The other animals are sure that life is improving, but as systems are replaced and half-truths are retold, a new hierarchy emerges . . . Orwell's tale of propaganda, power and greed has never felt more pertinent. With an exciting new cover and inside illustrations by superstar Chris Mould.

From the duo behind the massively successful and award-winning podcast Stuff You Should Know comes an unexpected look at things you thought you knew. Josh Clark and Chuck Bryant started the podcast Stuff You Should Know back in 2008 because they were curious—curious about the world around them, curious about what they might have missed in their formal educations, and curious to dig deeper on stuff they thought they understood. As it turns out, they aren't the only curious ones. They've since amassed a rabid fan base, making Stuff You Should Know one of the most popular podcasts in the world. Armed with their inquisitive natures and a passion for sharing, they uncover the weird, fascinating, delightful, or unexpected elements of a wide variety of topics. The pair have now taken their near-boundless "whys" and "hows" from your earbuds to the pages of a book for the first time—featuring a completely new array of subjects that they've long wondered about and wanted to explore. Each chapter is further embellished with snappy visual material to allow for rabbit-hole tangents and digressions—including charts, illustrations, sidebars, and footnotes. Follow along as the two dig into the underlying stories of everything from the origin of Murphy beds, to the history of facial hair, to the psychology of being lost. Have you ever wondered about the world around you, and wished to see the magic in everyday things? Come get curious with Stuff You Should Know. With Josh and Chuck as your guide, there's something interesting about everything (...except maybe jackhammers).

"A rhymed introduction to real and imaginary animals featuring illustrations from classic books by Dr. Seuss"-- The great master of farce turns to an exclusive island retreat for a comedy of mislaid identities, unruly passions, and demented, delicious disorder On the private Greek island of Skios, the high-paying guests of a world-renowned foundation prepare for the annual keynote address, to be given this year by Dr. Norman Wilfred, an eminent authority on the scientific organization of science. He turns out to be surprisingly youthful, handsome, and charming—quite unlike his reputation as dry and intimidating. Everyone is soon eating out of his hands. So, even sooner, is Nikki, the foundation's attractive and efficient organizer. Meanwhile, in a remote villa at the other end of the island, Nikki's old friend Georgie has rashly agreed to spend a furtive horizontal weekend with a notorious schemer, who has characteristically failed to turn up. Trapped there with her instead is a pompous, balding individual called Dr. Norman Wilfred, who has lost his whereabouts, his luggage, his temper, and increasingly all sense of reality—indeed, everything he possesses other than the text of a well-traveled lecture on the scientific organization of science. In a spiraling farce about upright academics, gilded captains of industry, ambitious climbers, and dotty philanthropists, Michael Frayn, the farceur "by whom all others must be measured" (CurtainUp), tells a story of personal and professional disintegration, probing his eternal theme of how we know what we know even as he delivers us to the outer limits of hilarity.
