In PSYCHOLOGY: THEMES AND VARIATIONS, BRIEFER VERSION, Wayne Weiten continues his proven combination of a scientifically rigorous text with selective pedagogy that makes learning easy for students. Weiten's approach is backed by a straightforward writing style, unparalleled in-text visuals and didactic art program, and in-book review to help users prioritize and retain the core concepts.

Weiten surveys psychology's broad range of content with three aims: to illuminate the process of research and its intrinsic relationship to application (themes); to show both the unity and diversity of the subject (variations), and to invite users to the study of psychology by respecting their ability to master its fundamental concepts. Weiten's themes (including empiricism, theoretical diversity, sociohistorical contexts, multifactorial causation, cultural heritage, heredity and environment, and subjectivity of experience) and variations provide unifying threads across chapters that help users see the connections among different research areas in psychology.

A concise and affordable resource for the mass communication course, Media Essentials provides a flexible, informative, and relevant breakdown of what the media is, how it works, and how it impacts today's most talked-about subjects. From #metoo to content streaming to social media and politics, students learn how a wide variety of recent developments have impacted the mass-media landscape--and how past innovation and change have informed our current media world. Media Essentials is available with LaunchPad, a robust online platform designed to help students fully engage with course content--and with the world of mass media. From our acclaimed LearningCurve adaptive quizzing, which helps students learn and retain concepts, to compelling features like an interactive e-book and a variety of entertaining and thought-provoking video clips, LaunchPad gets students connected with--and interested in--the information they need to succeed in class.

Since 1989, there have been over 200 post-conviction DNA exonerations in the United States. On the surface, the release of innocent people from prison could be seen as a victory for the criminal justice system: the wrong person went to jail, but the mistake was fixed and the accused set free. A closer look at miscarriages of justice, however, reveals that such errors are not aberrations but deeply revealing, common features of our legal system. The ten original essays in When Law Fails view wrongful convictions not as random mistakes but as organic outcomes of a misshaped larger system that is rife with faulty eyewitness identifications, false confessions, biased juries, and racial discrimination. Distinguished legal thinkers Charles J. Ogletree, Jr., and Austin Sarat have assembled a stellar group of contributors who try to make sense of justice gone wrong and to answer urgent questions. Are miscarriages of justice systemic or symptomatic, or are they mostly idiosyncratic? What are the broader implications of justice gone awry for the ways we think about law? Are there ways of reconceptualizing legal missteps that are particularly useful or illuminating? These instructive essays both address the questions and point the way toward further discussion. When Law Fails reveals the dramatic consequences as well as the daily realities of breakdowns in the law's ability to deliver justice swiftly and fairly, and calls on us to look beyond headline-grabbing exonerations to see how failure is embedded in the legal system itself. Once we are able to recognize miscarriages of justice we will be able to begin to fix our broken legal system. Contributors: Douglas A. Berman, Markus D. Dubber, Mary L. Dudziak, Patricia Ewick, Daniel Givelber, Linda Ross Meyer, Charles J. Ogletree, Jr., Austin Sarat, Jonathan Simon, and Robert Weisberg.

English File Third Edition Beginner is suitable for CEFR level A1. English File Third Edition provides a comprehensive package of completely new lessons, and up-to-date texts. A proven balance of grammar, vocabulary and pronunciation and skills gives students the language they need, and fresh, lively lessons and engaging topics make classes enjoyable and provide the motivation and opportunity to practice and improve. Maximise your teaching time with over 70 photocopiable activities including: Communicative activity for every lesson Grammar activity for every Grammar Bank Vocabulary activity for every Vocabulary Bank Song activity for every File The Teacher's Book Test and Assessment CD-ROM enables teachers to track progress and improve classroom management with: Quick tests File tests Progress tests End of course tests A & B versions to help classroom management Word and PDF formats for easy customisation

DISCIPLE IV UNDER THE TREE OF LIFE is the final study in the four-phase DISCIPLE program and is prepared for those who have completed BECOMING DISCIPLES

THROUGH BIBLE STUDY. The study concentrates on the Writings (Old Testament books not in the Torah or the Prophets), the Gospel of John, and Revelation. Emphasis on the Psalms as Israel's hymnbook and prayer book leads natural to an emphasis on worship in the study. Present through the entire study is the sense of living toward completion - toward the climax of the message and the promise, extravagantly pictured in Revelation. The image of the tree and the color gold emphasize the prod and promise in the Scriptures for **DISCIPLE IV: UNDER THE TREE OF LIFE.** The word under in the title is meant to convey invitation, welcome, sheltering, security, and rest - home at last. Commitment and Time Involved 32 week study Three and one-half to four hours of independent study each week (40 minutes daily for leaders and 30 minutes daily for group members) in preparation for weekly group meetings. Attendance at weekly 2.5 hour meetings. DVD Set Four of the five videos in this set contain video segments of approximately ten minutes each that serve as the starting point for discussion in weekly study sessions. The fifth video is the unique component that guides an interactive worship experience of the book of Revelation. Under the Tree of Life Scriptures lend themselves to videos with spoken word, art, dance, music, and drama. Set decorations differs from segment to segment depending on the related Scripture and its time period. Set decoration for video segments related to the Writings generally has a Persian theme. Set decoration for the New Testament video segments emphasizes the simpler life of New Testament times.

Succinct in its treatment of the fundamentals, and interwoven with contextual explanation and analytical consideration of the key debates, Honeyball and Bowers' Textbook on Employment Law continues to provide readers with an accessible account of the subject. Including chapter introductions and new end-of-chapter summaries, students of employment law are guided through the intricacies, while further reading suggestions assist with independent research and essay preparation. The critical elements of individual and collective employment law are considered along with treatment of the relationship between UK and EU law, to give readers a wider view of the issues.

Spectrum(R) Grade Specific for Grade 2 includes focused practice for reading, language arts, and math mastery. Skills include parts of speech and sentences, grammar and usage, capitalization and punctuation, adding and subtracting two- and three-digit numbers, writing numbers in expanded form, components of 3-D shapes, fractions, and metric and customary measurement. Spectrum Grade Specific workbooks contain focused practice for language arts mastery. Each book also includes a writer's guide. Step-by-step instructions help children with planning, drafting, revising, proofreading, and sharing writing. The math activities build the skills that children need for math achievement and success. Children in grades 1 to 6 will find lessons and exercises that help them progress through increasingly difficult subject matter. Aligned to current state standards, Spectrum is your child's path to language

arts and math mastery.

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of two young siblings--Mia and Marky, who were born in Haiti. Section 2 features the lives of five abolitionists, a mix of heroes from past to present, who call us to action and teach us life lessons based on their own experiences: Harriet Tubman--The "Conductor"; Abraham Lincoln--the "Great Emancipator"; Little Mia--the sister who saved her little brother; Guesno Mardy--the Haitian father who lost his son to slave traders; and Harriet Jacobs--a teacher for us all.

Master Dentistry is designed as a revision guide for dental students and presents the key elements of the curriculum in an easy-to-digest format. Based on sound educational principles, each volume in the series is fully illustrated throughout and is supported by extensive self-assessment questions which allow the reader to assess their own knowledge of the topic and perfect their exam techniques. This third edition has been fully updated throughout and addresses the restorative, paediatric and orthodontic aspects of dentistry. The Master Dentistry volumes are perfect for undergraduate students as well as post-graduates preparing for the MJDF in the UK or international equivalent, and the ORE. Information presented in a style which facilitates easy recall for examination purposes and a ready understanding of the subject Key facts are highlighted and principles of diagnosis and management emphasised Gives the reader a 'feel for the subject' and details essential communication skills Offers practical guidance on how to prepare for exams and make best use of the time available Perfect for BDS exam preparation and candidates taking the MJDF, ORE or other post-graduate exams Law & Ethics Chapter has been awarded second postgraduate prize in the Dental Protection/Schülke 2012 Premier Awards Reflects changes with regards to registration examinations, the development of specialist

lists and the Overseas Registration Examination Fully revised self-assessment material provided in the form of MCQs, EMQs, case histories, short notes, data interpretation, viva questions and picture questions – all of which integrate knowledge from across different chapters and focus the reader on decisions they will take in a given clinical situation

For courses in Operations Management. Shortlisted for the Millia Davenport Publication Award *Experimental Fashion* traces the proliferation of the grotesque and carnivalesque within contemporary fashion and the close relation between fashion and performance art, from Lady Gaga's raw meat dress to Leigh Bowery's performance style. The book examines the designers and performance artists at the turn of the twenty-first century whose work challenges established codes of what represents the fashionable body. These innovative people, the book argues, make their challenges through dynamic strategies of parody, humour and inversion. It explores the experimental work of modern designers such as Georgina Godley,

Bernhard Willhelm, Rei Kawakubo and fashion designer, performance artist, and club figure Leigh Bowery. It also discusses the increased centrality of experimental fashion through the pop phenomenon, Lady Gaga.

These proceedings reflect the important role of catalysis in petroleum refining and the effects of factors such as environmental legislation on the industry. They also show the emergence of significant scientific expertise in the Middle East - the cradle of the oil industry. Participants from all over the world took part in the meeting and the book contains a well-balanced selection of articles from both academia and industry. Current trends in the oil industry focused attention mainly on heavy end hydrotreating, but other processes also gained their share of attention. An invaluable feature of the meeting was the two panel discussions where participants took the opportunity to obtain advance on many real and immediate problems.

From a distinguished author comes this new edition for technologists, practitioners, residents, and students in radiology and nuclear medicine. Encompassing major topics in nuclear medicine from the basic physics of radioactive decay to instrumentation and radiobiology, it is an ideal review for Board and Registry examinations. The material is well organized and written with clarity. The book is supplemented with tables and illustrations throughout. It provides a quick reference book that is concise but comprehensive, and offers a complete discussion of topics for the nuclear medicine and radiology physician in training.

From Harry Potter's famous cloak, to the secrets of the "Invisible Man," popular culture has long been obsessed with the idea of becoming invisible. Yet, the art of invisibility is one of the most closely guarded of all occult secrets. For centuries magicians and adepts have hinted at ways of achieving this seemingly impossible feat, but now these ideas have been brought together for the first time to form a complete manual on how invisibility can be accomplished. Drawing on alchemy, Rosicrucianism, medieval magic, hypnotism, Einsteinian physics and yogic techniques, Steve Richards presents an authoritative and entertaining investigation into this extraordinary subject. This book focuses on the most elusive and seductive of all magical powers, teaching readers the power of invisibility from an occult perspective.

In Tropical Renditions Christine Bacareza Balance examines how the performance and reception of post-World War II Filipino and Filipino American popular music provide crucial tools for composing Filipino identities, publics, and politics. To understand this dynamic, Balance advocates for a "disobedient listening" that reveals how Filipino musicians challenge dominant racialized U.S. imperialist tropes of Filipinos as primitive, childlike, derivative, and mimetic. Balance

disobediently listens to how the Bay Area turntablist DJ group the Invisibl Skratch Piklz bear the burden of racialized performers in the United States and defy conventions on musical ownership; to karaoke as affective labor, aesthetic expression, and pedagogical instrument; to how writer and performer Jessica Hagedorn's collaborative and improvisational authorial voice signals the importance of migration and place; and how Pinoy indie rock scenes challenge the relationship between race and musical genre by tracing the alternative routes that popular music takes. In each instance Filipino musicians, writers, visual artists, and filmmakers work within and against the legacies of the U.S./Philippine imperial encounter, and in so doing, move beyond preoccupations with authenticity and offer new ways to reimagine tropical places.

[This] text addresses the basic concepts of management, the roles of the manager, and the changing nature of both the contemporary organization and the contemporary manager. [The text] explores the managerial function of planning. [It] focuses on the organizing function of management. [It] explores the managerial function of leadership. [It also] examines the management function of control. The foundational principles of control are addressed, and specific attention is given to productivity, quality control, and information systems control. Control is principal tool for achieving quality in the products, services, and processes of the organization, as well as a tool for developing a competitive advantage based on enhanced productivity, increased efficiency, and superior quality.-Pref.

Designed for survey courses in the field A History of Medicine presents a wide-ranging overview for those seeking a solid grounding in the medical history of Western and non-Western cultures. Invaluable to instructors promoting the history of medicine in pre-professional training, and stressing major themes in the history of medicine, this third edition continues to stimulate further exploration of the events, methodologies, and theories that have shaped medical practices in decades past and continue to do so today.

This textbook details basic principles of planetary science that help to unify the study of the solar system. It is organized in a hierarchical manner so that every chapter builds upon preceding ones. Starting with historical perspectives on space exploration and the development of the scientific method, the

book leads the reader through the solar system. Coverage explains that the origin and subsequent evolution of planets and their satellites can be explained by applications of certain basic principles of physics, chemistry, and celestial mechanics and that surface features of the solid bodies can be interpreted by principles of geology.

Brief, visual, and relevant, THE POWER OF ART, 2e delivers an engaging, jargon-free survey for the art appreciation course. Richard and Susan Lewis open students' eyes to the power of art with their captivating writing, so lively and succinct that students are able to complete their reading quickly, concentrate on the accompanying illustrations, and come to class prepared. The book's reproductions -- larger than in other art appreciation texts -- make it easier for students to focus on key details important to understanding the artwork. The text does an exceptional job of focusing on the Western tradition while incorporating non-Western material in key points to demonstrate cultural intersections and mutual influences. Clear discussions of artistic forms and art in Western culture are complemented by boxed features like the new Art Issues, Art News, and Global View that highlight the relevance of art today, controversial topics, and the impact of non-Western cultures on the West. In addition to its excellent art history coverage, THE POWER OF ART features a diverse mix of artists and spotlights the latest technologies used to create art. This solid text also is bolstered by innovative supplements like PowerLecture, a Digital Image Library, ArtExperience Online, WebTutor Toolbox, and more. The Advantage pricing of this text delivers an unrivaled value for instructors and students alike.
