"It's official. That thing that classic art has been missing is a chubby reclining kitty."—The Huffington Post Internet meme meets classical art in Svetlana Petrova's brilliant Fat Cat Art. Featuring her twenty-two-pound, ginger-colored cat Zarathustra superimposed onto some of the greatest artworks of all time, Petrova's paintings are an Internet sensation. Now fans will have the ultimate full-color collection of her work, including several never-before-seen pieces, to savor for themselves or to give as a gift to fellow cat lovers. From competing with Venus's sexy reclining pose (and almost knocking her off her chaise longue in the process) to Titian's Venus of Urbino, to exhibiting complete disdain as he skirts away from God's pointing finger in Michelangelo's Creation of Adam, Zarathustra single-handedly rewrites art history in the way that only an adorable fat cat can.

With nuanced observations from the star author and historian, here are the celebrated journals documenting Lewis and Clark's legendary expedition into the uncharted American West, abridged into a single volume and translated into modern English. At the start of the 19th century, Meriwether Lewis and William Clark embarked on an unprecedented voyage of discovery. Their assignment was to explore the newly acquired Louisiana Territory and record the geography, flora, fauna, and people they encountered along the way. This updated edition of the captains' journals combines historical insight from editor Anthony Brandt with the rich detail of Lewis and Clark's original writing, as well as archival maps and artwork. An enthralling portrait of the unspoiled West, this true-life adventure story is a window to the dawning of America—from encounters with grizzly bears to councils with tribal leaders and perilous mountain crossings.

This accessible textbook is the only introduction to linguistics in which each chapter is written by an expert who teaches courses on that topic, ensuring balanced and uniformly excellent coverage of the full range of modern linguistics. Assuming no prior knowledge the text offers a clear introduction to the traditional topics of structural linguistics (theories of sound, form, meaning, and language change), and in addition provides full coverage of contextual linguistics, including separate chapters on discourse, dialect variation, language and culture, and the politics of language. There are also up-to-date separate chapters on language and the brain, computational linguistics, writing, child language acquisition, and second-language learning. The breadth of the textbook makes it ideal for introductory courses on language and linguistics offered by departments of English, sociology, anthropology, and communications, as well as by linguistics departments.

Racism is resilient, duplicious, and easily adaptable, so it is no surprise that America is again in a period of civil rights activism. A significant reason racism endures is because it is structural: it's embedded in culture and in institutions. One of the places that racism hides-and thus perhaps the best place to oppose it-is books for young people. Was the Cat in the Hat Black? presents five serious critiques of the history and current state of children's literature to institutions responsible for both implicit and explicit forms of racism. The book fearlessly examines topics both vivid-such as The Cat in the Hat's roots in blackface minstrelsy-and more opaque, like how the children's book industry can perpetuate structural racism via whitewashed covers even while making efforts to increase diversity. Rooted in research yet written with a lively, crackling touch, Nel delves into years of literary criticism and recent sociological data in order to show a better way forward. Though much of what is proposed here could be endlessly argued, the knowledge that what we learn in childhood imparts both subtle and explicit lessons about whose lives matter is not debatable. The text concludes with a short and stark proposal of actions every-one-reader, author, publisher, scholar, citizen- can take to fight the biases and prejudices that infect children's literature. While Was the Cat in the Hat Black? does not assume it has all the answers to such a deeply systemic problem, its audacity should stimulate discussion and activism.

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

CatKiller 3-2 provides unique insights into the role of the tactical air controller, airborne (TACA) in I Corps as seen through the eyes of one of the pilots who flew low-flying, unarmed, single-engine aircraft in support of Marine ground units during the Vietnam War. When Gen. William Westmoreland changed the Marines' role in I Corps into a combat one, the Marines found themselves in need of more fixed wing aircraft to handle the TACA missions. The advance party of the Army's 220th Reconnaissance Aircraft Company (RAC) arrived in Vietnam in late June 1965 thinking they were going to be assigned to I Corps Tactical Zone. However, because of the shortage of existing Marine Birddogs, the 220th was immediately reassigned to I Corps and came under the operational control of the Marines. No other work details the tactics, restrictions, aerial maneuvers, and dangers experienced by the Army pilots and Marine aerial observers flying these missions. As young lieutenants and captains, they had at their beck and call as much authority to request and control artillery and air strikes as ground commanders of much higher rank. Raymond G. Caryl provides unrivaled examples of the cultural mores, attitudes, and recreational activity of these young pilots and observers supporting the ground forces.

With Pathways of Desire, Héctor Carrillo brings us into the lives of Mexican gay men who have left their home country to pursue greater sexual autonomy and sexual freedom in the United States. The groundbreaking ethnographic study brings our attention to the full arc of these men's migration experiences, from their upbringing in Mexican cities and towns, to their cross-border journeys, to their incorporation into urban gay communities in American cities, and their sexual and romantic relationships with American men. These men's diverse and fascinating stories demonstrate the intertwining of sexual, economic, and familial motivations for migration. Further, Carrillo shows that sexual globalization must be regarded as a bidirectional, albeit uneven, process of exchange between countries in the global north and the global south. With this approach, Carrillo challenges the view that gay men from countries like Mexico would logically want to migrate to a (more sexually enlightened) country like the United States/a partial and limited understanding, given the dynamic character of sexuality in countries such as Mexico, which are becoming more accepting of sexual diversity. Pathways of Desire also provides a helpful analytical framework for the simultaneous consideration of structural and cultural factors in social scientific studies of sexuality. Carrillo explains the patterns of cross-cultural interaction that sexual migration generates and/or that the most practical livelihoods how the intricacies of cross-cultural sexual and romantic relations may affect the sexual health and HIV risk of transnational immigrant populations.
