FM 3-05.70 is the United States Army manual used to train survival techniques (formerly the FM 21-76). It is popular among survivalists and campers. The manual covers a variety of helpful topics such as planning, psychology of survival, emergency medicine, shelter construction, water procurement, firecraft, food procurement (hunting), identification of poisonous plants, and construction of field expedient weapons, tools and equipment.

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to the public." -an excerpt

Businesses today want actionable insights into their data—they want their data to reveal

itself to them in a natural and user-friendly form. What could be more natural than human language? Natural-language search is at the center of a storm of ever-increasing web-driven demand for human-computer communication and information access. SQL Server 2008 provides the tools to take advantage of the features of its built-in enterprise-level natural-language search engine in the form of integrated full-text search (iFTS). iFTS uses text-aware relational queries to provide your users with fast access to content. Whether you want to set up an enterprise-wide Internet or intranet search engine or create less ambitious natural-language search applications, this book will teach you how to get the most out of SQL Server 2008 iFTS: Introducing powerful iFTS features in SQL Server, such as the FREETEXT and CONTAINS predicates, custom thesauruses, and stop lists Showing you how to optimize full-text query performance through features like full-text indexes and iFilters Providing examples that help you understand and apply the power of iFTS in your daily projects

Are You Ready to Run? Is there a bridge from the injury-ridden world of the modern runner to the promised land that barefoot running and Born to Run have led us to believe exists? Can we really live the running life free from injury? Is there an approach designed to unlock all the athletic potential that may be hidden within? Can we run faster, longer, and more efficiently? In a direct answer to the modern runner's needs, Dr. Kelly Starrett, author of the bestseller Becoming a Supple Leopard: The Ultimate Guide to Resolving Pain, Preventing Injury, and Optimizing Athletic Performance, has focused his revolutionary movement and mobility philosophy on the injury-plagued world of running. Despite the promises of the growing

minimalist-shoe industry and a rush of new ideas on how to transform running technique, more than three out of four runners suffer at least one injury per year. Although we may indeed be "Born to Run," life in the modern world has trashed and undercut dedicated runners wishing to transform their running. The harsh effects of too much sitting and too much time wearing the wrong shoes has left us shackled to lower back problems, chronic knee injuries, and debilitating foot pain. In this book, you will learn the 12 standards that will prepare your body for a lifetime of top-performance running. You won't just be prepared to run in a minimalist shoe-you'll be Ready to Run, period. In Ready to Run, you will learn: The 12 performance standards you must work toward and develop on an ongoing basis How to tap into all of your running potential and access a fountain of youth for lifelong running How to turn your weaknesses into strengths How to prevent chronic overuse injuries by building powerful injury-prevention habits into your day How to prepare your body for the demands of changing your running shoes and running technique How to treat pain and swelling with cutting-edge modalities and accelerate your recovery How to equip your home mobility gym A set of mobility exercises for restoring optimal function and range of motion to your joints and tissues How to run faster, run farther, and run better

This is the long-awaited tenth-anniversary edition of Dr. Chamberlain's 1988 classic, *Babies Remember Birth*. In paperback format and enriched with a new last chapter, this book has the potential to revolutionize the way we look at babies, both before and after birth. Part I is filled with "user-friendly" information about the mind and abilities of newborns, as well as a thorough look at their development before birth. Parts II and III present evidence that babies do remember birth and are very much aware of the people around them at that time. Dr. Chamberlain writes compellingly about the newborn's sensitivity, awareness, and vulnerability. He emphasizes the importance and power of the infant-and-parent connection during pregnancy and after birth. When the information in this book becomes common knowledge, we will look at our children with new respect and understanding.

Physicist Philip Quine is plunged into a realm where greed and personal gain reign supreme over science when he unexpectedly becomes involved with Superbright, a project conceived to protect the world from nuclear weapons.

This essential introduction to American studies examines the core foundational myths upon which the nation is based and which still determine discussions of US-American identities today. These myths include the myth of » discovery, « the Pocahontas myth, the myth of the Promised Land, the myth of the Founding Fathers, the melting pot myth, the myth of the West, and the myth of the self-made man. The chapters provide extended analyses of each of these myths, using examples from popular culture, literature, memorial culture, school books, and every-day life. Including visual material as well as study questions, this book will be of interest to any student of American studies and will foster an understanding of the United States of America as an imagined community by analyzing the foundational role of myths in the process of nation building.

Critically acclaimed author David Joy, whose debut, *Where All Light Tends to Go*, was hailed as "a savagely moving novel that will likely become an important addition to the great body of Southern literature" (The Huffington Post), returns to the mountains of North Carolina with a powerful story about the inescapable weight of the past. A combat veteran returned from war, Thad Broom can't leave the hardened world of Afghanistan behind, nor can he forgive himself for what he saw there. His mother, April, is haunted by her own demons, a secret trauma she has carried for years. Between them is Aiden McCall, loyal to both but unable to hold them together. Connected by bonds of circumstance and duty, friendship and love, these three lives are blown apart when Aiden and Thad witness the accidental death of their drug dealer and a riot of dope and cash drops in their laps. On a meth-fueled journey to nowhere, they will either find the grit to overcome the darkness or be consumed by it.

Postharvest Handling: A Systems Approach introduces a new concept in the handling of fresh fruits and vegetable.

Traditional treatments have been either physiologically based with an emphasis on biological tissue or technologically based with an emphasis on storage and handling. This book integrates all processes from production practices through consumer consumption with an emphasis on understanding market forces and providing fresh product that meets consumer expectations.

Postharvest physiologists and technologists across the disciplines of agricultural economics, agricultural engineering, food science and horticulture along with handlers of minimally-processed products within the fresh produce fruit and vegetable processing industries will find this to be an invaluable source of information. Uses a systems approach that provides a unique perspective on the handling of fresh fruits and vegetables
Designed with the applied perspective to complement the more basic perspectives provided in other treatments
Provides the integrated, interdisciplinary perspective needed in research to improve the quality of fresh and minimally processed products
Emphasizes that the design of handling systems should be market-driven rather than concentrating on narrow specifics

Over the course of the half century from 1865 to 1915, the British and Dutch delineated colonial spheres, in the process creating new frontiers. This book analyzes the development of these frontiers in Insular Southeast Asia as well as the accompanying smuggling activities of the opium traders, currency runners, and human traffickers who pierced such newly drawn borders with growing success. The book presents a history of the evolution of this 3000-km frontier, and then inquires into the smuggling of contraband: who smuggled and why, what routes were favored, and how effectively the British and Dutch were able to enforce their economic, moral, and political will. Examining the history of states and smugglers playing off one another within a hidden but powerful economy of forbidden cargoes, the book also offers new insights into the modern political economies of Southeast Asia.

This new kind of dictionary reflects the use of "rhythm rhymes" by rappers, poets, and songwriters of today. Users can look up words to find collections of words that have the same rhythm as the original and are useable in ways that are familiar to us in everything from vers libre poetry to the lyrics and music of Bob Dylan and hip hop groups.

A Finalist for the Edgar Award for Best First Novel "Remarkable . . . This isn't your ordinary coming-of-age novel, but with his bone-cutting insights into these men and the region that bred them, Joy makes it an extraordinarily intimate experience."--Marilyn Stasio, The New York Times Book Review "Lyrical, propulsive, dark and compelling. Joy knows well the grit and gravel of his world, the soul and blemishes of the place."--Daniel Woodrell In the country-noir tradition of Winter's Bone meets 'Breaking Bad,' a savage and beautiful story of a young man seeking redemption. The area surrounding Cashiers, North Carolina, is home to people of all kinds, but the world that Jacob McNeely lives in is crueller than most. His father runs a methodically organized meth ring, with local authorities on the dime to turn a blind eye to his dealings. Having dropped out of high school and cut himself off from his peers, Jacob has been working for this father for years, all on the promise that his payday will come eventually. The only joy he finds comes from reuniting with Maggie, his first love, and a girl clearly bound for bigger and better things than their hardscrabble town. Jacob has always been resigned to play the cards that were dealt him, but when a fatal mistake changes

Will the future be like a Reality TV show where we compete to have human rights? Will you be popular and relatable enough to successfully crowdfund your healthcare? Tune in 20 years hence and find out. Many will mark 2015 to 2017 as the transitional moment the nihilistic id came into plain view in American culture and politics. But it is hardly the product of any single movement or idea, and it is hardly unprecedented. Narrative Machines uses a cut-up, pastiche approach to analyze how sub-cultural and fringe ideas permeate the mainstream, especially through the Internet—from Aleksandr Dugin's faux-postmodern Traditionalism to the cult of personality Reality TV show that has taken over every media outlet, from the gnostic horror of Nick Land's Dark Enlightenment to the Calvinism of identity politics, from the millenarian fervor of Transhumanism to the utopian nightmare of Fascism. A retrofuturist aesthetic unites them all, an "occulted theology", allegedly secular recreations of the religious impulse, accidental rewrites of the metaphysics of the past. Compiling ten years of writing and research with a series of palimpsest artworks, this assemblage was created for the outsider artists and insider theorists, and everyone else that lives at the fringes. For those opposed to a world formed by a single, monolithic myth, and yet still seek a collective dream in the fractured panopticon of the present. As Antonin Artaud said in *The Theater and Its Double*, "All writing is filth." Help us give birth to an abomination. Philosophical Project This book will help decode the political repercussions of art and media, using the work of theorists such as Delanda, Bataille, Baudrillard, Gray, Zizek, and Benjamin as a springboard. Art Project A series of illustrations accompany the text, using a mix of collage, bricolage and palimpsest repainting, a style inspired by Adbusters, artists of artifice like Bowie and Warhol, satirists of fascist and pop culture like Laibach and NSK. This cut up, derivative method is explored theoretically within the text. We recognize that in a world where nothing is original, everything is source material for appropriation to new purposes. This aesthetic clearly involve a certain wink in the general direction of 90s Utopian-Dystopian Industrial and alt culture, updated as a dark LSD vision of 2015-17 Internet, a series of love (and hate) notes pieced together of other sources and painstakingly re-created and subsumed. These pieces will appear in a variety of art

shows, and a forthcoming full-color collectors edition.

A stunning and provocative new novel by the internationally celebrated author of *The Blind Assassin*, winner of the Booker Prize. Margaret Atwood's new novel is so utterly compelling, so prescient, so relevant, so terrifyingly-all-too-likely-to-be-true, that readers may find their view of the world forever changed after reading it. This is Margaret Atwood at the absolute peak of her powers. For readers of *Oryx and Crake*, nothing will ever look the same again. The narrator of Atwood's riveting novel calls himself Snowman. When the story opens, he is sleeping in a tree, wearing an old bedsheet, mourning the loss of his beloved Oryx and his best friend Crake, and slowly starving to death. He searches for supplies in a wasteland where insects proliferate and pigeons and wolvoogs ravage the pleeblands, where ordinary people once lived, and the Compounds that sheltered the extraordinary. As he tries to piece together what has taken place, the narrative shifts to decades earlier. How did everything fall apart so quickly? Why is he left with nothing but his haunting memories? Alone except for the green-eyed Children of Crake, who think of him as a kind of monster, he explores the answers to these questions in the double journey he takes - into his own past, and back to Crake's high-tech bubble-dome, where the Paradise Project unfolded and the world came to grief. With breathtaking command of her shocking material, and with her customary sharp wit and dark humour, Atwood projects us into an outlandish yet wholly believable realm populated by characters who will continue to inhabit our dreams long after the last chapter.

Wherever we turn, we see diverse things scaled for us, from cities to economies, from history to love. We know scale by many names and through many familiar antinomies: local and global, micro and macroevents to name a few. Even the most critical among us often proceed with our analysis as if such scales were the ready-made platforms of social life, rather than asking how, why, and to what effect are scalar distinctions forged in the first place. How do scalar distinctions help actors and analysts alike make sense of and navigate their social worlds? What do these distinctions reveal and what do they conceal? How are scales construed and what effects do they have on the way those who abide by them think and act? This pathbreaking volume attends to the practical labor of scale-making and the communicative practices this labor requires. From an ethnographic perspective, the authors demonstrate that scale is practice and process before it becomes product, whether in the work of projecting the commons, claiming access to the big picture, or scaling the seriousness of a crime.

Over the course of twenty-five years, Dr. Helen Morrison has profiled more than eighty serial killers around the world. What she learned about them will shatter every assumption you've ever had about the most notorious criminals known to man. Judging by appearances, Dr. Helen Morrison has an ordinary life in the suburbs of a major city. She has a physician husband, two children, and a thriving psychiatric clinic. But her life is much more than that. She is one of the country's leading experts on serial killers, and has spent as many as four hundred hours alone in a room with depraved murderers, digging deep into killers' psyches in ways no profiler before ever has. In *My Life Among the Serial Killers*, Dr. Morrison relates how she profiled the Mad Biter, Richard Otto Macek, who chewed on his victims' body parts, stalked Dr. Morrison, then believed she was his wife. She did the last interview with Ed Gein, who was the inspiration for Alfred Hitchcock's *Psycho*. John Wayne Gacy, the clown-obsessed killer of young men, sent her crazed Christmas cards and gave her his

paintings as presents. Then there was Atlanta child killer Wayne Williams; rapist turned murderer Bobby Joe Long; England's Fred and Rosemary West, who killed girls and women in their "House of Horrors"; and Brazil's deadliest killer of children, Marcelo Costa de Andrade. Dr. Morrison has received hundreds of letters from killers, read their diaries and journals, evaluated crime scenes, testified at their trials, and studied photos of the gruesome carnage. She has interviewed the families of the victims -- and the spouses and parents of the killers -- to gain a deeper understanding of the killer's environment and the public persona he adopts. She has also studied serial killers throughout history and shows how this is not a recent phenomenon with psychological autopsies of the fifteenth-century French war hero Gilles de Rais, the sixteenth-century Hungarian Countess Bathory, H. H. Holmes of the late nineteenth century, and Albert Fish of the Roaring Twenties. Through it all, Dr. Morrison has been on a mission to discover the reasons why serial killers are compelled to murder, how they choose their victims, and what we can do to prevent their crimes in the future. Her provocative conclusions will stun you.

Lu Xun (Lu Hsun) is arguably the greatest writer of modern China, and is considered by many to be the founder of modern Chinese literature. Lu Xun's stories both indict outdated Chinese traditions and embrace China's cultural richness and individuality. This volume presents brand-new translations by Julia Lovell of all of Lu Xun's stories, including 'The Real Story of Ah-Q', 'Diary of a Madman', 'A Comedy of Ducks', 'The Divorce' and 'A Public Example', among others. With an afterword by Yiyun Li.

This book describes the 1873 voyage of the British explorer Benjamin Leigh Smith, based on the diaries and photographs of Lieutenant Herbert C. Chermside, who joined the expedition of the seas around Svalbard. Chermside's photographs, long believed lost, have recently been uncovered in Sweden and are being curated there by the Grenna Museum. The three unpublished diaries of Herbert Chermside were lent to the Scott Polar Research Institute in 1939 by Mrs. Benjamin Leigh Smith. For the first time, Chermside's diaries are published in their entirety, with the original photographs shown alongside modern images of the same locations. This includes the first photographic record of the north coast of Svalbard, images that are today being used as comparative data for the study of climate change in the archipelago. The diaries have been fully transcribed and edited.

Introductory chapters are included, written by specialists in the history of exploration, history of science, and the history of photography from Penn State University, the University of Gothenburg, and UiT, the Arctic University of Norway, as well as contributors from the UK and Germany. This volume is published in association with Grenna Museum, which will present Chermside's photographs in a 2022 exhibit on Leigh Smith and A.E. Nordenskiöld.

Words equal credibility. The more articulate a person is, the more seriously they will be taken—by everyone. On any given day, you might read “abrogate” used in a USA Today article; or “demagogue” or “fiduciary” used on CNN. You might hear “ensorcelled” and “torpor” in a TV drama; you’ll hear a political candidate described as “truculent.” You may hear “pedantic” used in a movie. How many of these words are part of most college students’ “arsenal of words”? Hopefully all of them, but if not, 499 Words Every College Student Should Know will provide them with what they need to become more articulate in their speaking and writing. It will also enhance their comprehension in their reading, ultimately culminating in what every student aspires to: earning better grades! 499 Words Every College Student Should Know teaches truly important vocabulary words and focuses on Professor Spignesi’s classroom-tested Trinity of Vocabulary Use. For each word, the vocabulary-enriched and educated student will be able to: Understand the word in their reading Use the word in their speaking Make good use of the word in their writing Using easy-to-understand, informative, and often humorous explanations of every word, 499 Words Every College Student Should Know also explores how to use the words in sentences, and in proper context. The majority of these words were individually chosen because they are fairly commonplace in media, books, online, and elsewhere, and students need to be able to understand them. Knowing them — in fact, using the words and making them part of their everyday language — will make any college student or those soon-to-be, more credible.

What are myths? How have they evolved? And why do we still so desperately need them? A history of myth is a history of humanity, Karen Armstrong argues in this insightful and eloquent book: our stories and beliefs, our attempts to understand the world, link us to our ancestors and each other. This is a brilliant and thought-provoking introduction to myth in the broadest sense - from Palaeolithic times to the "Great Western Transformation" of the last 500 years - and why we dismiss it only at our peril.
