Vedic Astrology is a complex subject and one needs to consider various aspects to conclude on a native's horoscope. This book is an attempt to offer the basic steps in a simplified manner to analyze the horoscope at an elementary level. It is important to understand the mythological stories for each planet, to understand the effects it has on a chart. Therefore, you will find that this book is a mix of mythology, and process towards analyzing a chart. The key takeaway of Vedic Astrology is to understand oneself and one's life path, one's strengths and weaknesses, opportunities and pitfalls and the reasons why one's life path unfolds in a certain manner.

The 27 constellations (Nakshatra's) find its place in Vedas in Indian mythology of Hindus. According to Matsya Purana, King Daksha had 27 daughters who were married to Moon and later they were referred to as the Nakshatra's. These Nakshatra's are none other than the wife of Moon. The constellation name which we will refer in this material resembles the name of each wife of Moon. It has also been mentioned in the Purana that Rohini Constellation was considered to be the favourite wife of Moon. According to Indian Vedic Astrology, the wheel of Zodiac are considered to be of 360 degrees. There are nine planets and each planet have been assigned a constellation or nakshatra. These nakshatra are positioned in the Zodiac of 360 degrees and as a result each of them occupies 13-20' in the zodiac (360 divided by 27). This 13-20' is the distance, which Moon travels in one day. Time taken by Moon to travel. Now, further these constellations of 13-20' are divided into four equal pada's or quarters which is equivalent to 3-20'. Each such sub division of the constellation has been assigned a seeding sound, which will be dealt with in another series for the benefit of the readers. The constellation zodiac is rich in symbolism and meaning, and provides a framework for seeing the relationship of human life to the cosmos. In Astrology, an astrologer mainly refers to the Constellation as the 'Birth Star' which means the constellation lord in which Moon is placed. The Birth Star has a vital role in individual life as it governs the positive qualities, negative qualities, persona, profession, etc of a native. It is said in Vedic Astrology that a well positioned Birth Star is considered to be auspicious with respect to name, fame, power, position and prestige whereas an ill-placed birth star may ruin the life of native from riches to rags. In this material, we will try to explain some interesting facts about each constellation (tit bits, facts, symbol, anatomy, etc) along with the general effects on the native's persona with respect to the following parameters when any of such constellation appears to be the

'Birth Star' of the native:-* Positive Qualities in the Native.* Negative Qualities which one should avoid.*
