This book focuses on the increase in female leadership over the last fifty years, and the concrete benefits and challenges this leads to in organizations. It moves beyond the typical focus on developed, Western contexts and answers the call for research on how women in emerging markets rise above the proverbial “glass ceiling”. The authors integrate two underdeveloped topics that are highly relevant to modern business: women in leadership roles, and women in emerging markets. They examine how women leaders in a range of professional services—including accounting, consulting, law, engineering and medicine—have managed to navigate their careers while considering the role emerging markets play in their work. Based on cutting-edge research, the topics are brought to life through examples and profiles of leading women across Africa, the Middle East and the Far East. These narratives, told in the leaders’ own words, are key to understanding women’s achievements and the barriers they face. Students of leadership, diversity, gender studies, and human resource management will learn much from this insightful book.

Overcome the twelve habits holding you back and take your career to new heights with this wise and approachable guide from two business leadership experts. Ready to take the next step in your career . . . but not sure what's holding you back? Read on. Leadership expert Sally Helgesen and bestselling leadership coach Marshall Goldsmith have trained thousands of high achievers -- men and women -- to reach even greater heights. Again and again, they see that women face specific and different roadblocks from men as they advance in the workplace. In fact, the very habits that helped women early in their careers can hinder them as they move up. Simply put, what got you here won't get you there . . . and you might not even realize your blind spots until it's too late. Are you great with the details? To rise, you need to do less and delegate more. Are you a team player? To advance, you need to take credit as easily as you share it. Are you a star networker? Leaders know a network is no good unless you know how to use it. Sally and Marshall identify the twelve habits that hold women back as they seek to advance, showing them why what worked for them in the past might actually be sabotaging their future success. Building on Marshall's classic bestseller What Got You Here Won't Get You There, How Women Rise is essential reading for any woman who is ready to advance to the next level.

"You cannot win without a workplace where women and men have equal opportunities, equal input, and equal power." –Dominic Barton, Global Managing Partner, McKinsey & Company On almost a daily basis, we read stories in the news about high-profile male leaders, CEOs, venture capitalists, and entrepreneurs harassing and acting inappropriately toward the women with whom they work. Following such revelations, these men generally lose their jobs, and their companies lose valuable female talent, customers/clients, and their reputations. And, although we regularly hear stories about the "bro culture" that obstructs women's progress and creates hostile work environments for them, we haven't heard as much about the efforts of good men who want

to change the in-office behavior of their teams and companies so that they and women they work with can realize their full potential and their businesses can thrive. This book teaches men and managers how to respond in these situations and how to lead by example. In *WE: Men, Women, and the Decisive Formula for Winning at Work*, Rania Anderson lends her guidance on this exact topic. Social mores have changed, and yet, well-intentioned managers simply don't always know what to do and what's appropriate and useful to actively recruit, retain, and advance more women into leadership. They want to be told how this can make a difference to them and how they can make a difference—this book shows you how to improve your own results and win in business: A new playbook to recruit and retain high-caliber women Take actions to work effectively, elevate and lead with women in the workplace Discover how traditional social roles exert a powerful pull on people of both genders and what to do about it. End confusion of male leaders In the #MeToo era when everyone else is focused on what's wrong and what not to do, *WE: Men, Women, and the Decisive Formula for Winning at Work*, is about what's going well and what you can do. Men who are front-line managers, middle managers, and senior managers have been sidelined and left out of efforts to achieve gender parity for too long. Now, these guys can get back in the game!

Learn to take ownership of your success, overcome self-doubt, and banish the thought patterns that undermine your ability to feel—and act—as bright and capable as others already know you are with this award-winning book by Valerie Young. It's only because they like me. I was in the right place at the right time. I just work harder than the others. I don't deserve this. It's just a matter of time before I am found out. Someone must have made a terrible mistake. If you are a working woman, chances are this internal monologue sounds all too familiar. And you're not alone. From the high-achieving Ph.D. candidate convinced she's only been admitted to the program because of a clerical error to the senior executive who worries others will find out she's in way over her head, a shocking number of accomplished women in all career paths and at every level feel as though they are faking it—impostors in their own lives and careers. While the impostor syndrome is not unique to women, women are more apt to agonize over tiny mistakes, see even constructive criticism as evidence of their

shortcomings, and chalk up their accomplishments to luck rather than skill. They often unconsciously overcompensate with crippling perfectionism, overpreparation, maintaining a lower profile, withholding their talents and opinions, or never finishing important projects. When they do succeed, they think, Phew, I fooled 'em again. An internationally known speaker, Valerie Young has devoted her career to understanding women's most deeply held beliefs about themselves and their success. In her decades of in-the-trenches research, she has uncovered the often surprising reasons why so many accomplished women experience this crushing self-doubt. In *The Secret Thoughts of Successful Women*, Young gives these women the solution they have been seeking. Combining insightful analysis with effective advice and anecdotes, she explains what the impostor syndrome is, why fraud fears are more common in women, and how you can recognize the way it manifests in your life.

The 10 Habits of Highly Successful Women is a collection of essays revealing the secret career habits and hard-won wisdom of a diverse group of accomplished women, selected by Rachel Sklar and Glynnis MacNicol, co-founders of *TheLi.st*, the well-known network dedicated to elevating professional women. Perhaps no group has experienced more upheaval in the last few decades than working women. In this series, each woman explores the one key habit or lesson that has made the difference in forging her career and attaining professional success. Whether it's CNN personality Sally Kohn's exploration of emotional correctness or *What Not To Wear*'s Stacy London on the wear and tear of our aspirational "Culture of Extraordinary;" why millennial Nisha Chittal won't tell you her age and what Cindy Gallop learned about sex while dating men half hers; how lessons from waitressing led Jenna Wortham to the *New York Times* or how Paula Froelich perfected the art of the "controlled burn" to start over after the end of a dream career—these essays uncover the challenges and delights of chasing, and finding, success in work and life as a professional woman.
