

Bekér Chiunque Può Essere Bravo In Cucina Purché Ci Metta Passione Con DVD

While neuroscience has provided insights into the structure and function of nervous systems, hard questions remain about the nature of consciousness, mind, and self. Perhaps the most difficult questions involve the meaning of neuroscientific information, and how to pursue and utilize neuroscientific knowledge in ways that are consistent with some construal of social 'good'. Written for researchers and graduate students in neuroscience and bioethics, Scientific and Philosophical Perspectives in Neuroethics explores important developments in neuroscience and neurotechnology, and addresses the philosophical, ethical, and social issues and problems that such advancements generate. It examines three core questions. First, what is the scope and direction of neuroscientific inquiry? Second, how has progress to date affected scientific and philosophical ideas, and finally, what ethical issues and problems does this progress and knowledge incur, both now and in the future?

The Writings of Alonso de la Vera Cruz

Bekér. Chiunque può essere bravo in cucina purché ci metta passione

The essays in this 1982 volume result from a conference held at Stanford University in 1978, assembled to assess the overall character and significance of the prerevolutionary Russian experiment with the principle and practice of local self-government, the zemstvo, over half of its existence, 1864-1918. The unifying theme of the collection is the rejection of the liberal myth of the zemstvo as an instrument of social integration. The chapters focus on the substantive elements of conflict and tension that existed within the zemstvos, especially between the institutions' two principal groups: the landed gentry, who dominated the zemstvo, and the peasants, who constituted the majority of the population and were intended to the beneficiaries of most of the economic and cultural programs, yet had little part in their formation. Based on the contributors' extensive knowledge of their respective subjects, many of them provide information from previously unpublished materials in Soviet and American archives.
