Black & White Edition This book contains everything you need to be comfortable speaking French. This book concentrates on that which is essential to learn in order to speak another language. It is based on three basic principles of learning a language. These principles make up the three keys of learning a language: 1) Pronunciation, 2) Verb conjugations, grammar and word usage and 3) Vocabulary. First, you must be able to properly pronounce a language to be understood. Second, you need to learn to conjugate the different verb tenses, become familiar with the essential rules of grammar and use words correctly. French grammar, verb conjugations and word usage are thoroughly covered in this book. Third, you need to learn essential vocabulary. As a general guideline, you can get by with a vocabulary of approximately 3,000 words, and you can speak comfortably with a vocabulary of about 6,000 words. The key, though, is to learn the most frequently spoken words. This book concentrates on the most frequently used words in French. First you will be presented with the 3,000 most common words in French. In the Appendix, you will find another 3,000 words, which comprise the next 3,000 most frequently used words in French. This book combines the three basic principles of learning a language to guide you to become comfortable in speaking and understanding French.

disciplinary perspective. All chapters are contributed by leading scholars in their respective areas. This Handbook contains eight sections: history, languages and dialects, language contact, morphology, syntax, phonetics and phonology, socio-cultural aspects and neuro-psychological aspects. It provides not only a diachronic view of how languages evolve, but also a synchronic view of how languages in contact enrich each other by borrowing new words, calquing loan translation and even developing new syntactic structures. It also accompanies traditional linguistic studies of grammar and phonology with empirical evidence from psychology and neurocognitive sciences. In addition to research on the Chinese language and its major dialect groups, this handbook covers studies on sign languages and non-Chinese languages, such as the Austronesian languages spoken in Taiwan.

He didn’t learn them in school—who does? Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he’s discovered. Starting with pronunciation, you’ll learn how to rewire your ears and turn foreign sounds into familiar sounds. You’ll retrain your tongue to produce those sounds accurately, using

tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.
