Although Ashley Johnston is comfortable with a needle and thread—and really enjoys making handmade items for her children and home—she could certainly understand that sewing machines can strike fear and dread into the hearts of many crafters. The complicated machinery with the fussy parts as well as confusing pattern directions send many people running from any craft that requires sewing. No-Sew Love is filled with ideas for the non-sewing crafter or for the more casual sewist who would rather not haul out the sewing machine for a quick project. Materials all easily found at craft and fabric stores—hem tape, fusible webbing, a variety of glues, and of course, fabric—are all you need to whip up the 50 no-sew wonders in the book. There are throw pillows, grommet curtain panels, cute kids' clothing, holiday decorations, and even accessories for you! Projects are photographed at each step for crystal-clear directions, and sure-to-please results.

The work connected with the ordinary repairing of running engines, the emergency repairing executed to get engines ready hurriedly to meet the traffic demands on a road then chronically short of power, and diagnosing the numerous diseases that locomotives are heir to, provided ample material from which this book was constructed. The author is convinced that there is an urgent demand among engineers, machinists, and others, for plainly given information relating to numerous operations connected with the repairing and maintenance of locomotives. To meet this demand, the chapters on "Valve-Motion" and all the succeeding parts of the book were written. In preparing a book for the use of engineers, firemen, machinists, and others interested in locomotive matters, it has been the author's aim to treat all subjects discussed in such a way that any reader would easily understand every sentence written. No attempt is made to convey instruction in anything beyond elementary problems in mechanical engineering, and all problems brought forward are treated in the simplest manner possible.

"HELP! My Students Can't Write!" Why You Need a Writing Revolution in Your Classroom and How to Lead It. The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated, over and over, that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, TWR can make a dramatic difference. And the method does more than improve writing skills. It also helps: Boost reading comprehension Improve organizational and study skills Enhance speaking abilities Develop analytical capabilities TWR is as much a method of teaching content as it is a method of teaching writing. There's no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need, repeatedly, while also learning content.
