A course to prepare students for the IELTS test at a foundation level (B1). Combines contemporary classroom practice with topics aimed at young adults

Arithmetic deals with operations using numbers, but algebra is needed to thoroughly understand the concept of number, which is vital in our society. The natural sequel to the author’s previous book Anyone Can Do Arithmetic, Anyone Can Do Algebraaims to promote genuine understanding of one of the most important foundation stones of Mathematics. Within his book, Brian Fletcher deals with the fundamental aspects of algebra in order to combat the common misconception that algebra is too difficult. Focusing on how these algebraic rules can be applied, topics range from quadratic equations and powers of numbers, to graphs and how they provide an alternative method of solving any equation. Through the examination of such topics, Anyone Can Do Algebra can provide a full and proper understanding of an important mathematic concept. Unlike other algebra based books, this book focuses on the steady build up of understanding to provide a more solid foundation, rather than simply learning and repeating rules. This book will appeal to those who have previously struggled with maths, in particular algebra, and wish to improve their understanding of a vital aspect of learning. Praise for Brian Fletcher’s previous book, Anyone can do Arithmetic "If you are one of those people who view arithmetic with the same confusion as attempting a DIY job without instructions, this is the book for you. The explanations and examples are detailed yet easy to follow in a very reader-friendly way. It should be in every home as a reference book." Madelyn Arnold, former teacher

Now discover how to answer some of kids' most interesting questions about dinosaurs and Noah’s ark like: How did all the dinosaurs fit on the ark? How did Noah keep the animals on the ark from eating each other?

Where did all the water go after the Flood? Why aren't there fossils of humans from Noah’s flood? Answers are important.
