English has been deemed the most 'successful' language ever, with 1500 million speakers internationally, presenting a difficult task to those who wish to investigate it in its entirety. However, Crystal explores the subject in a measured but engaging way, always backing up observations with facts and figures. Written in a detailed and fascinating manner, this is a book written by an expert both for specialists in the subject and for general readers interested in the English language.

Transfer in language production is seen as a basic metaphorical concept denoting language interaction that must be discussed in connection with other metaphorical concepts denoting language interaction as well. If this is true, the assessment of language transfer in light of the production paradigm has hardly begun.
