

Cheetah Cubs (Penguin Young Readers, Level 3)

Grab this 100 page cheetah activity book for girls who love cheetahs and safari animals. A great gift for keeping your wildlife-loving, animal rescue fan young children entertained for hours! 8.5 x 11 inch coloring book 100 pages long with a mix of coloring pages, fun solo activities and two-person paper games. paperback cover Like this cheetah colouring book? Check out the other coloring books available from this author! Life of Pi is a masterful and utterly original novel that is at once the story of a young castaway who faces immeasurable hardships on the high seas, and a meditation on religion, faith, art and life that is as witty as it is profound. Using the threads of all of our best stories, Yann Martel has woven a glorious spiritual adventure that makes us question what it means to be alive, and to believe.

Freda the Cheetah of Mozambique was the world's best player of hide-and-go-seek. No one knows where she hides, but they know where she doesn't. Because the places they looked were the places she wasn't.

Did you know that penguins toboggan? They sometimes travel by sliding over ice on their stomachs. Beginning readers will discover the physical characteristics of penguins and learn how they move in water and on land.

I Am the Shark

Watch Out!

Read Along or Enhanced eBook: Based on a true story, WAITING FOR ICE follows an orphaned polar bear cub as she struggles to find food on Wrangel Island, far north in the Arctic Ocean. Left alone at ten months old, the young female finds herself up against other bears who are bigger and stronger than she is—and just as hungry. Due to rising temperatures, the bears are trapped on the island until the ice packs reform. Only then can they venture out to hunt for seals and whales, using the ice as life rafts.

Baby Otters are playful and adorable creatures—from their first steps outside of the cozy den their mother prepared for them to their first paddles in the icy water. Veteran science book author Ginjer L. Clarke highlights plenty of facts about baby otters, including how they learn to swim, what they eat, and where they live.

An imaginative early reader experience, ages 3-5, with rhyming verse and exquisite illustrations that instantly connects with the cheetah life. It is lovingly crafted, educational and encourages nurturing feelings towards animals with a special page on "How to Love a Cheetah". Engages visual, auditory, thinking parts of the mind, this book is fun!

Did you know that while a cheetah can reach speeds of up to 60 mph (96.6 km/h) in just three secondsit can also stay perfectly still for half an hour while hunting? Be surprised and awed by every page of this captivating book! Features include stunning photography; a fact file which breaks down vital data points in an easy-to-follow and understand format; fast facts; a family tree to show the evolution of and how this animal fits into the wider category of its scientific order; a glossary and more. The last chapter of every Natures Children title always discusses humans impact on the animal and its environment.

Not for the faint of heart, this revolting reader will be a favorite among boys and everyone interested in the strange and unusual!

#1 NEW YORK TIMES BESTSELLER • More than one million copies sold! A "brilliant" (Lupita Nyong'o, Time), "poignant" (Entertainment Weekly), "soul-nourishing" (USA Today) memoir about coming of age during the twilight of apartheid "Noah's childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa's history that must never be forgotten."—Esquire Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by The New York Time, USA Today, San Francisco Chronicle, NPR, Esquire, Newsday, and Booklist Trevor Noah's unlikely path from apartheid South Africa to the desk of The Daily Show began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents' indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa's tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. Born a Crime is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man's relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother's unconventional, unconditional love.

Learn how animal parents love and protect their babies in this beautifully illustrated, rhyming picture book! Perfect for families, classrooms and libraries. Baby on Board includes backmatter with a fun matching game and STEM/STEAM activities. You may know that kangaroos carry their babies in pouches, but did you know that alligators keep their babies safe in their jaws, or that baby anteaters take a ride on their mom's backs? Why does an Arctic hare have tiny ears? To conserve heat! How does a walrus feel around for food on the bottom of the sea? With its whiskers! Learn cool facts about the arctic fox, the beluga whale, the snowy owl, and more in this book.

Adorably cute and amazingly fast, the cheetah is a perennial favorite among kids. This National Geographic Reader will delight kids with beautiful photographs and mind-boggling facts about this majestic and mysterious cat. Did you know a cheetah can go from 0 to 60 mph in less than 3 seconds? True to the National Geographic Kids' style and trusted reputation, snack size bites of information provide easily digestible learning that fulfills both the reader's curiosity and sense of achievement. National Geographic supports K-12 educators with ELA Common Core Resources. Visit www.natgeod.org/commoncore for more information.

Creatures sprint, slither, and soar in this STEM-driven dive into the extraordinary, everyday ways animals move! A squid jets through the ocean like a rocket. A cheetah races after a zig-zagging gazelle. A fishing spider walks on water with its eight hairy legs. All animals must move. Whether on the hunt for something to eat, on the run from being eaten, or in search of a mate or a safe place to live, their lives depend on marvelous motion. In this fascinating introduction to biomechanics, seasoned non-fiction writer Galadriel Watsondraws on biology, physics, and other sciences to show readers the incredible ways a variety of creatures move to meet their everyday needs—and overcome the physical forces working against them. An accessible, lively style and dynamic design will keep readers engaged, while Samantha Dixon's energetic illustrations and mechanical diagrams reinforce STEM concepts on each spread.

Stories from a South African Childhood

I See a Buffalo tells the tale of a young buffalo who is distressed by her size. She wants to join the other animals at play, but her bulk and ungainliness make her self-conscious. When the animals turn her away, Buffalo decides to keep to herself and accept her loneliness. But when a huge storm creates a sudden flood, Buffalo realises she can save the day. Time and again, she wades into the floodwaters to save the smaller animals. By the end of the day, everyone understands that it is not the shape of your body that counts, but the size of your heart.

Cheetah cubs play and purr just like kittens. Someday they'll be able to run faster than any other animal in the world. Read along as cheetah cubs leap and grow in this book.

Learn about the history of dragons in this photographic nonfiction leveled reader perfect for kids interested in the natural - and unnatural - world! Did you know that Marco Polo, Alexander the Great, and other explorers all described seeing dragons in their ancient travels? Or that the Komodo dragon may not breathe fire, but it has a venomous bite to help catch its prey? Even today there are still some types of dragons roaming the earth! Embracing children's delight in the mythical creatures while also imparting fascinating facts about the real ones, discover the history of these special animals and decide for yourself if you believe in dragons! With simple language and vivid photographs, Are Dragons Real? is perfect for emerging readers curious about the natural world and this legendary creature.

View the animal kingdom up close as never before in this breathtaking title, which has already sold over 1.5 million copies. Written by 70 specialists, it features stunning wildlife photography of more than 2000 of the world's most important wild mammals, birds, reptiles, amphibians, and insects. With around two million species identified to date, animals are the dominant and most varied form of life on the planet. Animal presents a representative selection, ranging from the giant baleen whale, to fast-moving predators such as sharks, big cats, and birds of prey, as well as microscopic beetles barely 1mm long and other insects. It presents some of the latest species to be described: meet the cute but elusive olinguito from South America, which was only identified in 2013, or the skywalker hooleck gibbon that was named after a Star Wars character in 2017. Animal also explains how the earth's biodiversity is in sharp decline and the conservation projects underway to safeguard precious species. For each one, it gives a locator map and statistics, including its conservation status. For anyone who wants a reliable and enthralling reference, in which you can find the answers to everything - from why zebras are striped or how the sunbear got its name - Animal is your essential one-stop guide.
