With nods to Tim Burton, Edward Gorey, and Neil Gaiman, this humorous picture book about a Victorian boy obsessed with monsters presents a dark and appealing world, created by debut author/illustrator Sam Streed. In the graveyard, between stone monuments for forgotten souls, lurks the Black Shuck. . . . Its one blood-red eye burns with an undying rage. After reading about the slimy Nixie, the angry Black Shuck, and the creepy Lantern Man in his beloved Book of Monsters, Alfred decides to invite the monsters to teatime with his crusty old aunty, who thinks monsters are an improper obsession for a respectable young boy.

Part of the Gibbs Smith Women's Voices series: A collection of literary voices written by, and for, extraordinary women—to encourage, challenge, and inspire. Louisa May Alcott (1832–1888) published more than thirty books in her lifetime, but it was her "girls' story" (written at the request of her publisher), Little Women, that has captured the imagination of millions of readers. This coming-of-age story spotlights beloved tomboy Jo March (arguably America's first juvenile heroine and a reflection of a young Alcott herself) and Jo's three sisters—Meg, Beth, and Amy—in a heartwarming family drama. Originally published in two parts, in 1868 and 1869, Little Women has never been out of print. Continue your journey in the Women's Voices series with Jane Eyre, by Charlotte Bronte (ISBN: 978-1-4236-5099-7), The Feminist Papers, by Mary Wollstonecraft (ISBN: 978-1-4236-5097-3), Hope Is the Thing with Feathers, the complete poems of Emily Dickinson (ISBN: 978-1-4236-5098-0), and The Yellow Wallpaper and Other Writings, by Charlotte Perkins Gilman (ISBN: 978-1-4236-5213-7).

"Slow violence" from climate change, toxic drift, deforestation, oil spills, and the environmental aftermath of war takes place gradually and often invisibly. Rob Nixon focuses on the inattention we have paid to the lethality of many environmental crises, in contrast with the sensational, spectacle-driven messaging that impels public activism today.

Texts from Mittens is a series of text message conversations between a snappy, self-absorbed housecat named Mittens and his long-suffering human, a single woman who works away from home during the day. Mittens relentlessly hassles his human all day long, while only taking breaks to watch Judge Judy, hang with his best friend Stumpy, complain about the antics of Drunk Patty the neighbor, ask Grandma for money to buy useless items from QVC, and harass the "filthy beast" dog, Phil. Angie Bailey is an award-winning writer and blogger, humorist, and professional member of the Cat Writers' Association. Her primary blog, Catladyland, has won many awards, and her humor writing is featured nearly daily on Catster.com, one of the most popular cat sites on the Web. She loves to photograph her cats in silly poses and sleeps with one eye open. And yes, she has three cats. "Each installment of Texts From Mittens is like a little gift to brighten your day!" –Kate Benjamin, Hauspanther founder and co-author of Catification with Jackson Galaxy "Texts From Mittens makes me wish my cat had thumbs! This is a hilarious book; Angie Bailey has done it again!" –Jeremy Greenberg, Author of Sorry I Barfed on Your Bed "We all knew that cats were hilarious, but Ms. Bailey's sardonic cat quips really take their mannerisms, attitude and occasional apathy to another level." –Susan Michals, Curator of Cat Art Show Los Angeles Come home! There's an emergency! What?? Are you OK? My dish is half empty! I'll be home soon. You wish starvation upon me! Stop being dramatic. Am weak. Can hardly type. Are you going to wear those black pants on your bed? Yes. I have a date. They're comfortable. Mittens, get off my pants! FYI: Poly-blend makes your butt look big

WINNER OF THE PENDERYNS MUSIC PRIZE A GUARDIAN MUSIC BOOK OF THE YEAR, 2015 FEATURING A NEW FOREWORD BY DAVID MITCHELL In America, in London, in Amsterdam, in Paris, revolutionary ideas fomenting since the late 1950s reached boiling point, culminating in a year in which the transient pop moment burst forth. Exploring the canonical figures, from The Beatles and Boty to Warhol and Reagan, 1966 delves deep into the social and cultural heart of the decade through masterfully compiled archival primary sources.

Since 1980, the number of people in U.S. prisons has increased more than 450%. Despite a crime rate that has been falling steadily for decades, California has led the way in this explosion, with what a state analyst called "the biggest prison building project in the history of the world." Golden Gulag provides the first detailed explanation for that buildup by looking at how political and economic forces, ranging from global to local, conjoined to produce the prison boom. In an informed and impassioned account, Ruth Wilson Gilmore examines this issue through statewide, rural, and urban perspectives to explain how the expansion developed from surpluses of finance capital, labor, land, and state capacity. Detailing crises that hit California's economy with particular ferocity, she argues that defeats of radical struggles, weakening of labor, and shifting patterns of capital investment have been key conditions for prison growth. The results—a vast and expensive prison system, a huge number of incarcerated young people of color, and the increase in punitive justice such as the "three strikes" law—pose profound and troubling questions for the future of California, the United States, and the world. Golden Gulag provides a rich context for this complex dilemma, and at the same time challenges many cherished assumptions about who benefits and who suffers from the state's commitment to prison expansion.

A NEW YORK TIMES NOTABLE BOOK OF THE YEAR "[A] skillfully crafted gothic mystery . . . Johnson pulls off a great feat in this book." —Financial Times "It reminded me, in its general refusal to play nice, of early Ian McEwan." —The New York Times Book Review "Johnson crafts an aching thriller about the dangers of loving too intensely." —Time From a Booker Prize finalist and international literary star: a blazing portrait of one darkly riveting sibling relationship, from the inside out. "One of her generation's most intriguing authors" (Entertainment Weekly), Daisy Johnson is the youngest writer to have been shortlisted for the Man Booker Prize. Now she returns with Sisters, a haunting story about two sisters caught in a powerful emotional web and wrestling to understand where one ends and the other begins. Born just ten months apart, July and September are thick as thieves, never needing anyone but each other. Now, following a case of school bullying, the teens have moved away with their single mother to a long-abandoned family home near the shore. In their new, isolated life, July finds that the deep bond she has always shared with September is shifting in ways she cannot entirely understand. A creeping sense of dread and unease descends inside the house. Meanwhile, outside, the sisters push boundaries of

behavior—until a series of shocking encounters tests the limits of their shared experience, and forces shocking revelations about the girls’ past and future. Written with radically inventive language and imagery by an author whose work has been described as “entrancing” (The New Yorker), “a force of nature” (The New York Times Book Review), and “weird and wild and wonderfully unsettling” (Celeste Ng), *Sisters* is a one-two punch of wild fury and heartache—a taut, powerful, and deeply moving account of sibling love and what happens when two sisters must face each other’s darkest impulses.

Anthropology is the study of all humans in all times in all places. But it is so much more than that. "Anthropology requires strength, valor, and courage," Nancy Scheper-Hughes noted. "Pierre Bourdieu called anthropology a combat sport, an extreme sport

as well as a tough and rigorous discipline. ... It teaches students not to be afraid of getting one's hands dirty, to get down in the dirt, and to commit yourself, body and mind. Susan Sontag called anthropology a "heroic" profession." What is the payoff for this heroic journey? You will find ideas that can carry you across rivers of doubt and over mountains of fear to find the light and life of places forgotten. Real anthropology cannot be contained in a book. You have to go out and feel the world's jagged edges, wipe its dust from your brow, and at times, leave your blood in its soil. In this unique book, Dr. Michael Wesch shares many of his own adventures of being an anthropologist and what the science of human beings can tell us about the art of being human. This special first draft edition is a loose framework for more and more complete future chapters and writings. It serves as a companion to anth101.com, a free and open resource for instructors of cultural anthropology. This 2018 text is a revision of the "first draft edition" from 2017 and includes 7 new chapters.

Her husband, Frank, eats a steak for dinner every night, watches a few minutes of TV, and then turns in. Patty yearns for a baby, but Frank is always too tired for that kind of thing. Sweet, unlucky Fay wants to settle down with a nice man, but somehow nice men don't see her as marriage material. Glamorous Magda runs the high-end gowns department. A Slovenian émigré, Magda is cultured and continental and hopes to open her own boutique one day. Lisa, a clever and shy teenager, takes a job at Goode's during her school break. On a chilly, gray autumn afternoon in 1984, a patrolman was dispatched to an inner-city tenement in Auburn, Maine to investigate the report of a possible fire. What he found inside the building's smoke-filled, second-story apartment was not a fire but something far more horrifying -- the charred body of a 4-year-old girl, Angela Palmer, who had been stuffed into the oven of a kitchen stove and cooked to death. The discovery traumatized the community and shocked the country. The ensuing murder prosecution of the youngster's mother, Cynthia Palmer, and her boyfriend, John Lane, cast a searching light into the shadows of a secret world in which children and women suffer violence and sexual predation at the hands of those who are supposed to love and protect them.

UPDATED FOR 2020 WITH A NEW PREFACE BY NATE SILVER "One of the more momentous books of the decade." —The New York Times Book Review Nate Silver built an innovative system for predicting baseball performance, predicted the 2008 election within a hair's breadth, and became a national sensation as a blogger—all by the time he was thirty. He solidified his standing as the nation's foremost political forecaster with his near perfect prediction of the 2012 election. Silver is the founder and editor in chief of the website FiveThirtyEight. Drawing on his own groundbreaking work, Silver examines the world of prediction, investigating how we can distinguish a true signal from a universe of noisy data. Most predictions fail, often at great cost to society, because most of us have a poor understanding of probability and uncertainty. Both experts and laypeople mistake more confident predictions for more accurate ones. But overconfidence is often the reason for failure. If our appreciation of uncertainty improves, our predictions can get better too. This is the "prediction paradox": The more humility we have about our ability to make predictions, the more successful we can be in planning for the future. In keeping with his own aim to seek truth from data, Silver visits the most successful forecasters in a range of areas, from hurricanes to baseball to global pandemics, from the poker table to the stock market, from Capitol Hill to the NBA. He explains and evaluates how these forecasters think and what bonds they share. What lies behind their success? Are they good—or just lucky? What patterns have they unraveled? And are their forecasts really right? He explores unanticipated commonalities and exposes unexpected juxtapositions. And sometimes, it is not so much how good a prediction is in an absolute sense that matters but how good it is relative to the competition. In other cases, prediction is still a very rudimentary—and dangerous—science. Silver observes that the most accurate forecasters tend to have a superior command of probability, and they tend to be both humble and hardworking. They distinguish the predictable from the unpredictable, and they notice a thousand little details that lead them closer to the truth. Because of their appreciation of probability, they can distinguish the signal from the noise. With everything from the health of the global economy to our ability to fight terrorism dependent on the quality of our predictions, Nate Silver's insights are an essential read.
