**Quito, Ecuador, was one of colonial South America's most important artistic centers. Yet the literature on painting in colonial Quito largely ignores the first century of activity, reducing it to a "handful of names," writes Susan Verdi Webster. In this major new work based on extensive and largely unpublished archival documentation, Webster identifies and traces the lives of more than fifty painters who plied their trade in the city between 1550 and 1650, revealing their mastery of languages and literacies and the circumstances in which they worked in early colonial Quito. Overturning many traditional assumptions about early Quitoño artists, Webster establishes that these artists—most of whom were Andean—functioned as visual intermediaries and multifaceted cultural translators who harnessed a wealth of specialized knowledge to shape graphic, pictorial worlds for colonial audiences. Operating in an urban mediascape of layered languages and a colonial Spanish realm of alphabetic script and mimetic imagery and a colonial Andean world of discursive graphic, material, and chromatic forms—Quitoño painters dominated both the pen and the brush. Webster demonstrates that the Quitoño artists enjoyed fluency in several areas, ranging from alphabetic literacy and sophisticated scribal conventions to specialized knowledge of pictorial languages: the materials, technologies, and chemistry of painting, in addition to perspective, proportion, and iconography. This mastery enabled artists to deploy languages and literacies—alphabetic, pictorial, graphic, chromatic, and material—to obtain power and status in early colonial Quito.**

**Included are the latest techniques used by some of the world's fastest swimmers and new methods of stroke measurement. The extensive coverage of training in Part I begins with a discussion of basic physiology and energy metabolism, equipping you with background information necessary to fine-tune your individual training techniques. You'll find information on special topics, including female swimmers, masters swimmers, and training in various age groups, plus coverage of the anaerobic threshold theory of endurance training, systematic approaches to using energy systems in training, and seasonal planning.**

**All the fundamentals. No fluff. Learn more with less! A truly revolutionary American Government textbook, Christine Barbour's AmGov: Long Story Short, responds to the needs of today's students and instructors through brevity and accessibility. The succinct ten chapters are separated by tabs that make it easy to skim, flip, revisit, reorient, and return to content quickly. Reading aids like bullets, annotations and arrows walk students through important facts and break up the material in short, engaging bites of information that highlight not only what is important but why it's important. Though brief, this core book is still robust enough to provide everything that students need to be successful in their American Government course. Whether for the on-the-go student who doesn't have time to read and digest a lengthy chapter, or the instructor who wants a book that will stay out of their way and leave room for plenty of supplementary reading and activities, AmGov provides a perfectly simplified foundation for a successful American Government course.**

**'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.'** – Ben Poyle In 2014 and in her mid-twenties, Janey Lowe had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.

90 Days of Failure and Some Success

Sometime in the 18th century, the word equality gained ground as a political ideal, but the idea was always vague. In this treatise, Erik von Kuehnelt-Leddihn argues that it reduced to one simple and very dangerous idea: equality of political power as embodied in democracy. He marshals the strongest possible case that democratic equality is the very basis not of liberty, as is commonly believed, but the total state. He uses national socialism as his prime example. He further argues Aristocracy, not democracy, gave us liberty. On his side in this argument, he includes the whole of the old liberal tradition, and offers overwhelming evidence for his case. In our times, war and totalitarianism do indeed sail under the democratic flag. This book, capable of overturning most of what you thought you knew about political systems, was first published in 1952.

In this book, Karl Adam seeks to identify the "spirit" or essence of Roman Catholicism. The Spirit of Catholicism is an accessible, articulate, and compelling presentation of the fundamental tenets of the Catholic faith, explaining to all - Catholic and non-Catholic alike - exactly what the Church represents. Adam attempts to communicate about the Catholic faith and the Church's role as the keeper of the faith. Those attempting to grasp the very heart and spirit of Catholicism should attempt to address these ambiguities. What are the fundamental attributes of the Catholic Church? What is the source from which it has drawn vigor and life through its two thousand years of life on earth? What are the secret sources of its incredible vitality in the world today? The author answers these and many other questions about the nature and structure of the Church. He examines the essential nature of the Catholic Church from the basic premise that it was expressed

"Shirley Flint explores the stories of three widows in Mexico City, giving us a glimpse at the structure of everyday life in colonial Mexico, especially the ways that women conducted business, practiced religion, and manipulated politics. Each of these widows' stories illustrates an often overlooked aspect of Spanish life in the New World"--Provided by publisher.

**Building on earlier work in the anthropology of law and taking a critical stance toward it, June Starr and Jane F. Collier ask, "Should social anthropologists continue to isolate the 'legal' as a separate field of study?" To answer this question, they confront critics of legal anthropology who suggest that the subfield is dying and advocate a reintegration of legal anthropology into a renewed general anthropology. Chapters by anthropologists, sociologists, and law professors, using anthropological rather than legal methodologies, provide original analyses of particular legal developments. Some contributors adopt an interpretative approach, focusing on law as a system of meaning; others adopt a materialistic approach, analyzing the economic and political forces that historically shaped relations between social groups. Contributors include Said Armir Arjomand, Anton Blok, Bernard Cohn, George Collier, Carol Greenhouse, Sally Falk Moore, Laura Nader, June Nash, Lawrence Rosen, June Starr, and Joan Vincent.**

**Reacting to the rising numbers of mixed-blood (Spanish-Indian-Black African) people in its New Spain colony, the eighteenth-century Bourbon government of Spain attempted to categorize and control its colonial subjects through increasing social regulation of their bodies and the spaces they inhabited. The discourse of calidad (status) and raza (lineage) on which the regulations were based also found expression in the visual culture of New Spain, particularly in the unique genre of casta paintings, which purported to portray discrete categories of mixed-blood plebeians. Using an interdisciplinary approach that also considers legal, literary, and religious documents of the period, Magali Carrera focuses on eighteenth-century portraiture and casta paintings to understand how the people and spaces of New Spain were conceptualized and visualized. She explains how these visual practices emphasized a seeming realism that constructed colonial bodies—elite and non-elite—as knowable and visible. At the same time, however, she argues that the chaotic specificity of the lives and lived conditions in eighteenth-century New Spain belied the illusion of social orderliness and totality narrated in its visual art. Ultimately, she concludes, the inherent ambiguity of the colonial body and its spaces brought chaos to all dreams of order.**

Preventing HIV/AIDS in the Middle East and North Africa

GRE Power Vocab

MathLinks 7

The HIV/AIDS epidemic has the potential to impede and even reverse development if not addressed early enough. Poverty and income inequality have been shown to facilitate the diffusion of HIV epidemics. While abject poverty in the Middle East and North Africa region remains low, a significant proportion of the population (23.2%) live under \$2 per day and are extremely vulnerable in their ability to cope with shocks. In order to preserve the benefits of national and regional development investments put in place by governments, and donor agencies, greater investments to improve HIV/AIDS advocacy, information and prevention strategies are needed now to maintain the current low prevalence levels. This title outlines the role of the Bank in confronting the HIV/AIDS epidemic in the region based on a review of needs and gaps at the regional and country level.

The long awaited substantial revision and reorganization of this important bibliography of Pacific voyages, jointly published with W. Reese Company of New Haven. Since its original publication in three volumes between 1974 and 1983, the Hill catalogue has been an essential reference for anyone interested in Pacific Voyages, Hawaii, the Pacific Northwest, and the South Seas. The first edition has long been out of print and commands high prices in the antiquarian market.

The motivation for writing this book is the authors' deeply held conviction that good governance is an essential element for any organisation that wishes to maximise its effectiveness. They are not alone in observing that in many cases companies or other organisations that perform badly are often poorly governed. Indeed, the key explanation for poor performance is often poor governance. This observation is not limited geographically and there are many examples from around the world. Concern with good governance is not just limited to the free enterprise system. It is universal.

You need a new sales job and the clock is ticking. The next 90 Days are going to be crucial to determining whether you flame out in your new role or crush it. You are beset on all sides with challenges from financial insecurity to diminished confidence. If only there was a guide to navigate the minefield... THERE IS NOW! 90 Days of Failure, and Some Success is a step by step guide to help you make the right moves to find the right job and flourish! Each step of the career transition journey is explained from the perspective of someone who has helped shepherd hundreds of sales people successfully through the most uncertain time in any career. You are not alone. There is help on the way. You will succeed.

This major work presents the first comprehensive survey on entomological studies in Iran from prehistoric periods up to modern times. This concise collection and excerpts from the literature are complemented by over 130 color figures of superb quality showing insects and their habitats. Volume 1 Faunal Studies concentrates on the systematic taxonomy of Iranian insects. It also lists all members of Rhopalocera (butterflies) and four families of Heterocera (moths). An introductory chapter is reserved for basic information on the geography, vegetation and climate of Iran. Volume 2 Applied Entomology starts with a chapter on the history of entomology in Iran until current times. Several chapters cover agricultural aspects of entomology, such as destructive insects, biological control or cultivars exhibiting resistance to insect pests. Other chapters are on medical entomology, e.g. mosquito-, sandfly- or flea-borne diseases and human myiasis.

The book presents the leading researchers and their seminal discoveries in the field.

**FOOD ETHICS. 2E explores the ethical choices we make each time we eat. With twenty-six readings that bring together a diverse group of voices, this textbook dives into issues such as genetically modified foods, animal rights, population and consumption, the food industry's impact on pollution, centralized versus localized production, and more. In addition, this edition includes new introduction, new readings, a comprehensive index, and study questions that frame these significant issues for discussion and reflection. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.**

**This contributed volume offers a comprehensive and detailed overview of the various aspects of long non-coding RNAs and discusses their emerging significance. Written by leading experts in the field, it motivates young researchers around the globe, and offers graduate and postgraduate students fascinating insights into genes and their regulation in eukaryotes and higher organisms.**

**Professor Alfred Haverkamp, founder of the Arye Maimon Institute for Jewish History at Trier University, has been a leading scholar and successful mentor for medieval historical research on Jews and Judaism in Central Europe (Ashkenaz) since the 1970s. This Festschrift joins together current multi-disciplinary perspectives on medieval Jewish life and Jewish-Christian relations, in studies based on archival and manuscript sources as well as medieval sculpture and artefacts. More Food: Road to Survival is a comprehensive analysis of agricultural improvements which can be achieved through scientific methods. This reference book gives information about strategies for increasing plant productivity, comparisons of agricultural models, the role of epigenetic events on crop production, yield enhancing physiological events (photosynthesis, germination, seedling emergence, seed properties, etc.), tools enabling efficient exploration of genetic variability, domestication of new species, the detection or induction of drought resistance and apomixes and plant breeding enhancement (through molecularly assisted breeding, genetic engineering, genome editing and next generation sequencing). The book concludes with a case study for the improvement of small grain cereals. Readers will gain an understanding of the biotechnological tools and concepts central to sustainable agriculture More Food: Road to Survival is, therefore, an ideal reference for agriculture students and researchers as well as professionals involved sustainability studies.

**Painting in Latin America, 1550-1820: From Conquest to Independence surveys the diverse styles, subjects, and iconography of painting in Latin America between the 16th and 19th centuries. While European art forms were widely disseminated, copied, and adapted throughout Latin America, colonial painting is not a derivative extension of Europe. The ongoing debate over what to call it—mestizo, hybrid, creole, indo-hispanic, tequitquil—testifies to a fundamental yet unresolved question of identity. Comparing and contrasting the Viceroyalties of New Spain, with its center in modern-day Mexico, and Peru, the authors explore the very different ways the two regions responded to the influence of the Europeans and their art. A wide range of art and artists are considered, some for the first time. Rich with new photography and primary research, this book delivers a wealth of new insight into the history of images and the history of art.**
