Household tips by a popular columnist include fast tidy jobs for unexpected visitors, organizing clutter, creating a self-maintained kitchen, coping with mess-makers, and keeping the bathroom clean. If you think it's not possible to have a virtually self-cleaning home—think again! America's self-proclaimed “#1 Avoidance Expert” tells all in this often hilarious, always smart, and eminently practical

compendium of tips, hints, and secrets to maintaining a spotless home by barely lifting a finger. Would you rather arrange flowers and light candles than dust the table they sit upon? Would you rather sweep the dust under the rug than vacuum it? Here at last, in this terrific "antihousework" bible, Paula Jhung blends artful advice, a soupcon of illusion, and a bucketful of wit to whip up super solutions for the "I Hate to Housekeep" brigade. Sweeping (quickly) through every room in the house, Jhung gives you the dirt. No modern industrial

enterprise, particularly in such areas as chemical processing, can operate without a secure, and reliable, network of automated monitors and controls. And those operations need alarm systems to alert engineers and managers the moment anything goes wrong or needs attention. This book, by one of the world's leading experts on industrial alarm systems, will provide A to Z coverage of designing, implementing, and maintaining an effective alarm network. "Making It Work is destined to be the definitive guide for years to come on how to make the

regular school education a successful experience for blind/visually impaired children. With chapters flowing logically and full of detailed, useful information, it will be an essential handbook for school staff, specialized service providers, and parents of blind/visually impaired children. This is an exquisite, enlightened guide for the education of blind/visually impaired children in the new millennium." ~ Joe Cutter, Early Childhood O&M Specialist "With its scope, attention to detail, and skillful presentation of the larger

issues involved in the education of students who are blind/visually impaired in regular school, Making It Work is a timely and most welcome resource for educational teams." ~ Missy Garber, Pennsylvania College of Optometry

Used world-wide as a definitive technology curriculum, this six-volume series (Fourth Edition, 2011) is the all-in-one solution to running an effective, efficient, and fun technology program whether you re the lab specialist, IT coordinator, classroom teacher, or homeschooler. It is the choice

The Evolution of Paleolithic Technologies provides a novel perspective on long-term trajectories of evolutionary change in Paleolithic tools and tool-makers. Members of the human lineage have been producing stone tools for more than 3 million years. These artefacts provide key evidence for important evolutionary developments in hominin behaviour and cognition. Avoiding conventional approaches based on progressive stages of development, this book instead examines global trends in six separate dimensions of technological behaviour between 2.6 million and 10,000 years ago. Combining these independent trends results in both a broader

and a more finely punctuated perspective on key intervals of change in hominin behaviour. To draw this picture together, the concluding section explores behavioural, cognitive, and demographic implications of developments in material culture and technological procedures at seven key intervals during the Pleistocene. Researchers interested in Paleolithic archaeology will find this book invaluable. It will also be of interest to archaeologists researching stone tool technology and to students of human evolution and behavioural change in prehistory. The ever-increasing acceleration of technological change demands that today's information

professionals and educators not only be constantly acquiring new knowledge and skills, but also that they cultivate the ability to make sound judgments on which technologies to embrace. If you are grappling with information overload and wondering how you can keep up, this guide is for you. • Helps information specialists create a strategy for keeping up with new technologies and for making informed judgments on which technologies to test and integrate into library services • Provides ideas for designing curriculum for an education technology specialist career track in library school • Gives those who are preparing to interview for a technology

specialist position a reliable guide for professional growth • Identifies which types of resources are most helpful for keeping up with new technologies
