Mariano Siskind’s groundbreaking debut book redefines the scope of world literature, particularly regarding the place of Latin America in its imaginaries and mappings. In Siskind’s formulation, world literature is a modernizing discursive strategy, a way in which cultures negotiate their aspirations to participate in global networks of cultural exchange, and an original tool to reorganize literary history. Working with novels, poems, essays, travel narratives, and historical documents, Siskind reads the way Latin American literary modernity was produced as a global relation, from the rise of planetary novels in the 1870s and the cosmopolitan imaginaries of modernism at the turn of the twentieth century, to the global spread of magical realism. With its unusual breadth of reference and firm but unobtrusive grounding in philosophy, literary theory, and psychoanalysis, *Cosmopolitan Desires* will have a major impact in the fields of Latin American studies and comparative literature. In West German literature in the 1970s and 1980s bodies functioned not as victims of history nor as allegories for the nation but as sites of contested identities. Focusing on conflicts about identity in present-day Germany and on literary texts in which the body is an aesthetic construct, Leslie A. Adelson reformulates questions of embodiment and historical agency—questions that continue to haunt culture studies in general and German studies and women’s studies in particular. This interdisciplinary study of history, race, gender, and nationality offers rich readings of three contemporary prose texts that challenge the suppositions of prevalent literary theory—Anne Duden’s *Übergang*, *TORKAN*’s *Tufan*: *Brief an einen islamischen Bruder*, and Jeanette Lander’s *Ein Sommer in der Woche der Itke K*. Adelson’s discussion of heterogeneous identities in contemporary German culture boldly explores accountability and innovation in historical process. In *Touch*, Laura U. Marks develops a critical approach more tactile than visual, an intensely physical and sensuous engagement with works of media art that enriches our understanding and experience of these works and of art itself. These critical, theoretical, and personal essays serve as a guide to developments in nonmainstream media art during the past ten years -- sexual representation debates, documentary ethics, the shift from analog to digital media, a new social obsession with smell. Marks takes up well-known artists like experimental filmmaker Ken Jacobs and mysterious animators the Brothers Quay, and introduces groundbreaking, lesser-known film, video, and digital artists. From this emerges a materialist theory -- an embodied, erotic relationship to art and to the world. Marks’s approach leads to an appreciation of the works’ mortal bodies: film’s volatile emulsion, video’s fragile magnetic base, crash-prone Net art; it also offers a productive alternative to the popular understanding of digital media as “virtual” and immaterial. *Weaving a continuous fabric from philosophy, fiction, science, dreams, and intimate experience*, *Touch* opens a new world of art media to readers. *History of the Air and Other Smells* is a text that puts in discussion the relationship with the Earth and the participation of human beings, the implications on the health of the people of the past and present in Mexico City; however, it is a large mirror for any megalopolis without a plan. Begin a discussion on the quality of air to understand the process of a geography that is subjected to devastation by the separation with nature.

The Routledge Handbook of Metaphor and Language provides a comprehensive overview of state-of-the-art interdisciplinary research on metaphor and language. Featuring 35 chapters written by leading scholars from around the world, the volume takes a broad view of the field of metaphor and language, and brings together diverse and distinct theoretical and applied perspectives to cover six key areas: Theoretical approaches to metaphor and language, covering Conceptual Metaphor Theory, Relevance Theory, Blending Theory and Dynamical Systems Theory; Methodological approaches to metaphor and language, discussing ways of identifying metaphors in verbal texts, images and gestures, as well as the use of corpus linguistics; Formal variation in patterns of metaphor use across text types, historical periods and languages; Functional variation of metaphor, in contexts including educational, commercial, scientific and political discourse, as well as online trolling; The applications of metaphor for problem solving, in business, education, healthcare and conflict situations; Language, metaphor, and cognitive development, examining the processing and comprehension of metaphors. The Routledge Handbook of Language and Metaphor is a must-have survey of this key field, and is essential reading for those interested in language and metaphor.

Words matter. And good writing matters. Especially in the information society, in which more writing than ever is disseminated and read. There may be a lot of dross out there, but we can also find writing that stands out from the rest. It lodges in our heads because of its simplicity and style, and because it says something worth reading. This is 'word byte' writing, a term that Carolyne Lee coins, defines and explains in this book, and which she and her contributors encourage their readers to achieve. A wide range of genres of public and professional writing—including magazine profiles, newspaper articles and blog posts—is covered in *Word Bytes*. The contributions from other professional writers, magazine and newspaper journalists through to a blogger and web-editor, will inspire and teach all those who want to learn to recognise and produce word bytes—writing that gets noticed and read in a world of information overload.

A companion to contemporary German crime fiction for English-speaking audiences is overdue. Starting with the earlier Swiss “classics” Glauser and Dürrenmatt and including a number of important Austrian authors, such as Wolf Haas and Heinrich Steinfest, this volume will cover the essential writers, genres, and themes of crime fiction written in German. Where necessary and appropriate, crime fiction in media other than writing (TV-series, movies) will be included. Contemporary social and political developments, such as gender issues, life in a multicultural society, and the afterlife of German fascism today, play a crucial role in much of recent German crime fiction. A number of contributions to this volume will comment on the literary reflection of these issues in the texts. The goal of the volume is to make available to English-speaking audiences, to students, teachers and to a wider circle of interested readers, a series of articles on genres, topics, authors, and texts that will help them understand the scope and depth of German crime fiction, its ties to international traditions and also the specificity of the German context, its historical development and contemporary situation.

"Books, let's face it, are better than anything else." Nick Hornby Turn the pages of The Literature Book to discover over 100 of the world's most enthralling reads and the literary geniuses behind them. Storytelling is as old as humanity itself. Part of the Big Ideas Simply Explained series, The Literature Book introduces you to ancient classics from the Epic of Gilgamesh written 4,000 years ago, as well as the works of Shakespeare, Voltaire, Tolstoy, and more, and 20th-century masterpieces, including *Catch-22*, *Beloved*, and *On the Road*. The perfect reference for your bookshelf, it answers myriad questions such as what is stream of consciousness, who wrote *To Kill a Mockingbird*, and what links the poetry of Wordsworth with that of TS Eliot. Losing yourself in a great book transports you to another time and place, and The Literature Book sets each title in its social and political context. It helps you appreciate, for example, how Dickens' *Bleak House* paints a picture of deprivation in 19th-century England, or how Stalin's climb to power was the backdrop for George Orwell's 1984. With succinct plot summaries, graphics, and inspiring quotations, this is a must-have reference for literature students and the perfect gift for book-lovers everywhere. Series Overview: Big Ideas Simply Explained series uses creative design and innovative graphics along with straightforward and engaging writing to make complex subjects easier to understand. What is experimental literature? How has experimentation affected the course of literary history, and how is it shaping literary expression today? Literary experiment has always been diverse and challenging, but never more so than in our age of digital media and social networking, when the very category of the literary is coming under intense pressure. How will literature reconfigure itself in the future? The Routledge Companion to Experimental Literature maps this expansive and multifaceted field, with essays on: the history of literary experiment from the beginning of the twentieth century to the present the impact of new media on literature, including multimodal literature, digital fiction and code poetry the development of experimental genres from graphic narratives and found poetry through to gaming and interactive fiction experimental movements from Futurism and Surrealism to Postmodernism, Avant-Pop and Flarf. Shedding new light on often critically neglected terrain, the contributors introduce this vibrant area, define its current state, and offer exciting new perspectives on its future. This volume is the ideal introduction for those approaching the study of experimental literature for the first time or looking to further their knowledge.

The Aesthetics of Human Environments is a companion volume to Carlson’s and Berleant’s *The Aesthetics of Natural Environments*. Whereas the earlier collection focused on the aesthetic appreciation of nature, *The Aesthetics of Human Environments* investigates philosophical and aesthetics issues that arise from our engagement with human environments ranging from rural landscapes to urban cityscapes. Our experience of public spaces such as shopping centers, theme parks, and gardens as well as the impact of our personal living spaces on the routine activities of our everyday life are discussed in terms of their aesthetic value and the nature of our aesthetic appreciation. This volume will appeal to any reader concerned about the aesthetic quality of the world in which we live.

There are a number of recent texts that draw on psychoanalytic theory as an interpretative approach for understanding architecture, or that use the formal and social logics of architecture for understanding the psyche. But there remains work to be done in bringing what largely amounts to a series of independent voices, into a discourse that is greater than the sum of its parts, in the way that, say, the architect Peter Eisenman was able to do with the architecture of deconstruction or that the historian Manfredo Tafuri was able to do with the Marxist critique of architecture. The discourse of the present volume focuses specifically for the first time on the subject of the unconscious in relation to the design, perception, and understanding of architecture. It brings together an international group of contributors, who provide informed and varied points of view on the role of the unconscious in architectural design and theory and, in doing so, expand architectural theory to unexplored areas, enriching architecture in relation to the humanities. The book explores how architecture engages dreams, desires, imagination, memory, and emotions, how architecture can appeal to a broader scope of human experience and identity. Beginning by examining the historical development of the engagement of the unconscious in architectural discourse, and the current and historical, theoretical and practical, intersections of architecture and psychoanalysis, the volume also analyses the city and the urban condition.

What Alexander McQueen Can Teach You About Fashion

An odorless baby found orphaned in a Paris gutter in 1738 grows to become a monster obsessed with his perfect sense of smell and a desire to capture, by any means, the ultimate scent that will make him human. Reader's Guide available. Reprint. 20,000 first printing.

Ordinary Enchantments investigates magical realism as the most important trend in contemporary international fiction, defines its characteristics and narrative techniques, and proposes a new theory to explain its significance. In the most comprehensive critical treatment of this literary mode to date, Wendy B. Faris discusses a rich array of examples from magical realist novels around the world, including the work not only of Latin American writers like Gabriel Garcia Marquez, but also of authors like Salman Rushdie, Gunter Grass, Toni Morrison, and Ben Okri. Faris argues that by combining realistic representation with fantastic elements so that the marvelous seems to grow organically out of the ordinary, magical realism destabilizes the dominant form of realism based on empirical definitions of reality, gives it visionary power, and thus constitutes what might be called a "remystification" of narrative in the West. Noting the radical narrative heterogeneity of magical realism, the author compares its cultural role to that of traditional shamanic performance, which joins the worlds of daily life and that of the spirits. Because of that capacity to bridge different worlds, magical realism has served as an effective decolonizing agent, providing the ground for marginal voices, submerged traditions, and emergent literatures to develop and create masterpieces. At the same time, this process is not limited to postcolonial situations but constitutes a global trend that replenishes realism from within. In addition to describing what many consider to be the progressive cultural work of magical realism, Faris also confronts the recent accusation that magical realism and its study as a global phenomenon can be seen as a form of commodification and an imposition of cultural homogeneity. And finally, drawing on the narrative innovations and cultural scenarios that magical realism enacts, she extends those principles toward issues of gender and the possibility of a female element within magical realism.

Meditations on disorder (defined as what comes into conflict or resists a prevailing order's sense of social advance and historical development) through a variety of voices, most associated with literary theory or, more broadly, with cultural critique. The meditations are shaped from both extraliterary (i.e. physics, biology, neuroscience, geometry, geography, psychoanalysis, politics, and history) and literary contexts. The so-called “Book Towns” of the world are dedicated havens of literature, and the ultimate dream of book lovers everywhere. Book Towns takes readers on a richly illustrated tour of the 40 semi-officially recognized literary towns around the world and outlines the history and development of each community, and offers practical travel advice. Many Book Towns have emerged in areas of marked attraction, such as Ureña in Spain or Fjaerland in Norway, where bookshops have been set up in buildings including former ferry waiting rooms and banks. While the UK has the best-known examples at Hay, Wigtown and Sedbergh, the book has a broad international appeal, featuring locations such as Jimbochu in Japan, College Street in Calcutta, and major unofficial “book cities” such as Buenos Aires.

An Ethics of Performance

Our sense of smell - or olfaction as it is technically known - is our most enigmatic sense. It can conjure up memories, taking us back to very specific places and emotions, whilst powerful smells can induce strong feelings of hunger or nausea. In the animal kingdom smell can be used to find food, a mate, or a home; to sense danger; and to send and receive complex messages with other members of a species. Yet despite its fundamental importance in our mental life and in the existence of all animals, our scientific understanding of how smell works is limited. In this Very Short Introduction, Matthew Cobb describes the latest scientific research on smell in humans and other mammals, in insects, and even in fish. He looks at how smell evolved, how animals use it to navigate and communicate, and disorders of smell in humans. Understanding smell, especially its neurobiology, has proved a big challenge, but olfactory science has revealed genetic factors that determine what we can and cannot smell, and why some people like a given smell while others find it unbearable. He ends by considering future treatments for smell disorders, and speculating on the role of smell in a world of robots. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

This collection of 23 essays represents the best papers from the Thirteenth International Conference on the Fantastic in the Arts; it shows provocative applications of scholarly observations to readers' lives.

The senses can be powerful triggers for memories of our past, eliciting a range of both positive and negative emotions. The smell or taste of a long forgotten sweet can stimulate a rich emotional response connected to our childhood, or a piece of music transport us back to our adolescence. Sense memories can be linked to all the senses - sound, vision, and even touch can also trigger intense and emotional memories of our past. In *The Proust Effect*, we learn about why sense memories are special, how they work in the brain, how they can enrich our daily life, and even how they can help those suffering from problems involving memory. A sense memory can be evoked by a smell, a taste, a flavour, a touch, a sound, a melody, a colour or a picture, or by some other involuntary sensory stimulus. Any of these can triggers a vivid, emotional reliving of a forgotten event in the past. Exploring the senses in thought-provoking scientific experiments and artistic projects, this fascinating book offers new insights into memory - drawn from neuroscience, the arts, and professions such as education, elderly care, health care therapy and the culinary profession.

Known around the world for her eponymous brand of fragrances and now her brand-new venture Jo Loves (soon to debut in the US), Jo Malone tells the remarkable and inspiring story of her rise from humble beginnings to beloved business success. Jo Malone began her international fragrance and scented candle business in 1983 from her kitchen, where she made bath oils as thank-you gifts for her facial clients. She opened her first store in London in 1994, and in 1999 she sold the Jo Malone London brand to Estee Lauder Companies. Recently, she launched a new brand, Jo Loves, igniting the excitement of fashion and beauty converts all over the world. Raised in government-subsidized housing in Kent in the early 1960s, Jo Malone left school as a teenager to care for her mother after she had a stroke. Jo had not been successful in school because of her dyslexia, but she had the ability to see and feel everything in scent. Her at-home beauty business and hand-made products became popular, and word of her talent spread until an international brand was born. After the sale of her company and the birth of her son, she was diagnosed with breast cancer and underwent treatment in New York. Thus began the second chapter of her life, and in this memoir, Jo tells her full amazing and inspiring personal story.

These essays set out to consider the possible future of theology in the light of the so-called postmodern condition. They are necessarily deeply interdisciplinary, since it is a characteristic of post-Enlightenment thought to disintegrate the lines of definition which separate areas of reflection in the human sciences. Theology, we believe, must be exposed to the consequences of what has happened in literature and critical theory if it is to have any future outside the protected and isolated environment of ecclesia and the communities of the faithful. The authors represent a great diversity of opinion and discipline. Not all of us would agree with one another, and certainly there is no agreement as to what constitutes postmodernity. Yet this very diversity forms the strength and importance of the book, for there are no simple answers or straightforward definitions. Theology must recognize the pluralism within which it now must carry out its task and which alone defines its future. The keynote of the discussion is the tragic. Tragedy takes us back to the Greeks, and to Nietzsche. Both feature centrally in this presentation. It also suggests a future, a return, perhaps, through literature to theology, and not merely an end of the story as it has been traditionally sold.

This comprehensive bibliography covers writings about vampires and related creatures from the 19th century to the present. More than 6,000 entries document the vampire's penetration of Western culture, from scholarly discourse, to popular culture, to politics and cook books. Sections by topic list works covering various aspects, including general sources, folklore and history, vampires in literature, music and art, metaphorical vampires and the contemporary vampire community. Vampires from film and television—from Bela Lugosi's Dracula to Buffy the Vampire Slayer, True Blood and the Twilight Saga—are well represented.

This book presents waste as an aesthetic category that introduces an arsy-versy world where detritus is precious. This aesthetic is applied in the second part to etymology, poking through the 'paternal dungheaps' of words, and tracing their origins not to Eden but to Babel, puns, and word play.
