Electric traction is the most
favourable type of power
supply for electric railways
from both an ecological and
an economic perspective. In
the case of urban mass transit

and high-speed trains it is the only possible type of traction. Its reliability largely depends on contact lines, which must operate in all climatic conditions with as high availability and as little maintenance as possible. Extreme demands arise when overhead contact lines are required to provide reliable and safe power transmission to traction vehicles travelling at speeds in excess of 250 km/h. The authors have used their worldwide experience to provide comprehensive descriptions of configuration, mechanical and electrical

design, installation, operation and maintenance of contact lines for local and long-distance transportation systems, including high-speed lines. In this book, railway company professionals and manufacturers of contact line systems, students and those embarking on a career in this field will find practical guidance in the planning and implementation of systems, product descriptions, specifications and technical data, including standards and other regulations. Special emphasis is laid on the interaction of the individual

components of power supply, especially between contact lines and pantographs. Since large sections of the book are dedicated to system aspects, consultant engineers can also use it as a basis for designing systems as well as interfaces to other subsystems of electric railway engineering. The contents of the book are rounded off by examples of running systems.

Chinese-speaking popular cultures have never been so queer in this digital, globalist age. The title of this pioneering volume, Boys' Love, Cosplay, and Androgynous Idols: Queer Fan Cultures in Mainland China, Hong Kong, and Taiwan already gives an idea of the colorful, multifaceted realms the fans inhabit today. Contributors to this collection situate the proliferation of (often online) queer representations,

productions, fantasies, and desires as a reaction against the norms in discourses surrounding nation-states, linguistics, geopolitics, genders, and sexualities. Moving beyond the easy polarities between general resistance and capitulation, Queer Fan Cultures explores the fans' diverse strategies in negotiating with cultural strictures and media censorship. It further outlines the performance of subjectivity, identity, and agency that cyberspace offers to female fans. Presenting a wide array of concrete case studies of queer fandoms in Chinese-speaking contexts, the essays in this volume challenge long-established Western-centric and Japanese-focused fan scholarship by highlighting the significance and specificities of Sinophone queer fan cultures and practices in a globalized

world. The geographic organization of the chapters illuminates cultural differences and the other competing forces shaping geocultural intersections among fandoms based in Mainland China, Hong Kong, and Taiwan. "This important collection complicates our understanding of fan practices, showing how national and regional factors play an important role in how media texts and identities are understood. It also shows how the Chinese-speaking world is home to dense and often conflicting modes of audience reception of cultural texts deriving from Sinophone, Japanese, and Western contexts." —Mark McLelland, University of Wollongong

"An exciting anthology by a talented group of emergent scholars whose vibrant studies offer fresh insights on the diverse practices and

transregional flows of queer fandom in the Chinese-speaking world. Local in its specificity and transnational in its scope, this book highlights the creativity of queer fan practices while critically locating them within the political and social structures that produce them.” —Helen Hok-Sze

An inside look at young

Iranians navigating poverty

and stigma in a time of crisis Crippling sanctions, inflation, and unemployment have increasingly burdened young people in the Islamic Republic of Iran. In *Coming of Age in Iran*, Manata Hashemi takes us inside the lives of poor Iranian youth, showing how these young men and women face their future prospects. Drawing on first-hand accounts, Hashemi follows their stories, one by one, as they struggle to climb up the proverbial ladder of success. Based on years of ethnographic research among these youth in their homes, workspaces, and places of leisure, Hashemi shows how public

Judgments can give rise to meaningful changes for some while making it harder for others to escape poverty. Ultimately, Hashemi sheds light on the pressures these young men and women face, showing how many choose to comply with—rather than resist—social norms in their pursuit of status and belonging. *Coming of Age in Iran* tells the unprecedented story of how Iran's young and struggling attempt to extend dignity and alleviate misery, illuminating the promises—and limits—of finding one's place during a time of profound uncertainty.

#1 New York Times
bestseller "Essential
reading for anyone
interested in
understanding and
treating traumatic
stress and the scope of
its impact on society."
—Alexander McFarlane,
Director of the Centre

for Traumatic Stress
Studies A pioneering
researcher transforms
our understanding of
trauma and offers a bold
new paradigm for healing
in this New York Times
bestseller Trauma is a
fact of life. Veterans
and their families deal
with the painful
aftermath of combat; one
in five Americans has
been molested; one in
four grew up with
alcoholics; one in three
couples have engaged in
physical violence. Dr.
Bessel van der Kolk, one

of the world's foremost experts on trauma, has spent over three decades working with survivors. In *The Body Keeps the Score*, he uses recent scientific advances to show how trauma literally reshapes both body and brain, compromising sufferers' capacities for pleasure, engagement, self-control, and trust. He explores innovative treatments—from neurofeedback and meditation to sports, drama, and yoga—that

offer new paths to recovery by activating the brain's natural neuroplasticity. Based on Dr. van der Kolk's own research and that of other leading specialists, *The Body Keeps the Score* exposes the tremendous power of our relationships both to hurt and to heal—and offers new hope for reclaiming lives.

Annual Report

Directors have long been the main figures on Eastern European stages. During the last three decades some of the most outstanding among them have risen to international stardom thanks to their ground-breaking productions that speak to audiences far beyond local borders. Not by chance, a considerable number of these directors have won the second-biggest theatre award on the continent - the European Prize for (New) Theatrical Realities. It would not be an exaggeration to say that the top directors of the region have been pushing contemporary theatre as a whole ahead into new territories. This book offers informative and in-depth portraits of twenty of these

File Type PDF 52935 2 Product Details Electronic Parts Search Engine

directors, written by leading critics, scholars, and researchers, who shed light on the directors' signature styles with examples of their emblematic productions and outline the reasons for their impact. In addition, in two chapters the selected directors themselves discuss their artistic family trees as well as the main stakes theatre faces today. The book will be of interest to theatre scholars, students, and anybody engaged with theatre on a global scale.

Masked priming has a short and somewhat controversial history.

When used as a tool to study whether semantic processing can occur in the absence of conscious awareness, considerable debate followed, mainly about whether masked priming truly tapped unconscious processes. For research into other components of visual word processing, however - in particular, orthographic, phonological, and morphological - a general consensus about the evidence provided by masked priming results has emerged. This book contains thirteen original chapters in which these three components of visual word processing are examined using the masked priming procedure. The

chapters showcase the advantages of masked priming as an alternative to more standard methods of studying language processing that require comparisons of matched items.

Based on a recent conference, this book offers up-to-date research findings, and would be valuable to researchers and students of word recognition, psycholinguistics, or reading.
