

## 2019 2020 Kwazulu Natal Department Of Transport Home Page

*“Randy Shilts and Laurie Garrett told the story of the HIV/AIDS epidemic through the late 1980s and the early 1990s, respectively. Now journalist-historian-activist Emily Bass tells the story of US engagement in HIV/AIDS control in sub-Saharan Africa. There is far to go on the path, but Bass tells us how far we’ve come.” –Sten H. Vermund, professor and dean, Yale School of Public Health*

*With his 2003 announcement of a program known as PEPFAR, George W. Bush launched an astonishingly successful American war against a global pandemic. PEPFAR played a key role in slashing HIV cases and AIDS deaths in sub-Saharan Africa, leading to the brink of epidemic control. Resilient in the face of flatlined funding and political headwinds, PEPFAR is America’s singular example of how to fight long-term plague—and win. To End a Plague is not merely the definitive history of this extraordinary program; it traces the lives of the activists who first impelled President Bush to take action, and later sought to prevent AIDS deaths at the whims of American politics. Moving from raucous street protests to the marbled halls of*

*Washington and the clinics and homes where Ugandan people living with HIV fight to survive, it reveals an America that was once capable of real and meaningful change—and illuminates imperatives for future pandemic wars. Exhaustively researched and vividly written, this is the true story of an American moonshot. Public Sector Reform in South Africa 1994-2021 is an examination of specific public sector reforms in three core Public Administration areas in the democratic South Africa: political-administrative relationships, the delegation of authority to senior managers and performance management.*

*The scholarly purpose of this manuscript is to provide a resource for academics and researchers looking into cities, space and power in emerging economies. It also takes into consideration the relationship between emerging economies and developing contexts, as well as the lessons that may be shared between them. This book presents a unique perspective and aims to highlight issues not addressed much in writing on the built environment. Based on substantiation and references to numerous other sources and authors, alternative theoretical frameworks for the study of the built environment are developed. This*

*is a very relevant contribution at this time, especially as cities will most probably go through transformations in the post-COVID-19 era. Our first line of defense against this public health crisis will be in areas of poverty, with people who have generally been excluded and urban practices that have been undocumented or labeled as informal. The main thesis of the manuscript is that space and power are strongly linked in cities. The research results prevalent in the book are original, and while the authors consult widely across disciplines, the themes are firmly rooted in the built environment fields – with a focus on the architectural discipline.*

*□Formal Methods in Computer-Aided Design (FMCAD) is a conference series on the theory and applications of formal methods in hardware and system verification. FMCAD provides a leading forum to researchers in academia and industry for presenting and discussing ground-breaking methods, technologies, theoretical results, and tools for reasoning formally about computing systems. FMCAD covers formal aspects of computer-aided system design including verification, specification, synthesis, and testing.*

*This book explores the role of the university in upholding democratic values for societal change. The chapters advocate for the moral virtue of democratic patriotism: the editors and contributors argue that universities, as institutions of higher learning, can encourage the creation of critical and patriotic citizens. The book suggests that non-violence, tolerance, and peaceful co-existence ought to manifest through pedagogical university actions on the basis of educators' desire to cultivate reflectiveness, criticality, and deliberative inquiry in and through their academic programmes. In a way, universities can respond more positively to the violence on our campuses and in society if public and controversial issues were to be addressed through an education for democratic*

# Access Free 2019 2020 Kwazulu Natal Department Of Transport Home Page

*citizenship and human rights.*

*This book offers international perspectives on the economic, social, geopolitical, and environmental implications of COVID-19 on tourism, an unprecedented situation for this sector. It considers the challenge of making the tourism industry more resilient to such crises and the future sustainability of tourism. Contributions explore the changing dimensions of tourism marketing post-COVID-19; the rising challenges in tourism education and ways to handle the crisis; the impact of the pandemic on tourism governance; and the emerging ethical issues of stakeholders' responsibility. The book will be useful for researchers, students, and practitioners in the fields of tourism, geography, and crisis management disciplines. Breathing fresh air into debates surrounding foreign policy and interstate relations, Bianca Naude presents a holistic theory of states as collectives of people that cannot be reduced to their individual constituents. Moving among current research on the ontological status of the state alongside important arguments in support of the state personhood thesis, Naude begins by exploring Freud's personality theory and the ways in which this theory has evolved over time in response to newer insights from the field of experimental psychology. Recognizing that Freud's work is in many ways outdated, she considers more recent literature on narcissism as an aspect of self-esteem rather*

## Access Free 2019 2020 Kwazulu Natal Department Of Transport Home Page

than a form of psychopathology, drawing specifically on Kohut's expansion of the concept of narcissism as a normal feature of personality development. Using the South African state as a case study, Naude demonstrates the various ways in which the state presents itself to the outside world on the one hand, and how it wishes to see itself on the other. She further considers how narcissistic defenses help protect the state's ego from criticism and self-judgments. Revisiting State Personhood and World Politics will help readers understand how the state sees itself, why or when the state experiences shame, humiliation, guilt or pride, and how it responds to these self-conscious emotions. It will be a valuable resource to researchers and students of International Relations.

Disasters and public health emergencies are increasing. Climate change, transportation incidents, increasing numbers of mass gatherings, chemical and technical incidents, increasing number of armed conflicts and terrorism are some of the major reasons for this increasing pattern. Any of these events may result in severe casualties, destruction of infrastructures and create a situation in which the number of victims may exceed available resources. Much of the knowledge in disaster medicine is based on the "lessons learned". However, it has been proven that no lessons learned theoretically can be of practical use if the knowledge is not tested

# Access Free 2019 2020 Kwazulu Natal Department Of Transport Home Page

*in an appropriate environment. In this perspective, the major clinical excellence and testing laboratories for disaster response are the scenes where disasters happen. Yet, most of the research and reports in the field are produced in high-income countries, while most of the disasters happen in middle- or low-income countries. There is thus a need to bring these two environments together in order to translate theory into practice and among people who are highly exposed and involved in the multidisciplinary management of a disaster or major incident.*

***This book provides a novel and holistic perspective on the deployment of prepaid electricity meter technology among energy impoverished (vulnerable) households based in developing or under-developed communities of Sub-Saharan Africa. It explores and reviews the nexus between the technology and socio-economic development, technology acceptance and rejection in low-income households, and ultimately proposes a contextual model to avert or assuage energy poverty in the region using the technology.***

***Science is applied as a convenient, valid, and reliable model to generate bespoke, contextual, and relevant knowledge for policy makers on the development of prepaid meter market in the region. The knowledge shared contributes to extant discourse and debates around the effectiveness of the technology within indigent household settings. The book is intended for energy/electricity utilities, prepaid electricity businesses, policy developers, and other interested parties whose work is related to prepaid electricity meters.***

***This textbook is written in line with the Council of International Neonatal Nurses, Inc. (COINN) vision for global unity for neonatal nursing. The core values and goals of COINN are based on excellence and advocacy for high quality newborn care, as well as respecting diversity by integrating cultural norms and values among the care of newborns and their families. The book promotes neonatal nursing as a global speciality through evidence, research, and education of neonatal nurses; and offers key examples of the millennium goals and global outcomes, as well as variations in outcomes for babies. The first part focuses on global perspectives of neonatal nursing from different continents aligning with the World Health Organizations' global regions: (The Americas -USA, Canada and South America-, Western Pacific region -Australia and New Zealand-, European region -UK and Europe-, African region, South-East Asia and Eastern Mediterranean region. For each region, education and***

***competencies, challenges and opportunities, research and evidence-based practice (EBP) as well as practice regulations are described. The second part elaborates on key topics for neonatal nursing across the globe, such as the continuity of neonatal care in the community, patient and family centered care in neonatal settings, sleep and brain development, the fundamental care needs of the neonate and family and global perspectives on hypothermia, hypoglycaemia and hypoxia. Written in a formal academic but reader style, using key literature and evidence, this textbook enables an understanding from a large audience with academic levels and experience, both staff and students, bedside nurses, advanced practice nurses, midwives and allied professionals. In addition, first person story based reflective narrative are interspersed throughout the book to capture the perspectives of nurses, staff and parents, in the form of vignettes. This textbook is aimed at neonatal nurses across the world as well as current and aspiring students in this field.***

***Food systems are intimately linked to our lives – through the food we eat, our nutrition and health, our livelihoods, jobs, and the environment and natural resources of the planet. The main challenge for food systems is to produce nutritious food for all while preserving our biodiversity and environment and ensuring equitable distribution of wealth. This Food Systems Profile provides a summary of the main food system issues in Eswatini and highlights***

***potential solutions for their sustainable and inclusive transformation. It is the result of a systemic analysis and stakeholders' consultation that was part of a global assessment of food systems in over 50 countries, following a joint initiative by the European Union, Food and Agriculture Organization of the United Nations (FAO) and International Cooperation Centre of Agricultural Research for Development (CIRAD), which aims at catalysing the sustainable and inclusive transformation of food systems.***

***Decolonial Perspectives on Political Economy and Corruption***

This book examines immigration policies and politics in Africa, the social impacts and history of xenophobia and nativism in African life and culture, and the effects of xenophobia and nativism on Pan-Africanism. The chapters also offer suggestions for reducing xenophobia and nativism in Africa through social and economic policies.

"Kidney disease is frequently described as a public health problem. This book will unpack what we mean by "public health" and by "taking a public health approach." We will consider the global burden of kidney diseases and their

determinants, with a focus on chronic kidney disease"--  
An incisive analysis of South Africa's ANC power-as party, as government, as state South Africa's African National Congress (ANC) is in decline, its hegemony has been weakened, its legitimacy diluted. President Cyril Ramaphosa's appointment suspended the ANC's electoral decline, it also heightened internal tensions between those who would deepen its acquired status as corrupt and captured, and those who would remodel it as redeemable. These are the incontrovertible knowns of South African politics; what will evolve from this is less certain. In *Precarious Power*, renowned political scientist Susan Booyesen uses in-depth research and analysis to distill that which is bound to shape South Africa's political future, Booyesen focuses on contradictory party politics and internal ANC dissent that is veiled for the sake of retaining an electoral following. Also exposed is the incongruous, populist policymaking, protest politics and the use of soft law to ensure it does not alienate angry citizens, fueling further discontent and protest. The ANC's power has become exceedingly precarious. *Precarious Power* is the name of the political game, for the foreseeable future. The comprehensive analysis in *Precarious Power* will appeal not only to political scientists and postgraduate students, but to all who take a keen interest in current affairs.

This book provides an overview of the current epidemiology of the HIV epidemic among young people in Eastern and Southern Africa (ESA) and examines the efforts to confront and reduce the high level of new HIV infections amongst young people. Taking a multi-dimensional approach to prevention, the contributors discuss the many challenges facing these efforts, in view of the slow progress in curbing the incidence of HIV amongst young people, focusing particularly on the structural and social drivers of HIV.

# Access Free 2019 2020 Kwazulu Natal Department Of Transport Home Page

Through an examination of these issues, chapters in this book provide valuable insights on how to mitigate HIV risk among young people and what can be regarded as the catalysts to mounting credible policy and programmatic responses required to achieve epidemic control in the region. The contributors draw on examples from a range of primary and secondary data sources to illustrate promising practices and challenges in HIV prevention, demonstrating links between conceptual approaches to prevention and lessons learnt from implementation projects in the region. Bringing together social scientists and public health experts who are actively engaged in finding effective solutions, the book discusses ‘ which interventions works ’ , ‘ why they work ’ , and the limitations and gaps in our knowledge to curb the pandemic amongst young people. As such it is an important read for researchers focusing on HIV/AIDS and public health.

Handbook of Disaster and Emergency Management (Second Edition)

Revisiting State Personhood and World Politics  
COVID-19 and the Tourism Industry

Access to water and sanitation remains a critical challenge in various countries in Africa. The crisis remains the crisis of governance rather than the physical and economic scarcity. In most countries, water is realized as a human right and subsidies are provided for the indigent households. The tricky issue in rural areas remains an issue of access that is often

linked to willingness and ability to pay for the installation and daily consumption. The Handbook of Research on Resource Management and the Struggle for Water Sustainability in Africa presents practical examples of integrated water resources management (IWRM) implementation in African countries. It further addresses the contemporary issues of alternative energy as part of climate change mitigation and utilizes case studies to examine how communities adapt to climate change. Covering topics such as climate justice, ecological governance, and political ecology, this major reference work is a dynamic resource for government officials, sociologists, climate scientists, activists, students and educators of higher education, academicians, and researchers in the fields of social sciences, government, developmental studies, international relations, and political science.

This volume critically examines sources of evidence and material from the archive that historically have been used to tell southern Africa's pre-colonial story.

Designed for public health nurses and health visitors at every stage of their career from students to experienced practitioners *Community Public Health in Policy and Practice: A Source Book* provides an overview of theoretical constructs and principles for community public health practice, including underpinning research. Written by leading experts the book is designed to support innovation and practice development, including dealing with major policy changes and changes to theory and the evidence base. For this edition the text has been completely reorganised and updated including eight brand new chapters. New chapters include current information and research about contemporary topics such as digital health, economics and implementation science. Updated chapters

focus upon relevant knowledge required for current practice, including both seminal theories and research, along with new international frameworks. Brief introduction to the long-lasting impacts of Covid-19, as the pandemic unfolds.

The COVID-19 pandemic has introduced a new paradigm in education that has forced school management teams to re-imagine their curricula delivery functions and obligations during and post COVID-19. Now there are concerns about the state to which curriculum delivery in schools is likely to become planned, implemented, and managed. Investigating the Roles of School Management Teams in Curriculum Delivery improves the quality of planning, implementation, and management of curriculum delivery to advance the quality of teaching and learning in schools. Particularly, it envisages innovative strategies, best practices, and addresses problems in the planning, implementation, and delivery of curricula by school management teams. Covering topics such as curriculum delivery theory, curriculum delivery in planning, implementation, and management during and post COVID-19; curriculum delivery in assessment and alternative assessment; and reimagining inclusivity in curriculum delivery, this edited book is essential for departmental heads, deputy principals, education district officials, department of basic education curriculum designers, instructional designers, administrators, academicians, university teachers, researchers, and post-graduate students.

America's Fight to Defeat AIDS in Africa

Addressing Xenophobia in South Africa

'As the world economic system stumbles, as trade wars intensify and the dangers of a diminishing global multilateralism threaten, Davies' new book offers a unique blend of astute analysis and personal experience. It is a must-read.' – Jeremy Cronin, former Deputy Minister of Transport Africa's past quarter century has been shaped by the decisions and reach of one of the oldest political alliances in southern Africa, that between the African National Congress and the South African Communist Party. In this memoir, Rob Davies, one of the government's most articulate former senior ministers, looks back on the politics, policies and inner workings of the South African government in the democratic era. He offers an insider's account of the evolution of trade and economic policy over the last 25 years, up to the presidency of Cyril Ramaphosa and the global impact of the COVID-19 pandemic. Leavened with intriguing anecdotes and informed by the author's very personal

and humanising history of activism and exile, *Towards a New Deal* makes the case for an economic policy transformation that is focused on creating jobs and reducing poverty, that highlights South Africa's role in Africa, and that addresses the challenges of economic stagnation, climate change and the fourth industrial revolution. It will be essential reading for economists, businesspeople and ordinary readers keen to grasp the political and economic dynamics of the moment. Despite a constitutional right to food, a comprehensive social security structure, being a net exporter of agricultural products and maintaining a rising GDP, freedom from hunger remains a pipedream for millions of South Africans. With a constant surge in food prices, the availability of sustenance is often seriously threatened for all of South Africa's population. While the underprivileged majority residing in townships often demonstrate their discontent for poor service delivery on the streets, they rarely channel this strategy into taming food inflation.

This study seeks to understand this irony and examine ways in which this trend could be reversed. Proposing a compelling argument for food activism, Bright Nkrumah suggests ways of mobilising disempowered groups to reclaim this inherent right. Presented alongside historical and contemporary case studies to illustrate the dynamics of collective action and food security in South Africa, he draws from legal, social and political theory to make the case for 'activism' as a force for alleviating food insecurity.

Earth Observation Applications and Global Policy Frameworks GEOPHYSICAL MONOGRAPH SERIES Earth Observation Applications and Global Policy Frameworks Data and insights from Earth observations are critical for assessing the health of our planet, monitoring change, and addressing societal challenges from the local to the global scale. Earth Observation Applications and Global Policy Frameworks presents case studies of Earth science information integrated with statistics and socioeconomic data for managing development targets, improving disaster

resilience, and mitigating and adapting to climate change. It also showcases open collaboration among researchers, United Nations and government officials, entrepreneurs, and the public. Volume highlights include: Case studies of projects working with local and national governments, and through public-private partnerships, to make the most of the large volume of complex and diverse Earth science information sources Applications from diverse disciplines including wetland preservation, food security, water quality, marine conservation, disasters, urbanization, drought and land degradation, and greenhouse gas monitoring Examples of internationally coordinated initiatives that are driving progress on three landmark United Nations agreements Resources for decision-makers and practitioners in local and national governments The American Geophysical Union promotes discovery in Earth and space science for the benefit of humanity. Its publications disseminate scientific knowledge and provide resources for researchers, students, and

professionals.

Seeking the Right to Food

*Following the release of the Public Protector's State of Capture Report in November 2016, South Africans have been witness to an explosion of almost daily revelations of corruption, mismanagement and abuses by those entrusted to lead the nation. The extent of this betrayal is overwhelming and it is often difficult to distil what actually happened during the Zuma administration. This book draws on the insights and expertise of 19 contributors from various sectors and disciplines to provide an account of what transpired at strategic sites of the state capture project. The ongoing threat of state capture demands a response that probes beyond what happened to*

understanding how it was allowed to happen. The stubborn culture of corruption and misgovernance continue to manifest unabated and the predatory practices which enable state capture have not yet been disrupted. It is our hope that the various case studies and analyses presented in this book will contribute to confronting these shortcomings in current discourse, and open avenues for progressive deliberation on how to collectively reclaim the prospects of a just and prosperous South Africa for all. This book addresses recent advances in the field of river systems. Chapters cover a wide range of topics including artificialization of rivers and banks, technical aspects of flood and sediment dynamics, physical processes and institutional vulnerabilities, watershed management and collaborative governance, water quality analysis and protection measures, acquisition and measurement of data, statistical and econometric procedures, adaptation and restoration measures, rehabilitation and sustainability of riparian ecosystems, and strategies to improve the ecological functions of riparian areas. All chapters contribute relevant information and useful content for scientists and other readers interested or concerned about the lack of adequate management actions and implementation of appropriate measures and protections, or their ineffectiveness in containing vulnerabilities and ecological

*sustainability of river systems.*

*This book explores the complexities of curriculum studies by taking into account African perspectives of curriculum theory, curriculum theorising and the theoriser. It provides alternative pathways to the curriculum discourse in Africa by breaking traditions and experimenting on alternative approaches.*

*Focusing on a prominent episode of anti-immigrant violence in the Durban area of the KwaZulu-Natal province, Addressing Xenophobia in South Africa identifies the hidden, less addressed dimensions and catalysts of Xenophobia in South Africa.*

Emerging Evidence and Intervention Strategies  
Sustainable and Smart Spatial Planning in  
Africa*

*This book clarifies the smart city concept that is gaining application in Sub - Saharan Africa. It shows how the smart concept can be used to address problems that would be difficult and more expensive to solve using traditional techniques such as employment creation. This is done through elaboration of the African interpretation of smartness, using tools for smart solid waste management, e-governance, smart energy, and smart infrastructure. The case studies selected, and each*

*chapter explain a different dimension of the smart city concept and offer innovative solutions to problems of rapid urbanization. It lays the theoretical foundation for further research on smart cities and rural areas in Africa.*

*Leadership in a Changing World - A Multidimensional Perspective investigates the multi-dimensional aspect of leadership by exploring different perspectives and practices as well as existing theories of effective leadership in a changing world. Chapters address such topics as the connection between leadership, innovation, and creativity, venture leadership, e-leadership, digital leadership, and more. Beyond understanding the nature of effective leadership, this book examines the nature of leadership focusing on what we know and how we know it.*

*The need to promote academic activities in telehealth remains a high priority as the discipline expands into new areas of healthcare. Response during 2020 to the COVID-19 pandemic has provided an excellent example of the rapid diversification and impact attainable with telehealth, and may kindle a new momentum for accelerated service design and adoption processes in the future. This book, Telehealth Innovations in Remote Healthcare Services Delivery, is the tenth in the Global Telehealth series. Due to the prevailing COVID-19 pandemic and the restrictions placed on academic gatherings, the organizers issued a general call for contributions, with the intention of attracting a wide cross-section of contributions reflecting the breadth of different aspects of telehealth internationally. The resulting collection offers snapshots of research projects and studies of service experience from five*

*continents, with an emphasis on delivering benefits in regional settings in keeping with the theme of the book's title. Articles range from descriptions of telehealth networks and clinical-service instances such as cardiac health, mental health and pathology, several in Pacific-rim settings, to more generic papers on the evolution of such services, as well as commentaries on innovative considerations for telehealth such as the emergence of the concept of virtual care, the suitability of health apps, and the status of eHealth readiness in the developing world. This book is a valuable contribution to the body of knowledge on current telehealth research interests and trends, and will be of interest to all those working in the field.*

*This book documents the experiences, development, and prospects of the construction industry in numerous developing countries. It will provide a strong base of reference for countries looking to improve their construction industries as part of their wider economic development programme. The opening chapter presents a strategic overview of the contents of the book, and each country-specific chapter is structured to consider the legal and policy frameworks, administrative infrastructure and procedures, and implementation mechanisms, as well as the experiences, current activities, and future plans and programmes with respect to construction industry development in each country. The concluding chapter looks forward and considers the implications of future trends for the construction industries in developing countries and the actions which will be required to address them. Chapters cover: India, Singapore, Chile, South Africa,*

*Tanzania, Malaysia, Botswana, Ghana, Uganda, Indonesia, China, Croatia, and Eswatini. Readers will learn about the wealth of comparable stories from global coverage from the detailed country-specific cases. Building on important scholarly works in the field, this book is essential reading for academics, researchers, and policy makers in built environments, economics, construction management, infrastructure management, and the wider construction industry.*

The subject of tropical cyclones in Southern Africa, also known as hurricanes or typhoons in other regions of the world, has been growing over the past few decades. However, there is still limited literature on foundational and fundamental topics on the matter. To this end, this book addresses this gap, citing some examples from both historic and recent tropical cyclones. The book presents meteorological and climatic aspects of

tropical cyclones, including reviews on forecasting, warning message dissemination and public response aspects of early warning systems with a focus on the Tropical Cyclones Idai and Kenneth. Fundamentals in disaster risk reduction (DRR) are also discussed moving from the provisions of the Hyogo Framework for Action (2005–2015), to the Sendai Framework for Disaster Risk Reduction (2015–2030). Climate change issues are central to the publication, as well as the role of information and communication technologies in DRR and management. The book also tackles some challenges and opportunities associated with the implementation of regional legal and institutional frameworks on DRR. The book comes as part of a series with three volumes. The other volumes include “Cyclones in Southern Africa Vol. 1: Interfacing the Catastrophic Impact of Cyclone Idai with SDGs in Zimbabwe” and “Cyclones in Southern Africa Vol 3: Implications for the Sustainable Development Goals”. To this end, this book is suitable as a read for several professionals and disciplines such as tourism and

hospitality studies, economics, sustainable development, development studies, environmental sciences, arts, geography, life sciences, politics, planning and public health.

The authors of the chapters included in this volume provide preliminary answers to questions such as: How extensive were COVID-19 outbreaks in prisons, jails, and community corrections systems globally? Which regions and countries reported the largest outbreaks? Why were prisons and jails found to be "hot spots" for the spread of COVID-19 in most countries? How did governments initially respond to COVID-19 outbreaks in their corrections systems? Did the mitigation strategies used in each country reduce the spread of the infection in the corrections system (both in prisons and jails, and in community corrections)? Did the corrections-focused mitigation strategies used in each country have a positive or an adverse impact on public health and public safety? How likely is it that the varied short-term mitigation strategies implemented by governments will result in long-term

changes in corrections policies and practices? The book includes three chapters examining the global impact of the COVID-19 outbreaks, six regional overviews, and 27 country-specific reviews, including reviews targeting 21 of the 50 largest prison systems globally. This collection will be an excellent resource for researchers, policymakers, practitioners, and the general public interested in knowing more about the nature and extent of COVID-19 outbreaks in corrections systems globally, and about the diversity of responses developed and implemented by governments from each global region. The chapters in this book were originally published as a special issue of the journal *Victims & Offenders*.

An increasing number of academic libraries worldwide are adopting innovative technologies in creating, organizing, storing, managing, disseminating, preserving, and enhancing access to their vital knowledge in order to adapt to the changing library environment and to stay relevant in the digital world.

This transition necessitates a need for best practices and reimagined strategies of implementing innovative technologies to ensure sustainable knowledge access and increase knowledge sharing. *Innovative Technologies for Enhancing Knowledge Access in Academic Libraries* aims to provide best practices, innovative strategies, theoretical frameworks, conceptual frameworks, and empirical research findings regarding the application of emerging and innovative technologies in managing, preserving, and enhancing knowledge access in academic libraries worldwide. Covering a range of topics such as artificial intelligence, knowledge organization, records management, and library services, this reference work is ideal for librarians, researchers, scholars, practitioners, academicians, instructors, and students.

This edited book examines English-Medium Instruction (EMI) language policy and practice in higher education around the world, highlighting how English language usage affects the internationalization of universities,

the way that disciplines are taught and learned, and questioning whether internationalization through EMI achieves the values of global citizenship and inclusivity/diversity to which it aspires. Written by experts in the field, the book includes data-based research from universities around the globe, with three chapters on Asia and the Far East (Malaysia, Japan and China), four on Europe (Denmark, the Netherlands and Italy) and one each on Africa (Ethiopia) and Central America (Mexico). Sources include policy documents, questionnaire surveys, focus groups and semi-structured interviews involving university policymakers, lecturers, students, and administrative staff. This book will be of interest to students and scholars of language and education policy, internationalization and applied linguistics, particularly English-Medium Instruction (EMI), academic English and English as a Lingua Franca (ELF).

*This book provides an analysis of South African urban change over the past three decades. It draws on a seminal text, Homes Apart, and revisits conclusions drawn in that collection that marked the final phases of urban apartheid. It highlights changes in demography, social as well as economic structure and their differential spatial expression across a range of urban sites in South Africa. The evidence presented in this book points to a very complex set of narratives in urban South Africa and one that cannot be reduced to a singular statement so the conclusions of the various investigations are in many ways open. As urban apartheid represented one clear outcome, its post-apartheid urban legacies varies greatly from city to city. As such this book is a great resource to students and academics focused on urban change in South African cities since the demise of apartheid, and scholars of urban policy-making in South Africa and Southern urbanists generally. This book examines the detrimental impact of illicit financial flows on South Africa's development, political economy, and transformation in the 21st century. Over the years, illicit financial flows have led to the systematic looting and channelling away of South African resources, yet they are rarely studied by researchers looking to explain the country's underdevelopment and political economy. This book looks across sectors, showing that illicit financial flows cut across all the key pillars of development, frustrating the betterment of peoples' lives in South Africa.*

## Access Free 2019 2020 Kwazulu Natal Department Of Transport Home Page

*Investigating the problem from a decolonial perspective, the book delves deep into the catastrophic impacts of illicit financial flows for people and the economy, discusses how the problem is being combatted, and ultimately suggests solutions for rebuilding social trust between people and the state. Making an important contribution to the decolonial debate, as well as to discussions of South Africa's political economy, this book will be of interest to researchers across African studies, global development, political science, law and corruption studies.*
