic than strategic, the outcome of domestic battles between competing interests. Pressing for openness is the “high-tech community”—the technology firms and research universities that embody U.S. technological leadership. Yet these pro-globalization forces can face resistance from a range of other interests, including labor and anti-immigration groups, and the nature of

Wced

this resistance powerfully shapes just how open national policy is. Kennedy concludes by asking whether U.S. policies are accelerating or slowing American decline, and considering the prospects for U.S. policy making in years to come. International business and globalization requires governments to operate in a context different than before, which is to integrate other participants of diplomacy in its own decision-making processes. Governments have been focusing on new strategies,

Wced

such as involving ministries and non-state actors and institutions, providing greater transparency, and acting collectively. Facing the challenges of an increasingly complex world Diplomats are not the only actors involved in the diplomatic process because due to globalization, many actors such as NGOs, international organizations and individuals can be seen practicing diplomacy. Diplomacy is a course of actions, based on the exchange of ideas, values and traditions to reinforce

the business relationships, improve the social cooperation and stimulate the national interests, with respects to globalization. Diplomacy, due to globalization the mass communication technology help access between people to promote peace & stability all over the world because it influences the opinion globally of businesses, trade, individuals, communities, cultures and countries (Kamsaris, 2020). The tactics to form international relations can be described either hard or soft power

and according to Nye soft power is the ability to persuade and get what you want through culture, values and ideas through attraction rather than coercion or payments, while hard power involves activating forces. Through soft power, the use of cultural diplomacy becomes significant (Kamsaris, 2020). Regarding the international business world, the will and ability to appreciate and embrace the diverse values and needs of dissimilar cultures is important for the strategic decisions and adopt

diplomacy models tactics by increasing social awareness of international companies engaged in the development of culturally sensitive marketing plans and campaigns in order to build positive public opinion, form a good image, free of local problems, conduct research regarding the cultural differences of the new country and international companies with local focus (Kamsaris, 2020). Bound states that the internet has created a world where cultures meet and mix and reform easily and constantly

and countries are increasingly finding that they need to reaffirm their sovereignty to stop their cultures being swamped or changed by access to other cultural outputs. As Mark says, a state's international cultural mission now involves a more active role in protecting and developing country culture. A country's cultural identity needs to be strong and constantly reinforced and revitalised, or it will be flooded and lost. A culture is the set of values which underpins a country and the way that other

countries use to understand you. Culture for Ribeiro is a non-threatening, inclusive way of communicating with people. It is powerful because it is universal and is shared as it is a manifestation of human genius and achievement and is charged with symbolic meaning. What Every Woman Needs to Know to Bring About Change in the Voting Booth
In a presidential election year with our currently divided political climate, it is more important than ever for women voters to be educated and informed about issues that affect them deeply. Your Voice, Your Vote 2020-21 Edition is a manifesto for every woman voter and for male voters who care about the women in their lives. Martha Burk empowers the reader to cut through the double talk, irrelevancies, and false promises, and focuses directly on what's at stake for women not only from now through the 2020 election, but also in

answer lies in a conflict between two worlds. One is the dynamic, global, commercial world with its thriving innovations. The other is the world of national security, in which innovation is a matter of life or death. The conflict is about secrecy. *Innovating in a Secret World* is a detailed examination of the U.S. government and innovation landscapes and of the current trends in often secret national security-related research and development (R&D). Based on case studies, detailed research, and interviews with executives at Fortune 500s, startup entrepreneurs, and military directors and program managers, this accessible and timely book is a must-read. Tina P. Srivastava evaluates whether the strategy of technology innovation in the world of national security leaves certain innovations behind or unintentionally precludes certain classes of innovators

from participating. She identifies the unintended consequences and emergent behaviors of this conflict. This examination unfolds in a complex, dynamic system that includes the legal framework in which technology innovation must exist. For more than a decade Srivastava has been on the front lines of cutting-edge technology innovation. She suggests focusing on an emerging class of R&D strategy called "open innovation"--a strategy that broadens participation in innovation beyond an individual organization or division traditionally assigned to perform R&D activities. Through compelling stories of commercial and early government applications, she shows how open technology innovation strategies can enable, accelerate, and enhance technology innovation. Successful incorporation of open innovation into the previously closed U.S. government R&D

Owens provides a historical analysis of the ideological movements and reform efforts leading to the Common Core State Standards, beginning with conservative criticism of public schools in the 1930s and culminating in a convergence of the political right and left in efforts to systemically reform education based on free market principles.

numerous states have declared cyberspace as a new domain of warfare, sought to develop a military cyber strategy and establish a cyber command. These developments have led to much policy talk and concern about the future of warfare as well as the digital vulnerability of society. No Shortcuts provides a level-headed view of where we are in the militarization of cyberspace. In this book, Max Smeets bridges the divide between technology and policy to assess the necessary building blocks for

states to develop a military cyber capacity. Smeets argues that for many states, the barriers to entry into conflict in cyberspace are currently too high.

Accompanied by a wide range of empirical examples, Smeets shows why governments abilities to develop military cyber capabilities might change over time and explains the limits of capability transfer by states and private actors.

There is little doubt that cyber-space has become the battle space for confrontations. However, to conduct cyber operations, a new armory of weapons needs to be employed. No matter how many, or how sophisticated an aggressor's kinetic weapons are, they are useless in cyber-space. This book looks at the milieu of the cyber weapons industry, as well as the belligerents who use cyber weapons. It discusses what distinguishes these hardware devices and software

programs from computer science in general. It does this by focusing on specific aspects of the topic—contextual issues of why cyber-space is the new battleground, defensive cyber weapons, offensive cyber weapons, dual-use weapons, and the implications these weapons systems have for practice. Contrary to popular opinion, the use of cyber weapons is not limited to nation states; though this is where the bulk of news reporting focuses. The reality is that there isn't a sector of the political-

economy that is immune to cyber skirmishes. So, this book looks at cyber weapons not only by national security agencies and the military, but also by law enforcement, and the business sector—the latter includes administrations termed non-government organisations (NGOs). This book offers study material suitable for a wide-ranging audience—students, professionals, researchers, policy officers, and ICT specialists.
