“A timely and much needed call to plant, protect, and delight in these diverse, life-giving giants.” —David George Haskell, author of *The Forest Unseen* and *The Songs of Trees With Bringing Nature Home*, Doug Tallamy changed the conversation about gardening in America. His second book, the New York Times bestseller *Nature's Best Hope*, urged homeowners to take conservation into their own hands. Now, he is turning his advocacy to one of the most important species of the plant kingdom—the mighty oak tree. Oaks sustain a complex and fascinating web of wildlife. *The Nature of Oaks* reveals what is going on in oak trees month by month, highlighting the seasonal cycles of life, death, and renewal. From woodpeckers who collect and store hundreds of acorns for sustenance to the beauty of jewel caterpillars, Tallamy illuminates and celebrates the wonders that occur right in our own backyards. He also shares practical advice about how to plant and care for an oak, along with information about the best oak species for your area. *The Nature of Oaks* will inspire you to treasure these trees and to act to nurture and protect them.

*Acorns to Great Oaks - Meditations for Children helps children to become and stay aware of the world around them, aware of their own fabulousness, aware of energy, aware of their thoughts and feelings influencing their lives and that of others, aware of their connection with this beautiful planet we live on, and aware of how they can change anything for the better, easily and quickly, in order to create trust, strength and happiness. We are creatures of habit. If we can pick up 'bad' habits (stress, anger), we can also be taught good habits (relaxation, trust, conscious breathing, forgiveness, peace...). We need to teach children how to manage their own behavior instead of having others manage it for them. Meditation and being aware is coming to a place within your heart and mind where you feel happy and trusting so you can feel very good again, in and after any situation, wherever you are and as quickly as possible. Making specific pictures in the mind helps with this. It teaches children power and control over how they feel, what's happening and where they want to be in life! Acorns to Great Oaks - Meditations for Children contains 22 short meditations to help children on their way, so they can then easily apply 'coping mechanisms' into real life. An Audio-CD with the meditations from this book is also available (978-1-84409-727-2). The new children's book, *Grow Your Oak*, was written to help parents and children learn about the power of saving and investing from delivery room to dorm room! This book is perfect for new or expecting parents, young readers, or toddlers. From tiny acorns, mighty oaks do grow.*

Central to the book are questions concerning the existence and the characteristics of justice motives, and the influence that justice motives and justice judgements have on the emergence, but also the solution of social conflicts. Five main themes will be addressed: (1) "Introduction and justice motive", (2) "organizational justice", (3) "ecological justice", (4) "social conflicts", and (5) "solution of conflicts". The authors of the editions are scholars of psychology, as well as distinguished experts from various other disciplines, including sociologists, economists, legal scholar, educationalists, and ethicists. The common ground of all contributors is their independent conduction of empirical research on justice issues. Apart from the German contributors, authors represent scholars from the US, India, Korea, New Zealand, and various European countries (Austria, Switzerland, the Netherlands, UK, Sweden).

As we enter the Twenty-First Century, it is easy to assume that worsening trends in violence will be a feature of our lives, whether in our schools, our societies or as a species. Educating Beyond Violent Futures challenges assumptions that trends in violence are destiny, and raises crucial questions about choice and engagement. Drawing upon new research, this book is essential reading for those who want to prepare our children for living constructively in the next century

Geoffrey Robertson led students in the '60s to demand an end to racism and censorship. He went on to become a top human rights advocate, saving the lives of many death-row inmates, freeing dissidents and taking on tyrants in a career marked by courage, determination and a fierce independence. In this witty, honest and sometimes irreverent memoir, he recalls battles on behalf of George Harrison and Julian Assange, Salman Rushdie and Václav Havel, Mike Tyson and the Sex Pistols, and battles against General Pinochet, Lee Kuan Yew and Mrs Thatcher (the true story of Spycatcher is told for the first time). Interspersed with these forensic fireworks is the story of a pimply schoolboy from a state comprehensive, inspired by a banned book to become a barrister at the Old Bailey and who went on to found the UK's leading human rights practice (Doughty Street Chambers) and to defend troublemakers throughout the world. Rather His Own Man captures the drama of the trial, the thrill of victory and the feeling of 'courtus interruptus' when a big case settles. Its cast of characters includes Princess Diana, Pee-Wee Herman, Dame Edna, the Queen and Rupert – the bear and the media mogul. It's a read that is both exhilarating and erudite – and very

funny.
