About the Book In The Hyper-Social Company, Ed Moran of Deloitte and Francois Goissieaux of BeelineLabs identify how (and which) social media are fundamentally changing core business processes and the way businesses and customers interact. These changes are being driven by what the authors call the “Hyper-Social Shift.” Through interviews with more than 500 companies and studies of social media, Moran and Goissieaux have gained radical new insights into the advantages many businesses have derived from new technologies and practices. From these findings, the authors have developed self-analysis tools—including the Hyper-Sociality Index (HSI) profiled in this book—that leaders and managers can use to assess their enterprise’s Hyper-Sociality; pinpoint which parts of their organization are ready to make the leap; and benchmark their progress against competitors, or against their industry as a whole.
