This book has mainly an objective to evaluate some text to speech converters, voice changers, video editors, cartoon animators and video recording and live streaming programs. As I am Arabic, I gave special importance to look for the best tools that can convert Arabic text to voice with good quality because of the lack of these tools. And I also gave special importance to look for the best tools that can change the voice tune as a lot of people don't like to make videos with their voice for special reasons. Then I gave quick guide on how to use the two important video editors, VSDC Free Video Editor and Camtasia Studio. Then I gave quick guide on how to use two websites that enable people to create cartoon animation videos in a simple way, https://www.animaker.com/ website and https://www.powtoon.com website. Then I gave quick guide on how to us one of the best animator programs, which is Reallusion Cartoon Animator 4. I explained also how it is possible to make face mockup through Cartoon Animator 4Motion Live 2D Plugin. Then I introduced Adobe Character Animator as alternative program to make face mockup. Finally I explained about one of the video recording and live streaming programs, which is OBS Studio. I mentioned briefly how to setup OBS studio to create livestream video on Youtube and Facebook. At the end, I showed how to use Voki website to create customizable speaking avatars This work is divided to the following sections. 1. Some tools to reshape the Arabic letters so they can be converted to voice in other tools. 2. Some tools to convert English text to speech TTS. 3. Some tools to convert Arabic text to speech TTS. 4. Learning styles are highly relevant for students in the online environment. Designing Effective Library Tutorials provides examples of, and steps for, how to create tutorials that match learning styles, based on usability studies of students from various cultural groups and styles of learning. The book presents studies, practical suggestions, and examples to assist librarians and faculty as they develop online programs for students from diverse learning styles. Research on learning style preferences in the online environment emphasizes the need to provide a variety of methods that include text, aural, visual, and kinesthetic examples. Geared for the practitioner working in online learning, the book summarizes current literature, and presents best practices for designing effective online tools for diverse learners, including suggestions for assessment of learning objects. This title is structured into twelve chapters, covering: The learning style debate: do we need to match up learning styles with presentation styles? Overview of learning style theories and learning style results from various studies; The intersection of culture and learning styles; The need for learning object development; Current practice: categories and features of library tutorials; Effective design of learning objects; Pedagogical considerations for tutorials; Interactivity options for tutorials; Assessment of learning objects; The value and process of usability studies; Marketing learning objects for broad visibility; and a section on resources. Provides results from usability studies conducted with students that assess learning style and the resulting effectiveness of tutorials based on their preferred style Compares approaches and software used by librarians and educators to create tutorials, along with examples of pitfalls and benefits of each for various learning styles Incorporates examples of ways to use software while including learning objects to match learning style

The collection of systems represented in this volume is a unique effort to reflect the diversity and utility of models used in biomedicine. That utility is based on the consideration that observations made in particular organisms will provide insight into the workings of other, more complex systems. This volume is therefore a comprehensive and extensive collection of these important medical parallels.

Make separate library services for distance learners a thing of the past Internet Reference Support for Distance Learners takes a comprehensive look at efforts by librarians and information specialists to provide distance learners with effective services that match those already available on campus. With the development of the World Wide Web and the evolution of Web-based services, reference librarians are adding a human element to the virtual library, blurring the difference between distance learners and traditional users. This unique book examines how they deal with a wide range of related topics, including standards and guidelines, copyright issues, streaming media, and chat and digital references, and presents a historical overview of how reference and instructional services have been delivered to distance users—before and after the creation of the Internet. Internet Reference Support for Distance Learners reveals that librarians do not make a sharp distinction between reference and instruction within the context of distance learning, and that there is no clear boundary between "true" distance learners and more traditional students who might use services designed for nontraditional users. Online capabilities have allowed reference librarians to approximate services advocated by published guidelines and standards, including the ACRL Distance Learning Section's Guidelines for Distance Learning Library Services, to provide a framework for librarians to plan services for off-campus students. Internet Reference Support for Distance Learners provides practical information on: how librarians can "keep IT simple" when designing methods to access reference support why library Web sites are vital sources of communication between the distance learning student and the reference-based instructional component how to set up a university chat service, including software selection, staff training and assessment how to provide students services beyond traditional provision of resources, including advising, enrollment, and payment of fees how to create an online assistance site that incorporates online versions of traditional print handouts, FAQs, subject guides, course-specific guides, learning modules, and instructional videos in one central location how to work with faculty to create online support for students in Blackboard courses the pros and cons of using open-source software how to create an online library assistance site how to create online information literacy course to teach independent research skills to remote students how to avoid copyright infringement and how to educate library personnel about copyright law how to use Camtasia Studio, a screen capture program to create audio and video for online presentations Internet Reference Support for Distance Learners is an invaluable resource for librarians working in academic, school, special, and public settings, and for library science faculty and students.

Legal research is a fundamental skill for all law students and attorneys. Regardless of practice area or work venue, knowledge of the sources and processes of legal research underpins the legal professional's work. Academic law librarians, as research experts, are uniquely qualified to teach legal research. Whether participating in the mandatory, first-year law school curriculum or offering advanced or specialized legal research instruction, law librarians have the up-to-date knowledge, the broad view of the field, and the expertise to provide the best legal research instruction possible. This collection offers both theoretical and practical guidance on legal research education from the perspectives of the law librarian. Containing well-reasoned, analytical articles on the topic, the volume explains and supports the law librarian's role in legal research instruction. The contributors to this book, all experts in teaching legal research, challenge academic law librarians to seize their instructional role in the legal academy. This book was based on a special issue of Legal Reference Services Quarterly.
