In many ways, Vangie and Angie Cooper are one person, with many unspoken secrets. In more ways, Vangie is everything Angie wishes to be. While Vangie is provocative, ambitious, and will to stop at nothing to escape poverty, Angie is clumsy, awkward, and quiet. Inseparable, the twins vow no stretch of the sea or the circumference of the earth will ever come between them. But fate deals them both wild cards, and they find themselves worlds apart, living on opposite sides of the tracks. Years later, when a dark family secret unearths, Vangie and Angie's paths cross again, under fatal circumstances. Narrated in the starkly contrasting voices of two very different heroines, "The Hand She Played" chronicles the unbreakable bond between identical twins and redefines the meaning of undying love.

This book presents essays by eminent scholars from across the history of medicine, early science and European history, including those expert on the history of the book. Along the way, readers may learn of the purchasing habits of physician-book collectors, the writing of history and the development of natural history. Modeling the interdisciplinary approaches championed by Siraisi, this volume attests to the enduring value of her scholarship while also highlighting critical areas of future research. Those with an interest in the history of science, the history of medicine and all related fields will find this work a stimulating and rewarding read.

Jesus of Nazareth is the most famous Jew who ever lived, yet remains profoundly alienated from his own people. At best he is viewed as the founder of a new religion which for millennia was hostile to Judaism. At worst he is seen as the source of world anti-Semitism, with the charge that the Jews were responsible for his death being the impetus for the murder of countless Jews throughout the ages. But the historical Jesus is also foreign to most Christians who are oblivious to the life he lived as a Jew, his real mission in ancient Judea, the source of most of his celebrated teachings, and his firm attachment to his people. Shmuley Boteach offers us a view of Jesus, based on Jewish and Christian sources, that will serve as a bridge between two faith communities.

Love is a life-and-death risk for the Mountain Mercenaries in New York Times bestselling author Susan Stoker's explosive series of alpha heroes, hot action, and hard passion... Ever since his rescue op off the Pacific Coast, Mountain Mercenary Gray Rogers hasn't been able to forget his latest "job"--Allye Martin. Any other woman would have panicked during a rescue, but the wily dancer kept her cool--even after being kidnapped by an elusive human trafficker. And Gray couldn't be happier when a grateful Allye follows him home to Colorado Springs... For Allye, finding sanctuary in the arms--and bed--of the former Navy SEAL is only temporary. People are disappearing off the streets of San Francisco, victims of the same underground trade that targeted her, and Allye could be the key to dismantling the entire operation. She's willing to do anything to bring them down. Gray isn't--for good reason. But you don't say no to a tough girl like Allye who refuses to play it safe. Now Gray is risking more than ever before. The Mountain Mercenaries have his back. But is it enough to keep the woman he loves out of harm's way?

This is a print on demand edition of a hard to find publication. Explores whether sufficient data exists to examine the temporal and spatial relationships that existed in terrorist group planning, and if so, could patterns of preparatory conduct be identified? About one-half of the terrorists resided, planned, and prepared for terrorism relatively close to their eventual target. The terrorist groups existed for 1,205 days from the first planning meeting to the date of the actual/planned terrorist incident. The planning process for specific acts began 2-3 months prior to the terrorist incident. This study examined selected terrorist groups/incidents in the U.S. from 1980-2002. It provides for the potential to identify patterns of conduct that might lead to intervention prior to the commission of the actual terrorist incidents. Illustrations.

A ruthless killer is on the loose, threatening an innocent woman's life. Painful secrets from Rebel's past will be exhumed and put on full display. Desperation drives him to save the only woman he's ever loved. Tragedy strikes in the most unexpected ways, reducing once strong walls to mere rubble. One man's breaking point is where another man finds his stride. True love can't be bound. Not by time. Not by distance. Not by measure. But can it flourish? It's been said good triumphs over evil and love conquers all. But can a foe be defeated if the lines between good and evil are blurred? When the dust settles and the smoke clears, the last man standing wins. Can Rebel overcome the wicked intentions that have ensnared him?

An essential guide to understanding the issues which characterize post-colonialism. A comprehensive glossary has extensive cross-referencing, a bibliography of essential writings and an easy-to-use A-Z format.

The Supreme Court has recently issued decisions announcing that citizens have neither a constitutional right to vote, nor the right to an education. Conservative judges have continually disavowed claims to any rights not specifically mentioned in the Constitution. In "Overruling Democracy," celebrated law professor Jamin B. Raskin, argues that we need to develop a whole new set of rights, through amendments or court decisions, that revitalize and protect the democracy of everyday life. Detailing specific cases through interesting narratives, "Overruling Democracy" describes the transgressions of the Supreme Court against the Constitution and the people - and the faulty reasoning behind them -- and lays out the plan for the best way to back a more democratic system.

The use of infrasound to monitor the atmosphere has, like infrasound itself, gone largely unheard of through the years. But it has many applications, and it is about time that a book is being devoted to this fascinating subject. Our own involvement with infrasound occurred as graduate students of Prof. William Donn, who had established an infrasound array at the Lamont-Doherty Geological Observatory (now the Lamont-Doherty Earth Observatory) of Columbia University. It was a natural outgrowth of another major activity at Lamont, using seismic waves to explore the Earth's interior. Both the atmosphere and the solid Earth feature velocity (seismic or acoustic) gradients in the vertical which act to refract the respective waves. The refraction in turn allows one to calculate the respective background structure in these mediums, indirectly exploring locations that are hard to observe otherwise. Monitoring these signals also allows one to discover various phenomena, both natural and man-made (some of which have military applications).

Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 193 countries and a group of select territories are used by policy makers, the media, international corporations, and civic activists and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. Press accounts of the survey findings appear in hundreds of influential newspapers in the United States and abroad and form the basis of numerous radio and television reports. The Freedom in the World political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development.

Individualist anarchists believe in mutual exchange, not economic privilege. They believe in freed markets rather than capitalism. They defend a distinctive response to the challenges of ending global capitalism and achieving social justice - they wish to eliminate the political privileges that prop up capitalists. These essays explore the gap between radically freed markets and the capitalist-controlled markets that prevail today. The contributors argue that structural poverty can be abolished by liberating market exchange from state capitalist privilege.

So when Robbie and Lou go snowshoeing the next morning and find the contentious academic frozen under ice, police suspect Lou might have killed him after their public tiff. A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher's carefully constructed world falls apart when he finds his neighbour's dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents' marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws readers into the workings of Christopher's mind. And herein lies the key to the brilliance of Mark Haddon's choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

*From New York Times and USA Today bestselling author Susan Stoker comes a new story in her Delta Force Heroes series... After years of estrangement, Mercedes Laughlin has finally reconciled with her older brother. It should be the happiest time of her life, getting to know Truck and his new wife...and it would be, if an ex wasn't causing her trouble. Add in Truck's boss, Colonel Colton Robinson, an amazingly distracting man whom she met under embarrassing circumstances, and Macie's got a bit more on her plate than she can handle. From the moment they met, Colt was fascinated by Macie, and helping her through an anxiety attack at her brother's wedding didn't diminish the appeal. He'd do his best to sweep her off her feet, if not for a little voice telling him to tread lightly—until a frantic phone call changes the plan. Macie's being targeted, and Colt's determined to keep her safe while he and her brother eliminate the threat. Colt isn't about to let his friend lose his sister again so soon...or miss his own chance at a happy ending with Macie before they've barely had a beginning. ** For fans of Susan's Delta Force Heroes, Rescuing Macie is book eleven in that series** **Every 1001 Dark Nights novella is a standalone story. For new readers, it's an introduction to an author's world. And for fans, it's a bonus book in the author's series. We hope you'll enjoy each one as much as we do.***

Bestselling author Sherman Alexie tells the story of Junior, a budding cartoonist growing up on the Spokane Indian Reservation. Determined to take his future into his own hands, Junior leaves his troubled school on the rez to attend an all-white farm town high school where the only other Indian is the school mascot. Heartbreaking, funny, and beautifully written, The Absolutely True Diary of a Part-Time Indian, which is based on the author's own experiences, coupled with poignant drawings by Ellen Forney that reflect the character's art, chronicles the contemporary adolescence of one Native American boy as he attempts to break away from the life he was destined to live. With a forward by Markus Zusak, interviews with Sherman Alexie and Ellen Forney, and four-color interior art throughout, this edition is perfect for fans and collectors alike.

Since the 1980s a great deal has been written about the relationship between art, architecture, and design, on the one hand, and the city or social space on the other. In Evictions Rosalyn Deutsche investigates the

dominant uses of this interdisciplinary discourse, exploring topics that range from public art and homelessness to the repression of feminism in critical theories of public space. The book also intervenes in debates taking place in art, architecture, and urban studies about the meaning of public space, and places these struggles within broader contests over the definition of democracy. Opposing the nostalgic belief that democracy's survival demands a return to the ideal of a unitary public sphere, Deutsche contends that plurality and conflict, far from undermining public space, are the conditions of its possibility and extension.
