Mayhem breaks out in the fifth grade when the Venice Menace bullies his classmates into letting him become a regular guest on "Kidsview," the school's radio program.

"Unless we believe that those who have more are inherently superior to those who have less, we should be troubled by the fact that patterns of achievement are often fairly predictable, particularly with respect to students' race and class." In *Creating the Opportunity to Learn*, Wade Boykin and Pedro Noguera help navigate the turbid waters of evidence-based methodologies and chart a course toward closing (and eliminating) the academic achievement gap. Turning a critical eye to current and recent research, the authors present a comprehensive view of the achievement gap and advocate for strategies that contribute to the success of all children. Boykin and Noguera maintain that it is possible to close the achievement gap by abandoning failed strategies, learning from successful schools, and simply doing more of what the research shows is most effective. Success is founded on equity, but equity involves more than simply ensuring students have equal access to education; equity also entails a focus on outcomes and results. If we want to bring about significant improvements in those outcomes, we have to do more to address the context in which learning takes place. In short, we must create schools where a child's race or class is no longer a predictor for how well he or she might perform.

*Stop the Summer Slide! How much could possibly be lost in a summer? Research indicates 2 months of reading skills and 2 1/2 months of math skills are lost over a single summer. Plus, summer slide is cumulative, so those lost months add up over time. Combined over the years, by the time a student reaches middle school, they've lost the equivalent of 2 years of learning to summer slide. And the loss is greater at higher grade levels. 9 out of 10 teachers have to re-teach material when kids return to school in the fall in order to get students caught up. Teachers spend anywhere from 4-6 weeks re-teaching material students forgot due to summer slide. While schools may stop teaching in the summer, the learning doesn't have to come to a halt. Prevent Summer Learning Loss Our books are designed to teach the most important vocabulary and help your child prepare for the coming year. This remarkable book reveals a system that shows your student how to learn faster, easier and without frustration. By mastering the hidden language of the 5th grade, you will be poised to tackle the toughest of questions and topics with ease. We've discovered that the key to success in 5th grade lies with mastering the Insider's Language of the grade. Students who score high on their standardized exams have a strong working vocabulary in the subject tested. They know how to decode the exam vocabulary and use this as a model for success. Students with a strong 5th grade Insider's Language consistently: Perform better on standardized exams Learn faster and retain more information Feel more confident in their preparation Perform better in class Gain more satisfaction in learning The 5th grade vocabulary guide is different from traditional review books because it focuses on the grade's Language. It is an outstanding supplement to a traditional review program. It helps your preparation for the grade*

*become easier and more efficient. The strategies, puzzles, and questions give you enough exposure to the Insider Language to use it with confidence and make it part of your long-term memory. The 5th grade words you absolutely must know book is an awesome tool to use over the summer as it will help you develop a strong working Insider's Language before your student even begins his or her year. Don't risk losing the gains earned during the year. Learn the Secret to Success in 5th grade! After nearly 20 years of teaching Lewis Morris discovered a startling fact: Most students didn't struggle with the subject, they struggled with the language. It was never about brains or ability. His students simply didn't have the knowledge of the specific language needed to succeed. Through experimentation and research, he discovered that for any subject there was a list of essential words, that, when mastered, unlocked a student's ability to progress in the subject. Lewis called this set of vocabulary the "Insider's Words". When he applied these "Insider's Words" the results were incredible. His students began to learn with ease. He was on his way to developing the landmark series of Books and applications to teach this "Insider's Language" to students around the world. Our books and applications are helpful to any student. They are especially helpful to struggling students, English language learners, and students beginning a course of study. The strongest students will also enjoy the puzzle and game aspect of the books. In all cases, the books provide an enjoyable break from the tedious and mundane experience of traditional test preparation. Get your copy of the 5th grade words you absolutely must know today!*
