Get ready for what Kirkus calls "A bloody, wonderfully creepy scare ride." When her mom inherits an old, crumbling mansion, Seda's almost excited to spend the summer there. The grounds are beautiful and it's fun to explore the sprawling house with its creepy rooms and secret passages. Except now her mom wants to renovate, rather than sell the estate—which means they're not going back to the city...or Seda's friends and school. As the days grow shorter, Seda is filled with dread. They're about to be cut off from the outside world, and she's not sure she can handle the solitude or the darkness it brings out in her. Then a group of teens get stranded near the mansion during a blizzard. Seda has no choice but to offer them shelter, even though she knows danger lurks in the dilapidated mansion—and in herself. And as the snow continues to fall, what Seda fears most is about to become her reality...

A singing frog reluctantly sits on this colorful hilarious picture book from the brilliant mind that brought you The Fantastic Flying Books of Mr. Morris Lessmore. While egg-sitting for his friend Kack Kack the duck, Bently Hopperton the frog is so bored that he cannot resist painting the egg's shell. But when the decorated egg is mistaken for an Easter egg and is egg-napped, Bently discovers that he has in fact, grown terrifically fond of that ole egg. Can he rescue the egg before it's too late? An homage to fatherhood, and the appreciation of swell art.

Meditations I and I are part and parcel to Ren Descartes' larger work, "Meditations on First Philosophy." The First Meditation, subtitled "What can be called into doubt," opens with the Meditator reflecting on the number of falsehoods he has believed during his life and on the consequent faultiness of the body of knowledge he has built up from these falsehoods. He has resolved to sweep away all he thinks he knows and to start again from the foundations, building up his knowledge once more on more certain grounds. He has seated himself alone, by the fire, free of all worries so that he can demolish his former opinions with care. The Meditator reasons that he has no need to seek studies for knowledge. Rather than doubt his present opinions in order to doubt his present opinions in order to seek studies for knowledge. Rather than doubt his present opinions in order to doubt his present opinions, he reasons that he might cast them all into doubt the foundations and basic principles on which the opinions are founded everything that he has accepted as most true he has come to learn from or through his senses. He acknowledges that sometimes the senses can deceive, but only with respect to objects that are very small or far away, and that our sensory knowledge is not wholly to be trusted. The Meditator acknowledges that insane people might be more deceived, but that he is clearly not one of them and doesn't worry himself about it.However, the Meditator realizes that he is awake and sitting by the fire, but reflects that often he has dreamed this very sort of thing and been wholly convinced by it. Though his present sensations may be dream images, he suggests that even dream images are drawn from waking experience, much like paintings in that respect. Even when a painter creates an imaginary creature, like a mermaid, the composite parts are drawn from real things--women and fish, in the case of a mermaid. And even when a painter creates something entirely new, at least the colors in the painting are drawn from real experience. Thus, the Meditator concludes, though he can doubt composite things, he cannot doubt the simple and universal parts from which they are constructed like shape, quantity, size, time, etc. While we can doubt studies based on composite things, like medicine, astronomy, or physics, he concludes that we cannot doubt studies based on simple things, like arithmetic and geometry.

This study guide is absolutely packed with configurations and screen shots from REAL Cisco switches, and many of the examples and labs in this book come from real-world situations that I and other network admins have faced personally. My study guides have helped CCNP candidates earn their certifications for over 10+ years, and now I'm ready to do the same for you. Let's hear from just a few of my thousands of happy students! "Your program is by far the best in the industry in terms of price, quality, and scope of the information. It's a great value and I appreciate the time and thought you put into the CCNP products. Very nicely done indeed." - Jason Neumann, CCNP "Thanks for all your help and support in my Cisco journey. I would not be a network engineer working for a Cisco Gold Partner without your instruction." - Ken Gander, CCNP "One thing I wanted to note was your style of writing. I really was impressed to this style and think more people could learn from this method. The fact that you carefully placed small doses of positivity within the technical writing was really encouraging!" - Nick Algood, CCNP " I just want to write and say thanks again for all the great study materials that you've provided. Just last week I earned my CCNP. I used your stuff exclusively to study for every Cisco exam that I've taken and I think they are far by the best training materials available for anyone looking to become Cisco certified." - Bill Phillips, CCNP With my clear, comprehensive, straight-to-the-point illustrative lectures, and plenty of labs - all performed on REAL Cisco switches - you'll be better prepared for the CCNP SWITCH exam than you ever thought possible. I'm ready and waiting to help you master the CCNP SWITCH exam. and I absolutely guarantee this book is the best money you'll ever spend on any CCNP SWITCH exam preparation. several titles for Pearson Education, including the well-received CompTIA A+ Exam Cram and CompTIA Security+ Cert Guide. As a consultant, he installs and secures the latest in computer and networking technology. Over the past decade he has also taught CompTIA A+, Network+, and Security+ certification courses, both in the classroom and via the Internet. He runs the website www.davidprowse.com, where he gladly answers questions from students and readers.

A low-cost alternative to test prep courses includes complete coverage of crucial exam topics for CCNP certification that denotes proficiency in supporting diverse internetworks that use routing and bridging technologies. (Intermediate).

The only authorized Lab Manual for Cisco Networking Academy's newly-updated course CCNP ROUTE: Implementing IP Routing, V.6 (Exam 642-902) A portable, bound copy of all 32 CCNP V 6.x ROUTE Labs: convenient, lightweight and friendly Allows students to review or walk through hands-on labs without a huge textbook or live Web connection Contains additional pages between labs for in-class note-taking Separate answer key available at Cisco Academy Connection and the PearsonHigherEd.com Instructor Resource site This hands-on routing Lab Manual is the perfect companion for all Cisco Networking Academy students who are taking the new course CCNP ROUTE: Implementing IP Routing (V. 6) as part of their CCNP preparation. It offers a portable, bound copy of all 32 CCNP V 6.x ROUTE network routing labs in a convenient, lightweight format that allows students to walk through key procedures and easily take notes without a large textbook or a live Internet connection. Working with these conveniently-formatted labs, students will gain practical experience and skills for using advanced IP addressing and routing in implementing scalable and secure Cisco ISR routers connected to LANs and WANs; and for configuring secure routing solutions to support branch offices and mobile workers.

A low-cost alternative to the expensive Cisco courses and self-study options for the Cisco Certified Network Associate (CCNA), this book is mapped to Cisco's Introduction to Cisco Router Certification course.

"In the post-9/11 struggle for a sane global vision, this antihated manifesto could not be more timely."—O: The Oprah Magazine in this acclaimed volume, Pulitzer-Prize nominated science writer Rush W. Dozier Jr. demystifies our deadliest emotion—hate. Based on the most recent scientific research in a range of fields, from anthropology to zoology, Why We Hate explains the origins and manifestations of this toxic emotion and offers realistic but hopeful suggestions for defusing it. The strategies offered here can be used in both everyday life to improve relationships with family and friends as well as globally in our efforts to heal the hatreds that fester within and among nations of the world.

As the end of the 20th century approaches, many predict that it will mirror the 19th-century decline into decadence. The author of this text finds a closer analogy with the culture wars of France in the 1690s - the time of a battle of the books known as the Quarrel between the Ancients and Moderns.

Supplemental Instruction is a program designed to support students in their learning process. The program consists of advanced students supervising new students, where the purpose is to improve students' performance and reduce the risk of interruption of studies. Supplemental Instruction was established almost 50 years ago and is used today in universities around the world. This book examines different aspects of SI in organizations and leadership, including surveys of Supplemental Instruction programs in Europe, how SI sessions should be organized, the degree to which SI improves retention rates and exam results, SI and learning leadership and leadership development, benefits of being a member of an SI team and employability, SI implementation in healthcare education and virtual students' attitudes towards SI online. The book is aimed at anyone who is concerned about study quality in higher education. The contributors are researchers and lecturers at various universities from several countries. The book is part of a trilogy on Supplemental Instruction, where the themes for the other books are "Digital Technologies" and "Student Learning Processes". The editors of the trilogy are Abbas Strømme-Bakhtiar, Roger Helde and Elisabeth Suzen, all three Associate Professors at Nord University, Norway.
