

## Bruno Gröning: Il Dottore Dei Miracoli

From fansubbing, fan-generated translation, to user-generated translation, from amateur translation to social translation, non-professional subtitling has come a long way since its humble beginning in the 1980s. The prevailing technological affordance enables and mobilises the digital generation to turn subtitling into a method of self-expression and mediation, and their activities have made translation a more social and visible activity than ever before. This volume provides a comprehensive review of the current state of play of this user-generated subtitling phenomenon. It includes projects and research focusing on various aspects of non-professional subtitling, including the communities at work, the agents at play, the production conditions and the products. The perspectives in the book explore the role played by the agents involved in the emerging subtitling networks worldwide, and their impact on the communities is also discussed, based on empirical data generated from observations on active fansubbing communities. The collection demonstrates, from various viewpoints, the ways in which non-professional subtitling connects languages, cultures and communities in a global setting.

The classic mystery later turned into an Academy Award-winning film by Alfred Hitchcock, this startling whodunit still resonates today with wit and danger. "Le Chat" is a legend. He is a mystery. He is a jewel thief, famous and elusive for being able to swipe anything and get away clean. He is John Robie, retired and living a quiet life, tending his rose garden in the South of France. But his retirement plans are thrown for a loop when a series of robberies too closely resemble the work of "Le Chat," and the police start digging into Robie's past. To keep himself free, and with the help of an equally mysterious young woman, John Robie will have to catch the true thief, before the police catch him.

This book addresses a gap in the study of audiovisual translation (AVT) carried out in minority languages by exploring the role played by translations appearing on the Basque Public Broadcasting Service in the promotion and development of the Basque language. Using the framework provided by descriptive translation studies, the author illustrates the socio-cultural context of AVT in the Basque Country, focusing on the dubbing from English to Basque of television animation for children. The most innovative aspect of the book lies in its cultural and descriptive approach. Following a corpus-based descriptive methodology, the study establishes a set of criteria for a contextual and linguistic analysis that embraces both the cultural and linguistic dimensions of translation and allows source texts to be compared with their translated versions at the macro- and micro-structural levels. The book uniquely offers a broad overview of the cultural context as well as a detailed analysis of the linguistic properties of the dubbed texts.

It was on a 'dark and stormy night', during the summer of 1816 that an eccentric group of English literati gathered at the Villa Diodati. The atmosphere at the Villa was charged by the violent streaks of lightening that licked at the mountain tops and split a black sky. As the wind outside whipped up the surface of lake Lemman into a cauldron of waves the occupants of the Villa; Lord Byron, Mary Shelley, Dr John Polidori, Percy Shelley and Claire Clairmont, whipped themselves into a gothic frenzy with recitals of haunting poetry and ghost stories. The stories that they read came from a book, originally written in German, that had recently been translated into French. The book that they read from was called *Fantasmagoriana*. *Fantasmagoriana* has a unique place in literary history. This is the first full translation of the stories that inspired Mary Shelley's *Frankenstein* and Dr John Polidori's *The Vampyre*.

*This book represents an approach which is intended to give readers a general insight into what translators really do and to explain the concepts and tools of the trade, bearing in mind that translation cannot be reduced to simple principles that can easily be separated from each other and thus be handled in isolation. On the whole, the book is more process- than product-centred. Translation is seen as an activity with an intentional and a social dimension establishing links between a source-language community and a target-language community and therefore requiring a specific kind of communicative behavior based on the question "Who translates what, for whom and why?" To the extent that the underlying principles, assumptions, and conclusions are convincing to the reader, the practical implications of the book, last but not least in translation teaching, are obvious.*

*WHAT IS THE TRUTH ABOUT HEALING? Paul and Annie Whitmore seem to have the perfect life. He's a successful biologist and she is a doting mother. But when tragedy suddenly strikes, they must confront their opposing beliefs about healing, God and the Universe. Paul holds fast to science, traditional medicine and rational thinking; Annie seeks the metaphysical and paranormal worlds for answers. Who is right? When tragedy strikes a second time, Paul is thrust on a spiritual journey that takes him to sacred sites across America, causing him to question beliefs he had held all of his life. Can a man of science accept the unexplained and miraculous events that happen to him? Can he separate conspiracy theories from truths? And just what does the secret of Coral Castle and the messages from "The Wizard of Oz" have to do with his spiritual growth--and, for that matter, with ours? Sandra L. Huska once again takes the reader on a fascinating trek through "new age" concepts, causing us to wonder if there is more truth to them than we will admit. By the end of the book, it isn't just Paul Whitmore who discovers that the world is governed by things most of us have never even thought about. The reader, too, will make the same discovery. Sometimes truths are better told through fiction.*

*Translating Culture Specific References on Television provides a model for investigating the problems posed by culture specific references in translation, drawing on case studies that explore the translational norms of contemporary Italian dubbing practices. This monograph makes a distinctive contribution to the study of audiovisual translation and culture specific references in its focus on dubbing as opposed to subtitling, and on contemporary television series, rather than cinema. Irene Ranzato's research involves detailed analysis of three TV series dubbed into Italian, drawing on a corpus of 95 hours that includes nearly 3,000 CSR translations. Ranzato proposes a new taxonomy of strategies for the translation of CSRs and explores the sociocultural, pragmatic and ideological implications of audiovisual translation for the small screen.*

Humour found in audiovisual products is, of course, performative in nature. If we consider instances of humour - any droll moment occurring in today's fare of mixed-genre products as a composite of cognition, emotion, interaction and expression - we see that the verbal code becomes just one component of four equally significant elements. And, as 'expression' is not limited to verbal output alone, humour may of course be created in absence of a verbal code. Translating humour for audiovisuals is not too different from translating verbal humour tout court. What makes humour occurring within audiovisual texts more problematic is the fact that it may be visually anchored; in other words a gag or a joke may pivot on verbal content directed at a specific element that is present within the graphic system of the same text. As the term itself suggests, audiovisuals contain two overlying structures: a visual and an auditory channel each of which contain a series of both verbal and non-verbal elements which inextricably cross-cut one another. The contributors in this collection of essays present a series of case studies from films and video-games exemplifying problems and solutions to audiovisual humour in the dubs and subs in a variety of language combinations.

Immaginate un posto dove potreste trovare le risposte a tutte le domande che vi assillano? Eccolo qui! Ma attenzione! Le risposte che troverete su questo libro sono come le ciliegie. Trovata una...ne vorrete immediatamente un'altra! La storia è quella di un giovane dei giorni nostri. Un giovane che partendo dalla ricerca...di una canna, incappa in una misteriosa "caccia al tesoro", dove al limite del paradossale farà degli incontri strampalati con personaggi che lo riporteranno alla scoperta di un mondo sconosciuto: quello interiore. Da qui in poi inizierà a riflettere su di sé. Sarà l'incontro tra due realtà: quella di tutti i giorni e quella del mondo interno. Nella seconda parte del libro, dopo una serie di vicissitudini, il protagonista incontrerà gli stessi personaggi, ma in altre vesti, che gli sveleranno il senso degli incontri e lo aiuteranno a scoprire...la "cosa più preziosa". Non ci troviamo di fronte a un romanzo canonico ascrivibile ai soliti generi, ma a un ibrido tra un romanzo di formazione e un originale manuale di self-help. Gli stessi personaggi - così come anche le altre parti del testo come i dialoghi e l'ambientazione - diventano vero e proprio veicolo del messaggio che l'autore vuole offrire. Un misto di psicologia e spiritualità che si fondono, basati su una solida bibliografia, per dar voce a pensieri di crescita e miglioramento interiore.

A breakout bestseller in Italy, now available for American readers for the first time, *Genesis: The Story of How Everything Began* is a short, humanistic tour of the origins of the universe, earth, and life—drawing on the latest discoveries in physics to explain the seven most significant moments in the creation of the cosmos. Curiosity and wonderment about the origins of the universe are at the heart of our experience of the world. From Hesiod's Chaos, described in his poem about the origins of the Greek gods, *Theogony*, to today's mind-bending theories of the multiverse, humans have been consumed by the relentless pursuit of an answer to one awe inspiring question: What exactly happened during those first moments? Guido Tonelli, the acclaimed, award-winning particle physicist and a central figure in the discovery of the Higgs boson (the "God particle"), reveals the extraordinary story of our genesis—from the origins of the universe, to the emergence of life on Earth, to the birth of human language with its power to describe the world. Evoking the seven days of biblical creation, Tonelli takes us on a brisk, lively tour through the evolution of our cosmos and considers the incredible challenges scientists face in exploring its mysteries. *Genesis* both explains the fundamental physics of our universe and marvels at the profound wonder of our existence.

Assembled by Audrey Hepburn's son Luca Dotti, *Audrey in Rome* is an intimate collection of almost two hundred candid photographs of the beloved actress and much-imitated style icon during the twenty-year period she made Rome her home. A private album of rare snapshots—many never published before—of Audrey Hepburn in her everyday life as a citizen of the Eternal City, *Audrey in Rome* is a treasure for every fan of her films and her impeccable, timeless style. With an introduction by Dotti that reveals Audrey's private side and three photo-filled chapters organized by decade, the book captures the actress as she strolls around the city alone and with family and friends, walks her Yorkie, Mr. Famous, has breakfast in Piazza Navona, visits the local florist, and more. The book also contains set photographs of the films she made during her Rome years (*Roman Holiday*, *War and Peace*, *The Nun's Story*, *Breakfast at Tiffany's*) and of the famous clothes and accessories that helped create her iconic look. Irresistible as the actress herself, *Audrey in Rome* opens the door to Hepburn's personal world.

*This is one of Pasolini's least known books, it is one of his most important challenges to himself and to the world. The book pits assumed Western cultural supremacy against the battle for Africa's freedom and self-assertion. The Savage Father offers a deep analysis of the internal struggles between the coloniser and the colonised, as well as showing us the externalised conditioning to which both are prey.*

*Bruno Gröning gehörte ohne jeden Zweifel zu den berühmtesten geistigen Heilern des 20. Jahrhunderts. Er verfügte über eine herausragende heilerische Begabung, die er zum Segen unzähliger Menschen einsetzte. Geistheiler, die in einer noch stark materialistisch geprägten Zeit ihrer Berufung folgten, hatten vor einem halben Jahrhundert noch mit weitreichenden Schwierigkeiten zu kämpfen und kamen nicht selten mit einem Gesetz in Konflikt, das "Heilen" nicht als eine helfende Tätigkeit verstand. So musste Bruno Gröning manchmal schmerzhaft erfahren, dass er wahrhaft ein Pionier für seine Sache war. *Extended Special Issue Spik in Glyph? Translation, Wordplay and Resistance in Chicano Poetry, pp 141-160 Tace Hedrick (Comparative Literature, Penn State Harrisburg, USA) This paper examines the nature of contemporary bilingual Chicano poetry from the 1970s to the present, particularly in terms of the poetic use of bilingual wordplay and the questions it raises about the uses and possibilities of translation.*

*Using Walter Benjamin's essay 'The Task of the Translator' as a touchstone, and positing a metaphorical link between translation and transfer, the paper looks at bilingual wordplay as a kind of bridging-over or translation of one language into the other, crossing and breaking down borders and hierarchies between the two languages. To illustrate this, cultural practices and uses of bilingualism are examined from both a*

sociolinguistic and a poetic point of view, with examples of how puns, (mis)pronunciations, slang, loanwords, and mixtures of Spanish and English are used in bilingual poetry for formal and polemical effect. Meaningful Literary Names: Their Forms and Functions, and their Translation, pp 161-178 Luca Manini (Montalto, Italy) Proper nouns, which have a special status within the language system as opposed to common nouns, can be used as characterizing devices in literary texts and so become a meaningful element in the texture of such works. Names can in this way be endowed with an extra semantic load that makes them border on wordplay. The presence of meaningful literary names is likely to cause problems when the text is to be translated, the question being not only whether the transposition of such names in the target language is technically possible, but also to what extent this would be viewed as an appropriate procedure. This paper, which reflects research in progress, explores the issue by analyzing a two-part corpus of texts: The first part consists of twentieth-century Italian translations of English Restoration comedies and the second of Italian translations of Dickens's novels. There are occasional references to other English literary texts from the medieval and Renaissance periods as well. Technical problems of translating proper nouns are taken into consideration, along with other factors which may influence the translator's choices, such as genre, intended audience, cultural tradition and general norms of translation. The Pitfalls of Metalingual Use in Simultaneous Interpreting, pp 179-198 Sergio Viaggio (United Nations, Vienna, Austria) For the simultaneous interpreter, puns and other instances of metalingual use, involving as they do an interplay of form, content and pragmatic intention, may represent a formidable challenge. The interpreter's most efficient tool is his or her adroitness at determining the pun's or the metalingual comment's relevance on the basis of an instant analysis of the communication situation, with particular attention to the speaker's pragmatic intention and intended sense, as well as the audience's needs and expectations. Actual examples from United Nations meeting are used to illustrate the different factors affecting the rendition of wordplay and metalanguage and some suggestions are made towards improving the training of interpreters. Caught in the Frame: A Target-Culture Viewpoint on Allusive Wordplay, pp 199-218 Ritva Leppihalme (University of Helsinki, Finland) Allusive wordplay - stretches of preformed linguistic material (or frames) that have undergone lexical, grammatical, or situational modification - is so culture-specific that it is not only hard for translators working from a foreign language to translate but easy for them to miss altogether. This paper discusses examples of allusive wordplay in English fiction and journalism and reports on an experiment designed to investigate the recognition of frames and carried out on twenty-one Finnish university students of English. Student translations of some of the examples are also discussed. It is argued that a translator who wants to produce a coherent target text and to avoid 'culture bumps' (Archer 1986) must above all pay attention to the function of the wordplay in the relevant context. Passages that include modified frames will often need to be rewritten, as attempts to evoke source-culture frames are unlikely to work with target-culture readers to whom such frames are unfamiliar. Target-culture frames, on the other hand, may be puzzling in a text which is set in the source-culture context. 'Curiouser and Curiouser': Hebrew Translation of Wordplay in 'Alice's Adventures in Wonderland', pp 219-234 Rachel Weissbrod (The Open University of Israel) In 'Alice's Adventures in Wonderland', wordplay has a central role in producing an ambivalent text, that is, one which can function at one and the same time in children's literature and in adult literature. This paper examines, from a norm-oriented approach, how instances of wordplay were treated in three Hebrew translations. The first translation, published in 1923, was subject to a norm which required acceptability at the socio-cultural level. Instances of wordplay were accordingly replaced by completely new ones that were rooted in Jewish tradition. In the second translation, published in 1951, the treatment of wordplay was determined by a different norm, one which required a rephrasing of Carroll's work in an elevated style. Only in the third translation, published in 1987, was the translator sufficiently free from socio-cultural and stylistic dictates to cope with Carroll's wordplay with all the means available. In this last translation, elements which are foreign to Carroll's world or style are introduced only insofar as they helped the translator replace the original wordplay. Translating Jokes for Dubbed Television Situation Comedies, pp 235-257 Patrick Zabalbeascoa (Universitat Pompeu Fabra, Barcelona, Spain) This paper examines Catalan and Spanish dubbed versions of English TV comedy series such as 'Yes, Minister', with special attention to wordplay as a particular instance of the more general problem of translating comedy for television. The objective is to show that producing foreign-language dubbed versions of audiovisual texts has enough in common with other types of translating assignments to be included within translation studies, as well as to contribute to the area of quality assessment and evaluation of translations by proposing that the criteria for judging a translation should be clear, flexible and realistic, and should take into account the translator's limitations and working environment. The paper also proposes a classification of jokes, with further examples from translations of British situation comedy into Catalan, and presents the concept of 'stylebook' as a helpful bridge between general statements about translation and specific contextualized translating assignments. Dante's Puns in English and the Question of Compensation, pp 259-276 Edoardo Crisafulli (University College, Dublin, Ireland) After a comparative analysis of the source and target texts, this paper attempts to put forward an explanation to account for H. F. Cary's avoidance policy as he deals with Dante's puns in his early nineteenth-century translation of the 'Divina Commedia'. The aim is to consider the findings of the analysis in relation to the issue of compensation. No discussion of translation can avoid dealing with this issue, but there is evidence that compensation cannot be called upon to account for all the foregrounding devices in the target text. In particular, the relationship between compensation and the translator's ideology must be taken into account. The paper concludes by suggesting some conditions which might make it easier to identify instances of compensation. Harvey's (1995) descriptive framework is employed with a view to improving its explanatory power. No-Man's Land on the Common Borders of Linguistics, Philosophy & Sinology: Polysemy in the Translation of Ancient Chinese Texts, pp 277-304 Seán Golden (Universitat Autònoma de Barcelona, Spain) This paper treats polysemy as the driving force of ancient Chinese rhetoric, inherent in the language and its system of writing, not just as an embellishment but as the very basis of discourse, and intrinsic to the multiple meanings expressed by the text; in this way, text may represent a worldview that is radically different from the Western one and that is encoded syntactically, semantically, rhetorically, and visually (in the case of the Chinese written character) in the language. This challenges the comprehension of ancient Chinese texts by translators and their reproduction in languages that share neither the worldview nor the multiple codes involved. From the no-man's land on the common borders of linguistics, philosophy and sinology, the translator may glimpse the horizon of understanding within which the original operates, while knowing that the readership of a translation is looking at a different horizon. Better understanding of this fact by the translator should contribute to a better interpretation of the multiple meanings contained in the original and to a translation that maintains as many meanings as possible. **A director, producer, and writer, George Lucas is the power behind "The Force." The son of a conservative small-town businessman, he grew up to become arguably the most identifiable and popular filmmaker in the history of the medium. Yet unlike his more publicly engaged contemporaries, Lucas rarely grants reporters an audience. This first book of Lucas's interviews affords fans and students of film and science fiction a rare opportunity. Editor Sally Kline collects conversations from the reticent director spanning Lucas's entire career, from the making of his first film, 1971's "THX-1138," through "American Graffiti," the triumph of the "Star Wars" trilogy, and even a 1999 interview given while awaiting the release of "Star Wars: Episode One--The Phantom Menace." In interviews from venues such as "Rolling Stone," "Playboy," and "American Film," Lucas reveals his distrust of the Hollywood establishment, his love for making movies, and his unambiguous values and how those values translate into the epic clash between good and evil created when he explores characters like Darth Vader and Luke Skywalker. Lucas revolutionized the movie industry and created the most successful film series of all time. Along with films of his close friend Steven Spielberg, Lucas's releases invented the notion of blockbuster movies. Before the end of the millennium, he could count the loyal fans of the Star Wars trilogy in the millions. Sally Kline is film critic for "The Journal" newspapers. She has worked as a film commentator on a number of Washington, D.C. radio stations and as a guest lecturer at George Washington University. A freelance writer and researcher, she has contributed to two books, including a biography of Robert F. Kennedy.**

**He came to mainstream prominence as a machine more human than his creators in Blade Runner, terrified us as a hitchhiker bent on his own death and the death of anyone who got in his way in The Hitcher, and unforgettably portrayed a lonely king roaming the night as a wolf and pining for the love of a hawk during the day in Ladyhawke. Rutger Hauer has dazzled audiences for years with his creepy, inspiring, and villainous portrayals of everyone from a cold-blooded terrorist in Nighthawks to a blind martial arts master in Blind Fury, but his movie career was nothing compared to his real-life adventures of riding horses, sword fighting, and leaving home at fifteen to scrub decks on a freighter and explore the world. From poverty to working with a traveling theater troupe to his breakout European performance in Turkish Delight and working with legendary directors such as Paul Verhoeven (RoboCop and Basic Instinct) and Ridley Scott (Alien and Gladiator), Hauer has collected All Those Moments here.**

A group of scholars working on different European and non-European cultural and literary traditions come together here to discuss the relationships between their areas of study and the Nordic countries. The range of the contributions expands over time and space, from the Middle Ages to the present day, from Poland in the east to the United States in the west, across various European countries. Through various kinds of expertise and different perspectives, this intercultural discourse deals with diverse themes, including the perception of Nordic culture(s) by foreign writers as well as the image of other cultures in Scandinavian works. In particular, the literary and cultural interchange of models and ideas between the North and other areas is investigated in a number of essays devoted to numerous authors, including, among others, Klaus Böldl, Carmen de Burgos, Carlo Emilio Gadda, Gerhart Hauptmann, Henrik Ibsen, Stieg Larsson, Carl von Linné, Rainer**

**Reveals the course of archaeological adventures and insights that resulted in The Earth Chronicles series • Explores links between the Old world and the New in search of evidence of extraterrestrial gods in the artifacts and murals of ancient civilizations • Reveals archaeological cover-ups concerning Olmec origins in Mexico and ancient UFO artifacts in Turkey In this autobiographical book, the internationally acclaimed author Zecharia Sitchin reveals the foundational research and the adventurous expeditions that resulted in his writing the bestselling The Earth Chronicles series. Ranging from Mayan temples in Mexico to hidden artifacts in Istanbul, Turkey, from biblical tunnels in Jerusalem to the mysteries of Mt. Sinai, from the abode of a Sumerian goddess to Greek islands, the Expeditions' destinations and amazing discoveries unmasked established fallacies, detected the fate of mysterious artifacts, and revealed ancient connections to modern space facilities. For the first time, Sitchin shares with the reader not only his encompassing knowledge of antiquity and his field experiences, but also the concrete evidence for his conclusions that ancient myths were recollections of factual events, that the gods of ancient peoples were visitors to Earth from another planet, and that we are not alone in our own solar system. Accompanied by photographs from his personal archive, here is Sitchin's own story and his inner feelings about the cord that binds him to his ancestral past.**

Did you ever wonder "man, I wonder what happened on that Cronenberg dimension?" The one where Rick and Morty turned everyone into Cronenbergs and then Jerry and Summer and Beth like survived a terrible body-horror apocalypse? Did you wonder that? You did? Bruh, this is the issue for you then.

First published in 1960, this watershed work aimed to make madness comprehensible, and in doing so revolutionized the way we perceive mental illness. Using case studies of patients he had worked with, psychiatrist R. D. Laing argued that psychosis is not a medical condition but an outcome of the 'divided self', or the tension between the two personas within us: one our authentic, private identity, and the other the false, 'sane' self that we present to the world.

Esoteric Psychology - The Seven Rays: The knowledge of the Seven Rays provided by this book will prove of immense value to all who seek to understand human nature, and to achieve enhanced self awareness and integration of personality, in themselves and others. This masterly written and illustrated manual is an absolutely essential starting and reference work for all those who finally respond in this lifetime to their Purpose and Inner Voice! This book emphasises that all is energy and that Man is an energy unit affected from both without and within. It demonstrates that Ray Psychology is essentially practical and shows how the qualities of these energies may be understood and embraced in human behaviour and today's language. It is plain that psychology will play an ever increasing role in the development of new age consciousness. Already today millions of people, who would be regarded as laymen, practise their own psychology in everyday life. This tendency has been boosted by the general interest in astrology. A glimpse into the future will show that the new psychology will be based on many emerging astrological factors. Esoteric psychology takes into account not only hereditary and environment, but draws also upon that massive third factor which is the psychic and spiritual nature of Mankind. The effect of karma, the influence of previous lives, etc., are major contributions to the behaviour of those who seek to tread the path towards spiritual enlightenment. Esoteric Psychology is based on two major precepts. Firstly, there is a cosmic force conveying seven streams of energy into our solar system that affect the nature, behaviour and evolution of all forms within the ring-pass-not of this system. These streams are termed the Seven Rays. Secondly, spiritual qualities emerging from the immortal component of Man's structure affect his behaviour and modify the contributing factors of his hereditary equipment and the environment into which it is thrust.
