This book explores the narratives of girlhood in contemporary YA vampire fiction, bringing into the spotlight the genre’s radical, ambivalent, and contradictory visions of young femininity. Agnieszka Stasiewicz-Bieńkowska considers less-explored popular vampire series for girls, particularly those by P.C. and Kristin Cast and Richelle Mead, tracing the ways in which they engage in larger cultural conversations on girlhood in the Western world. Mapping the interactions between girl and vampire corporealities, delving into the unconventional tales of vampire romance and girl sexual expressions, examining the narratives of women and violence, and venturing into the uncanny vampire classroom to unmask its critique of present-day schooling, the volume offers a new perspective on the vampire genre and an engaging insight into the complexities of growing up a girl.

In the much-anticipated follow-up to the bestselling In the Company of Women, Grace Bonney turns her attention to older women in a celebration of intergenerational bonds between women, and the role those bonds play in sharing vital knowledge, stories, power, and history through generations.

How do you get something out of nothing? It seems like an obvious question, one that drives everything from spiritual creation stories to our understanding of the Big Bang. Yet it leaves us with a sense that underneath everything lies emptiness and lack. We can phrase this question in a new way: how do we get something out of everything? In Leap to Wholeness, physics educator Sky Nelson-Isaacs explores the science of wholeness. To understand wholeness, imagine a beautiful photograph that you want to modify. The image exists in space. Yet graphic designers are familiar with another space, called the frequency domain, or “pattern-space.” Here, changes to the patterns affect the image as a whole. We can make the entire image blurrier or sharper, for instance, with a simple filter in pattern-space. A change to one local region affects the image everywhere. This is an example of wholeness that exists right before our eyes. We each have filters that influence what we see, hear, think, and feel. They take who we are as a whole, and they limit it to what we feel comfortable with--what we already know, rather than how we can grow. We carry models that interpret the world for us. But we can become more aware of our filters and from this awareness experience more flow, more openness, and less anxiety. When we align with circumstances rather than fighting them, we open the door to synchronicities that give us leverage in creating the change we want to see. Following this thread from modern audio technology, to the human brain, to the very nature of time itself, Leap to Wholeness explores a paradigm of wholeness that is easy to miss. For instance, when you look at the red part of a rainbow, you may not realize that you’re really seeing white light that’s had blue and green filtered out. Or where you see blue, that means red and green are missing. Maybe creating something out of everything is not about what we do...but about what we don’t do. By removing filters--thoughts, feelings, and other reactions--that keep us weaving the same old patterns, we naturally allow ourselves to grow, heal, and adapt.

"The child must be named." A name can contain enormous power. But for Persie Merlin-Crowley, the powerless daughter of famed magicals Harley Merlin and Wade Crowley, her name hasn't given her much in terms of abilities. That is, until her eighteenth birthday comes around and she Purges a gigantic Hydra that terrorizes the coven. How could that be possible, if she's never cast a spell in her life? Then her mother reveals the deal she made with Leviathan almost twenty years before--a deal that let the monster name her firstborn Persie. Or rather, Persephone, as is her true name. He has given her the "gift" of Purging all manner of beasts... so that she may become the Queen of the Underworld like her namesake. Persie is left reeling. She's spent her life doodling monsters in the margins of notebooks and dreaming of far-off adventures. Now, she'll have to stay under her mother's supervision so her rogue Purges don't wreak havoc. Unless she can find another way to control her powers... When she learns about The Basani Institute, a monster-hunting program in Ireland, she knows this is her one chance. Alongside her Atlantean best friend and Uncle Finch's annoying kid, she sneaks out to audition to become a monster hunter. But Leviathan's gift is one that never stops giving... ????Yesterday I was a teenager waiting tables in Manhattan, and today, monsters exist and I can see them. Overnight I'm thrown into the realm of the Watchers, a society of earthbound angels split into two factions: The Shades, whose powerful dark magic is given to them by the fallen angels, and the Lumens, whose abilities are bestowed on them by the archangels of Avalon. They're on opposite sides of a brutal war and I only have a few days to pick which side I want to join. I'm ready to choose when the Shades force my hand by cursing someone I love. The only hope I have of saving them rests on the broad shoulders of the prickliest Shade alive, Gage Alston. He's cold, arrogant, and quite possibly the most attractive guy I've ever laid eyes on. Do I trust him? No. Do I need him? Yes. Do I want to kiss him? Maybe. Perhaps I'll choose darkness after all.

Blindsight is the Hugo Award-nominated novel by Peter Watts, "a hard science fiction writer through and through and one of the very best alive" (The Globe and Mail). Two months have past since a myriad of alien objects clenched about the Earth, screaming as they burned. The heavens have been silent since—until a derelict space probe hears whispers from a distant comet. Something talks out there: but not to us. Who should we send to meet the alien, when the alien doesn't want to meet? Send a linguist with multiple-personality disorder and a biologist so spliced with machinery that he can't feel his own flesh. Send a pacifist warrior and a vampire recalled from the grave by the voodoo of paleogenetics. Send a man with half his mind gone since childhood. Send them to the edge of the solar system, praying you can trust such freaks and monsters with the fate of a world. You fear they may be more alien than the thing they've been sent to find—but you'd give anything for that to be true, if you know what was waiting for them. . . . Seventeen-year-old Gertrude Morgan, the only child of one of the wealthiest couples in America, is shipped away from her home in New York City to the American school in Athens against her will. Her parents just want to get rid of her, and she knows it. Although she has no friends (her private schoolmates all seem fake), she sees no point in making any new ones on her trip, since she'll only be visiting for one school year. Her host family calls them "tramps." In Greek, they are called vrykolakas, or "vryks," which sometimes gets translated to "freaks." They are the vampires of Athens, created centuries ago by the Maenads. They live in caves beneath the acropolis without economic resources and according to rules imposed on them by the Olympians. First and foremost, they are forbidden from turning humans into vampires. The human will not turn unless all of the blood is drained, so a vampire is allowed to drink up to one pint per month from a willing mortal. Such great power can become irresistible, though dangerous and addicting to mortals...As Gertie uncovers the unfathomable secrets of this ancient city, she is drawn to the beauty and deep thoughts of a boy she first met on the bus into Athens--Jeno.
