What can the study of
young monkeys and apes
tell us about the minds
of young humans? In this
fascinating introduction

Download File PDF Children's Folded Map Of The United Kingdom

to the study of primate minds, Juan Carlos Gomez identifies evolutionary resemblances--and differences--between human children and other primates. He argues that

Download File PDF Children's Folded Map Of The United Kingdom

primate minds are best understood not as fixed collections of specialized cognitive capacities, but more dynamically, as a range of abilities that can

surpass their original adaptations. In a lively overview of a distinguished body of cognitive developmental research among nonhuman primates, Gomez looks at

essential functions of mental life are based on ideas that cannot be explicitly articulated. Nonhuman and human primates alike rely on implicit knowledge.
