Plant Pathology explores the topic of plant pathology and aligns classic studies and knowledge in the topic with the current state of research, in an accessible format. The text is supported by summary tables of key information and, where appropriate, schematic diagrams to reinforce difficult concepts such as the process of disease infection, cell-to-cell recognition, and plant breeding mechanisms used to develop resistant cultivars. The compendium of diseases focuses on important and major economic disease organisms from a number of crop and ornamental plants, including a dedicated section on fruit crops. The compendium is supported by original photographs, photomicrographs and electron micrographs of key pathogens and the development of structures such as the haustoria and the hypha, and show processes of cellular degradation. The section on applied disease management contains short case studies highlighting key disease organisms affecting the crops of a range of growers, illustrating the environment, disease symptoms and control strategies these growers are currently using to mitigate loss of production.

Against a background of continuing erosion of Jewish numbers, the book investigates the many facets of Jewish identity by throwing the spotlight on people of part-Jewish descent, on born Jews on the fringes of Jewish life and those who have sought alternative affiliations. Emma Klein also calls for a response from religious and lay leaders to parochial communal

attitudes and the anomaly of the definition of Jewish status in Jewish law which may be seen to contribute to the erosion.

Self-Regulated Learning in Technology Enhanced Learning Environments

The Struggle for Identity Today

Business Publication Advertising Source

Self-regulated learning (SRL) subsumes key aspects of the learning process, such as cognitive strategies, metacognition and motivation, in one coherent construct. Central to this construct are the autonomy and responsibility of students to take charge of their own learning. Skills for self-regulation can be encouraged both directly and indirectly through a range of learning activities. In this book we look specifically at the ways in which technology enhanced learning environments (TELEs) have been used to support self-regulation. The book provides an overview of recent studies on SRL in TELEs in Europe – a perspective which is new and has not been articulated hitherto. It addresses conceptual and methodological questions as well as practices in technology enhanced learning. While the focus is on European studies, we are aware that much of the groundwork in the field of SRL

has emanated from the United States. The book is divided into three parts: (A) Foundations of SRL in TELEs, (B) Empirical studies on SRL in TELEs and (C) SRL in TELEs: perspectives on future developments. The book presents a rich resource of information for researchers and educators at all levels who are interested in supporting the acquisition of SRL through TELEs.

Philosophy of the Law is an attempt, through biblical exegesis and philosophical examination, to understand the nature of the political in Judaism, and especially in its founding text, the Hebrew Bible. A study of the Torah and the Hebrew language are at the core of this work, but what is at stake is their topicality to the important issue of the political in our day.

An ageing film director, Yair Moses, has been invited to the Spanish pilgrimage city of Santiago de Compostela to attend a retrospective of his early work. As he and Ruth, his leading actress and former muse, settle into their room at the parador, Moses notices a painting depicting the classical story of an elderly prisoner nursing at the breast of a young woman. For the first time in decades, Moses recalls a similar scene from one of his early films, which led to his dramatic estrangement from his screenwriter, Trigano.

Trigano's spirit haunts the retrospective, as the director and actress re-live each film. They question artistic decisions and are surprised at how differently each remembers the past, slowly revealing to each other past reasons for decisions taken at the time. A troubled Moses decides to seek out the elusive Trigano to settle their differences, and to propose a new collaboration. But the reluctant screenwriter demands an outrageous price for this reconciliation: Moses must commit to a deeply disturbing act of atonement. Ultimately, reality and the sublime mingle when Moses has an epiphany, as he nears the end of his quest and the source of his imagination. Searching, witty and trenchant, this work by an internationally respected and original writer is a meditation on the roots of artistic inspiration, the limits and the truth of memory, and the struggle for artistic creation.

Mass tourism is one of the most striking developments in postwar western societies, involving economic, social, cultural, and anthropological factors. For many countries it has become a significant, if not the primary, source of income for the resident population. The Mediterranean basin, which has long been a very popular destination, is explored here in the first study to scrutinize the region as a whole and over a long period of time. In particular, it investigates the area's economic and social networks directly involved in tourism, which includes examining the most popular spots that attract tourists and the crucial actors, such as hotel entrepreneurs, travel agencies,

charter companies, and companies developing seaside resort networks. This important volume presents a fascinating picture of the economics of tourism in one of the world's most visited destinations.

A Story of Success and Costs

Tourism remains the world's most significant growth industry, and is a lifeline to the future for many developing countries. But there is often an environmental price to be paid for tourism, which is an activity that concentrates pressure on landscapes in both spatial (most people want to see the same things) and temporal (most people travel at the same time) senses. This collection addresses both the growing trend in favor of "ecotourism" and its environmental impacts.

Contributors present a sampling of nature tourism experiences (Kenya, Yellowstone, Costa Rica), and deal with nuts-and-bolts issues such as economics, marketing, and the crucial role of local involvement. The book focuses on the ways in which nature tourism can continue to stimulate local economies while minimizing environmental degradation. ISBN 1-55963-037-X: \$34.95.

Basic Plant Pathology Methods

Since the 1960s, nations across the “developed world” have been profoundly shaped by deindustrialization. In regions in which previously dominant industries faced crises or have disappeared altogether, industrial heritage offers a fascinating window into the phenomenon’s cultural dimensions. As the contributions to this volume demonstrate, even as forms of industrial heritage provide anchors of identity for local populations, their meanings remain deeply contested, as both radical and conservative varieties of nostalgia intermingle with critical approaches and straightforward apologies for a past that was often full of pain, exploitation and struggle.

This volume contains the papers presented at the International Workshop on Tools for Working with Guidelines, (TFWWG 2000), held in Biarritz, France, in October 2000. It is the final outcome of the International Special Interest Group on Tools for Working with Guidelines.

Human-computer interaction guidelines have been recognized as a uniquely relevant source for improving the usability of user interfaces for interactive systems. The range of interactive techniques exploited by these interactive systems is rapidly expanding to include multimodal user interfaces, virtual reality systems, highly interactive web-based applications, and three-dimensional user interfaces. Therefore, the scope of guidelines' sources is rapidly expanding as well, and so are the tools that should support users who employ guidelines to ensure some form of usability. Tools For Working With Guidelines (TFWWG) covers not only software tools that designers, developers, and human factors experts can use to manage multiple types of guidelines, but also looks at techniques addressing organizational, sociological, and technological issues.

An authoritative economic history of Israel from its founding to the present In 1922, there were ninety thousand Jews in Palestine, a small country in a poor and volatile region. Today, Israel has a population of nine million and is one of the richest countries in the world. The Israeli Economy tells the story of this remarkable transformation, shedding critical new light on Israel's rapid economic growth. Joseph Zeira takes readers from those early days to today, describing how Israel's economic development occurred amid intense fighting with the Palestinians and neighboring Arab countries. He reveals how the new state's astonishing growth continued into the early 1970s, and traces this growth to public investment in education and to large foreign transfers. Zeira analyzes the costs of the Arab-Israeli conflict, demonstrating how economic output could be vastly greater with a comprehensive peace. He discusses how Israel went through intensive neoliberal economic policies in recent decades, and shows how these policies not only failed to enhance economic performance, but led to significant social inequality. Based

on more than two decades of groundbreaking research, The Israeli Economy is an in-depth survey of a modern economy that has experienced rapid growth, wars, immigration waves, and other significant shocks. It thus offers important lessons for nations around the world.

This book explores the intersection of Islamophobia and Israel-and the ways that the U.S. "war on terror" impacts both. The authors challenge the Jewish community's use of a "pro-Israel" litmus test of who is a "good" Muslim;" trace the funding connections and other links between Islamophobia and right-wing pro-Israel supporters; document the ADL's history of anti-Muslim and anti-Arab actions; and analyze two high-profile post-9/11 anti-Muslim campaigns.
