*1105 Yakima Sreet Cedar Cove, Washington Dear Reader, You've probably heard that my wife has left me. Rachel's pregnant, and she says she can't handle the stress in our household anymore. My thirteen-year-old daughter, Jolene, is jealous of her. Maybe it's my fault. As a widower I spoiled her— Jolene was reading over my shoulder just now and says that's not true. She claims Rachel ruined everything. But that's not true. The real question is: How can I get my wife back? I don't even know where she is. She's not with Teri Polgar or any of her other friends from the salon. The other question is...when will Jolene grow up and stop acting like such a brat? Of course, I'm not the only one in town with problems. Linc Wyse's father-in-law is trying to destroy his business. And you know Charlotte Rhodes? Seems she's becoming forgetful, and the family's worried about her and Ben. Lots of other stuff going on—but Rachel is better at keeping up with it than I am. If you have any idea where my wife is, give me a call. Please. Bruce Peyton*

*For the past 60 years, the widow Mary McAllister has secluded herself in her marble mansion overlooking the town of Mill River, and only the priest, Father O'Brien, knows the deep secrets that keep Mary isolated—and that, once revealed, will forever change the community. Original.*

*Packed with spectacular superlatives, shocking stats, fantastic facts and fun figures, Science and Stuff celebrates the simple joy in finding things out. What can cats teach us about the laws of physics? Why was cabbage banned on the International Space Station? (Can you fart in space?) And would a penny dropped from the Empire State Building really kill someone? (Short answer: No!) But it's not all facts and stats. The feature chapter just for Makers, introduced by our very own mad professor Burnaby Q. Orbax, challenges you to attempt record-breaking science experiments at home, from the fastest Mentos & Soda rocket car to the most slime thrown and caught in a minute! Join us as we rise from the deepest depths of the ocean, where weird glowing fish hunt in the darkness, to the mountaintop observatories where scientists unravel the secrets of the universe.*

*Information Technology in a Global Society is the first textbook written specifically for the new IB ITGS syllabus, covering IT systems, social impacts and ethical issues, and each area of application. The text provides engaging content that blends clear examples of technical concepts with consideration of social issues. Discussion points for extended independent learning and complete, modern examples are included to enhance teaching and understanding, and ensure students get the best possible experience from the ITGS course. A free sample chapter is available on the book's web site, [www.itgstextbook.com](http://www.itgstextbook.com). Textbook features include: Clear objectives for each chapter, tied directly to the ITGS syllabus, so you can be sure that all aspects of the course are being covered. Course content is explained through clear and up to date examples, plus historical context. Over 200 varied exercises, mixing ethical discussion points, classroom exercises, practical activities, and exam style questions to cover the syllabus content from a variety of assessment angles. Theory of Knowledge (TOK) links are included, enabling integration with the IB core hexagon. Common mistakes and misconceptions are highlighted so students can avoid them.*

*Key language review for every chapter, plus a complete glossary of ITGS terminology. Over 300 diagrams, photographs, and illustrations to bring topics alive. Fully cited examples in every chapter mean students can extend their learning with wider reading-an essential part of IB courses. Free online support to extend learning with additional case studies, links, and activities ([www.itgstextbook.com](http://www.itgstextbook.com)).*

An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of *Battle Hymn of the Tiger Mother*). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.
