As the culminating volume in the DCP3 series, volume 9 will provide an overview of DCP3 findings and methods, a summary of messages and substantive lessons to be taken from DCP3, and a further discussion of cross-cutting and synthesizing topics across the first eight volumes. The introductory chapters (1-3) in this volume take as their starting point the elements of the Essential Packages presented in the overview chapters of each volume. First, the chapter on intersectoral policy priorities for health includes fiscal and intersectoral policies and assembles a subset of the population policies and applies strict criteria for a low-income setting in order to propose a "highest-priority" essential package. Second, the chapter on packages of care and delivery platforms for universal health coverage (UHC) includes health sector interventions, primarily clinical and public health services, and uses the same approach to propose a highest priority package of interventions and policies that meet similar criteria, provides cost estimates, and describes a pathway to UHC.

NEW YORK TIMES BESTSELLER • "A brilliant storyteller, a master of sarcasm, and a hallucinatory stylist whose obsession with the impress of the past on the present binds him to Southern literary tradition."—The Boston Globe Pat Conroy's great success as a writer has always been intimately linked with the exploration of his family history. As the oldest of seven children who were dragged from military base to military base across the South, Pat bore witness to the often cruel and violent behavior of his father, Marine Corps fighter pilot Donald Patrick Conroy. While the publication of *The Great*

Santini brought Pat much acclaim, the rift it caused brought even more attention, fracturing an already battered family. But as Pat tenderly chronicles here, even the oldest of wounds can heal. In the final years of Don Conroy's life, the Santini unexpectedly refocused his ire to defend his son's honor. The Death of Santini is a heart-wrenching act of reckoning whose ultimate conclusion is that love can soften even the meanest of men, lending significance to the oft-quoted line from Pat's novel *The Prince of Tides*: "In families there are no crimes beyond forgiveness." Praise for *The Death of Santini* "A painful, lyrical, addictive read that [Pat Conroy's] fans won't want to miss."—People "Conroy's conviction pulls you fleetly through the book, as does the potency of his bond with his family, no matter their sins."—The New York Times Book Review "Vital, large-hearted and often raucously funny."—The Washington Post "Conroy writes athletically and beautifully, slicing through painful memories like a point guard splitting the defense."—Minneapolis Star Tribune

The 18th century was a wealth of knowledge, exploration and rapidly growing technology and expanding record-keeping made possible by advances in the printing press. In its determination to preserve the century of revolution, Gale initiated a revolution of its own: digitization of epic proportions to preserve these invaluable works in the largest archive of its kind. Now for the first time these high-quality digital copies of original 18th century manuscripts are available in print, making them highly accessible to libraries, undergraduate students, and independent scholars. This collection reveals the history of English common law and Empire law in a vastly changing world of British expansion. Dominating the legal field is the *Commentaries of the Law of England* by Sir William Blackstone, which first appeared in 1765. Reference works such as almanacs and catalogues continue to educate us by revealing the day-to-day workings of society. ++++ The below data was compiled from various identification fields in the bibliographic record of this title.
